#### AUTHOR INDEX

to Volumes 135 to 154

#### PREFACE TO AUTHOR INDEX

HIS Author Index to Volumes 135-154 of the Journal of Physiology has been compiled in the same manner as were the previous Indexes All the papers written by an author, whether alone or in collaboration, are given under his name in order of publication. A paper by more than one author appears under each of its authors, with its full title and reference, and the original sequence of the authors' names is preserved, in order, however, to avoid the repetition of the marginal name, the sequence is indicated by the positions of the comma, the dash and the word 'and'

Papers in the *Proceedings of the Physiological Society* can be recognized by the fact that their page reference is followed by the letter P Those published by title only are indicated by (T) The year given is that in which the *Proceedings* were published, and is not necessarily that in which the paper was presented at a meeting of the Society

mental gastric electron and the prevention of experimental gastric electron in the rat by phloxin (T)  and Lowy, J Contraction in molluscan smooth muscle  "and Lowy, J Mechanical properties of Helix and Mythius muscle  "and Baskin, R J Volume changes in active muscle  "ABRARAMS, V C , Keelle, G B and Smart, Priscilla Histochemical demonstration of cholinesterases in the hypothalamus of the dog and Hillon, S M Defence reactions in the cat elected by hypothalamic stimulation (T) and Hillon, S M Active muscle vascillatation and its relation to the 'Flight and Fight reactions' in the conscious animal and Piclford, Mary The effect of distension of the uterus on the composition of urine of conscious dogs  "Enous temperature registration, and its use as an index of muscle blood flow , Hillon, S M and Zbrozyna, A Conditioned defence reactions in cats established on the basis of hypothalamic stimulation (T) , Hillon, S M and Zbrozyna, A Active muscle vasodilatation elected by mesoncephalic stimulation. Its relation to the defence reaction , Hillon, S M and Malcolm, J L Sensory input to hypothalamic and mesencephalic regions subserving the defence reaction , Hillon, S M and Zbrozyna, A Reflex activation of vasodilatation produced by stimulation of the brain stem its significance in the defence reaction (Philon, S M and Zbrozyna, A Active muscle vasodilatation produced by stimulation of the brain stem its significance in the defence reaction (Philon, S M and Zbrozyna, A Active muscle vasodilatation produced by stimulation of the brain stem its significance in the defence reaction (Philon, S M and Zbrozyna, A Active muscle vasodilatation produced by stimulation of the brain stem its significance in the defence reaction (Philon, S M and Zbrozyna, A Active muscle vasodilatation produced by stimulation of the brain stem its significance in the defence reaction (Philon, S M and Zbrozyna, A Active muscle vasodilatation and the sterior of contraction in fortial and new born lambs  Acheson, G H  Acheson, G H  Acheson, G H  Acheso			
muscle and Lowy, J Mechanical properties of Helix and Mythus muscle and Baskin, R J Volume changes in active muscle  Neelle, G B and Smart, Prucilla Histochemical demonstration of cholinesterases in the hypo thalamis of the dog and Hilton, S M Defence reactions in the cat elected by hypothalamic stimulation (T) and Hilton, S M Active muscle vasodilatation and its relation to the Flight and Fight reactions in the conscious animal and Pickford, Mary The effect of distension of the uterus on the composition of urine of conscious dogs Venous temperature registration, and its use as an index of muscle blood flow Hilton, S M and Zbrozyna, A Conditioned de fence reactions in cats established on the basis of hypothalamic stimulation (T) Hilton, S M and Zbrozyna, A Active muscle vasodilatation elicited by mesencephalic stimu- lation. Its relation to the defence reaction Hilton, S M and Malcolm, J L Sensory input to hypothalamic and mesencephalic regions sub sorving the defence reaction Hilton, S M and Zbrozyna, A Reflex activation of vasodilator nerve fibres to skeletal muscle in decerebrate and intact cats Hilton S M and Zbrozyna, A Active muscle vasodilation produced by stimulation of the brain stem its significance in the defence reaction  Abbans L D Left side perfusion of isolated rabbit heart  and Fry, R J M The action of curare in the cat (T)  Acheson, G H  Acheson, G H  Acheson, G S and Mott, Joan C Oxygen con sumption and the arternal oxygen saturation in foetal and new born lambs  and Illman, O Studies on iodide transport against a concentration gradient by the small intestine of the rat in vitro  147, 280, 186	Aarsen, P N	and van Noordwyk, J The inhibition of acid gastric secretion and the prevention of experi mental gastric ulcers in the rat by phloxin (T)	148, 82 <i>P</i> , 1959

## SUBJECT INDEX

to Volumes 135 to 154

#### PREFACE TO SUBJECT INDEX

THE same method has been adopted in the compilation of this Index as in the previous one. The main points of practical significance to the user of the Index are the following

- (1) References to volumes are in Clarendon type and references to pages are in ordinary Arabic numerals. Page references to articles in the Proceedings are in Arabic numerals followed by a capital P Articles published by title only are indicated by (T)
- (2) Owing to the length of some papers and the variety of subjectmatter covered, the reference in each case is not the first page of a paper but to the first page on which the subject in question is mentioned
- (3) When two alternative words are in general use for the same subject, e.g. liver and hepatic or kidney and renal, the choice of the author of the paper has been accepted and only a general cross-reference given to the whole subject
- (4) The name of the experimental animal used has been given after each reference. When more than two mammals are concerned, the word Mammal is used whereas the term Various applies to more than two species including other vertebrates and invertebrates.

1961

W GRACE EGGLETON

# SUBJECT INDEX

- A band, adenine nucleotide concentration in (frog.), 153, 437
  - autoradiographic localization of adenine nucleotide in relation to (frog), 145, 166
  - local activation and movement of (frog), 144, 431
  - stretch and contraction of muscle fibres affecting length of (frog), 144, 413
- Abdominal muscles, increased expiratory resistance affecting activity of (man), 136, 556
- Abdominal vagus nerve, vagotomy effect on total number of axons in (cat), 135, 197
- Abomasum, acid secretion by (sheep), 149, 72P
  - factors affecting secretion in (sheep), 154, 115
  - reticulum contractions affected by acid in (ruminant), 141, 6 (sheep) 147, 68
- Acceleration, arternal blood O<sub>2</sub> saturation and pH changes during prolonged positive (dog), 143, 79 P
  - cardiac output affected by positive radial (man), 147, 49 P
  - respiratory changes during prolonged positive (dog), 142, 60 P
- Acclimatization, alveolar air composition at high altitude affected by (man), 135 599
- foetal loss affected by high temperature (rat), 135 455
- Accommodation, eye convergence relation to (man), 137 488
  - fluctuations under steady viewing conditions of (man), 145 579
- Accommodation responses, dynamics of (man), 151 285
- Acetalphosphatidic acid, darmstoff and 137, 159
- Acetate <sup>14</sup>C labelled, radioactive CO<sub>2</sub> movements in body during oxidation of (dog) 147, 494
- Acetate, heart utilization of isotope labelled (rat gumea pig) 136 386
  - intestinal transfer of (rat), 152, 51 milk secretion by isolated perfused main mary gland affected by (goat), 154, 554
  - thyroid effect on liver synthesis of cholesterol from (mammal) 144 364

- Acetazoleamide, aqueous humour and c.s.f composition affected by (mammal), 137, 279
  - intraocular pressure after ganghonectomy affected by (rabbit), 152, 449
  - renal bicarbonate reabsorption affected by (man, dog), 145, 277
- Acetic acid, abomasal secretion affected by (sheep), 154, 126
- Acetone bodies, estimation in blood and urine of, 135, 31 P
- Acetone, odour threshold affected by self adaptation to (man), 139, 10
- Acetyl-β-methylcholine, sweat glands affected by (man), 148, 590
- Acetylcholine, adrenal medulla pressor ammes output affected by (calf), 152, 22
  - arternal dilator response to peripheral injection of (cat), 149, 100
  - atrial contractions and intracellular potentials affected by (rabbit), 147, 325
  - botulinum intoxicated muscle sensitivity to (cat), 151, 602
  - buffy coat and oak gall extracts affecting sensitivity of ileum to (guinea pig), 154, 465
  - cerebral ventricular injection with and subsequent fate of (cat, dog), 140, 169
  - cerebrospinal fluid sensitization of frog rectus response to (man), 137, 460
  - cerebrospinal fluid substance sensitizing frog rectus muscle to (T), 135, 18 P
  - ciliary activity affected by (frog), 139, 157 ciliary movement affected by (frog), 141, 520
  - conduction in non myelinated fibres af feeted by (rabbit), 152, 141
  - coronary flow and weight of perfused heart affected by (rabbit), 148, 405
  - cutaneous non invelinated nerve fibres affected by (cat), 150, 501
  - denervated end plate s supersensitivity to (frog), 150, 157
  - denervated parotid gland response to (cat), 143, 509
  - denervated sheletal muscle fibre sensa tivity to (frog), 151, 1
  - denervated skeletal muscle supersensitivity to (cat) 147, 178
  - depolarized plain muscle response to (various), 143 477

Acetylcholine, diffusion in agar gels and in isolated diaphragm of (rat), 153, 562 distribution in fractions of brain homo genate (mammal), 142, 187

DNP interaction on taenia coli with (guinea pig), 143, 190

drug induced modification of responses of cholinoceptive cells to (T), 137, 74P electric organ containing (electric catfish), 140, 498

enzyme systems in atria concerned with synthesis of (rabbit), 149, 462

extraction from frozen heads of (blowfly), 142, 165

Factor I and  $\gamma$  aminobutyric acid effect on plain muscle stimulated by (various), 145, 67

foetal and new born diaphragm muscle sensitivity to (rat), 149, 50 P

 $\gamma$  aminobutyric acid antagonism on ileum to (guinea pig), 142, 150

heart A-H interval affected by (cat, dog), 142, 134

mtestinal mucosa release of 5 H T by pressure affected by (guinea-pig), 146,21 intrafusal muscle fibre membrane affected by (frog), 139, 21

irin differentiation from (mammal), 135,

isolated nictitating membrane response to (cat), 141 50

isolated perfused heart affected by (rat) 145, 271

milk ejection response to intracarotid (dog), 152, 521

motor end plate 'desensitization' by (frog), 138, 63, 148, 659

muscle fibre threshold affected by rate of application of (rat), 140, 448

normal and regenerating nerve affected by (rabbit), 145 611

parotid secretion during Na depletion affected by (sheep), 135, 237

parotid secretion Na K ratio in Na depletion affected by (sheep), 138, 46 partially denervated muscle sensitivity to (frog), 147, 45P

pilomotor response to (cat), 148 335 plam muscle affected by 5 HT and by (Mytilus edulis), 152, 230, 236

plain muscle response to, (Mytilus) 148, 452

plain muscle spike potentials affected by (guinea pig), 135, 417

potassium fluxes of auricle affected by (rabbit), 146, 403

preganglionic trunk of cervical sym pathetic affected by (rabbit) 153, 250 Acetylcholine, regenerating motor nerves containing (cat), 154, 69 P

regenerating neuromuscular synapsesons tivity to (frog), 154, 194

Renshaw cell response to electropho retically applied (cat), 141, 438

resting and action potentials of plain muscle affected by (vertebrate), 140, 161

salivary gland mucin secretion and phos pholipid phosphate turnover affected by (rabbit), 135, 19

spinal cord activity affected by (cat), 141,

spinal reflexes affected by (cat), 136, 422 superior cervical ganglion partial de nervation and release of (cat), 135, 149 sweat gland activity depression by (man), 148, 21 P

sweat glands affected by (man), 148, 500 taems coll electrical properties affected by (guinea pig), 143, 165

temperature reduction effect on response of ileum to (guinea pig), 137, 398

tissues containing (invertebrates), 139, 442

tonic response in plain muscle effected by (Mytelus), 149, 159

tubocurarine quantitative antagonism at motor end plate to (frog), 152, 312 virus infected sympathetic ganglia and role of (rat), 139, 145

Acetylcholine receptors, properties in denervated muscle of (cat), 147, 183 skeletal muscle fibre junctional and

extra junctional (rat), 151, 24

Acetylcholine synthesis, temperature ef fect on brain (rabbit, wrasse), 142, 25P Acid-base balance, citrate excretion af

fected by (rat), 149, 413 immediate respiratory effects of change

in (man), 149, 57 P
Acid-base relationships, foetal fluids and

(pig), 151, 484

Acid excretion, hydrocortisone, DOCG and aldosterone action on (man), 151,

postural change affecting diurnal rhythm of (man), 148, 495

Acid, muscle internal pH affected by (crab), 142, 26

Acidity, posture effect on urmary (man), 139, 340

Acoustic cortex, olfactory and reticular arousal effect on potentials in (cat), 136, 30

Acoustic discrimination, temporal lobe projections and (cat), 147, 17P

- Acoustic stimuli, preganglionic sympathetic activity affected by (cat), 150, 123
- Action potential, calcium effect on nerve fibre (frog), 137, 250
  - calcium effect on potassium induced con tracture and on (frog), 151, 530
  - chloride removal effect on skeletal muscle (frog), 151, 84
  - class experiment on (T), 137, 12P
  - conduction velocity in different vagal fibres relation to duration of (cat), 142, 120
  - DDT action on giant axon (cockroach) 152, 123
  - mtrafusal muscle fibres showing (frog), 137, 196
  - ion fluxes during (Chara globularis) 144,
  - hthum replacement of sodium effect on muscle (frog), 147, 635
  - method for recording in isolated myelinated nerve fibre (frog) 135, 550 temperature effect on skeletal muscle fibre (frog) 142, 100
  - Active state, assessment in skeletal muscle of duration of (frog) 152, 38
    - chloride removal effect on skeletal muscle (frog) 151, 96
    - plain muscle relaxation and (Mytilus), 141, 393
  - Adaptation, electrical and mechanical factors in muscle spindle (cat) 153, 209
    - localized cooling of hand showing (man) 136, 98
    - lung elastic pressure volume curves show mg (rabbit) 138 479
    - non medullated fibres signalling touch showing (cat), 139, 393
    - retina showing (frog), 149 296
  - Adenine, erythrocyte uptake of (man), 154, 616
    - skeletal muscle labelling with <sup>14</sup>C- and <sup>3</sup>H (frog), 145, 133
  - Adenine nucleotide, preferred sites in skeletal muscle of (frog), 153, 433
    - skeletal muscle and location of (frog), 150 347
    - ultra violet absorption spectrum of (frog) 148–383
  - Adenosine diphosphate, heart sarcosomes affected by (toad) 147 25
  - Adenosine, erythrocyte uptake of (man), 154, 614
  - Adenosine triphosphate, antidromic str mulation of sensory nerve liberating (rabbit) 141 13P

- Adenosine triphosphate, <sup>14</sup>C adenine in corporation into skeletal muscle (frog), 145, 141
  - chromaffin granule adrenaline relation to (chick), 137, 323
  - C nerve stimulation affecting (rabbit), 148, 355 giant axon metabolism and (squid). 152.
  - 551
  - giant axon Na efflux affected by injection of (squid), 152, 564
  - intra ocular pressure affected by (rabbit), 147, 419
  - incitro preparation of intestine triothyltin diminishes content of (rat), 148 122
  - irin distinction from (mammal), 146, 263 potassium movement into erythrocyte and (man), 140, 479
  - sensory nerve stimulation liberation of (rabbit) 145, 494
  - Adenosinetriphosphatase, ion move ments and activity of (man), 152, 61 P
- Adipose tissue, metabolic rate and heat loss in cold and warm water affected by (man), 154, 329
- Adrenal ascorbic acid, acute stress in wild rats effect on (rat), 135, 390
  - pituitary stalk section diminishes stress action on (rabbit), 136, 354
- Adrenal cortex, ACTH effect on ribo nucleic acid distribution in (guinea pig), 146, 465
  - androgens effect on secretory capacity of (rat), 151, 123
  - corticotrophin and functional changes in (rat), 138, 450
  - cytochemical study of regeneration after enucleation of (rat) 135, 536
  - hexoestrol inhibition and cholesterol of (rat), 138, 461
  - histochemistry after administration of ACTH (guinea pig) 143, 70P
  - ACTH (guinea pig) 143, 70P indices of activity of (rabbit) 136, 349
  - ribonucleic acid distribution during oestrus cycle in (rat), 149, 20 P
- Adrenal cortex regeneration, aldosterone and corticosterone secretion during (rat), 146, 165
- Adrenal cortical function, pituitary stalk section effect on (monkey), 153, 44 P
- Adrenal gland, cholinesterase distribution in (mammal), 141 97
  - corticosteroids in adrenal vein blood and in (mammal) 139, 296
    - corticosteroid secretion by autotrans planted (sheep) 147, 33
  - haemorrhage effect on vasoactive sub stances from (rat) 143, 222

Adrenal gland, long exposure to cold of wild and domestic Norway rats affects (rat), 135, 384

noradrenaline percentage in families in (cat), 154, 43P

partial hypophysectomy effect on (rab bit), 149, 401

sympathomimetic amine content of left and right (cat), 136, 294

Adrenal lipid, corticosterone secretion relation to (rat), 138, 453

Adrenal medulla, adrenaline and nor adrenaline output from (calf), 152, 14 catechol amines distribution in homo

genates of (bovine), 141, 183 chromaffin reaction in (rat), 141, 193

mitochondrial enzymes and chromaffin granules in (ox), 139, 316

reserpine effect on catechol amines in (mammal), 141, 146

thyroid response to hypothalamic stimu lation affected by denervation (rabbit), 143, 262

Adrenal steroids, cation excretion at night affected by (man), 149, 21P

Adrenalectomy, blood eosmophils, base phils and histamine affected by (dog), 136, 452

bone Na and K affected by (rat), 147, 120 bone sodium metabolism affected by (rat), 142, 438

hydrocortisone effect on corticotrophin of blood and pituitary gland in stress after (rat), 150, 683

insulin action on denervated ear vessels affected by (rabbit), 149, 237

insulin and glucose action on liver blood flow and metabolism affected by (rat), 150, 593 oxygen poisoning affected by (rat), 140, 23 parotid secretion Na K ratio affected by rapid change in Na balance after (sheep), 138, 55

plasma catecholamines affected by (man), 154, 248

plasma Na and K affected by (lizard) 145, 43

pyrogen release of vasoconstrictor sub stances affected by (rabbit), 138 426

renal response to vasopressin affected by (dog), 148 55P

technique in living dog for reversible functional (T), 153, 43P

thyroid hormone antagonism to early onset of muscular fatigue following (mouse), 140, 56P

thyroid response to hypothalamic stimu lation affected by (rabbit) 143, 255 tissue histamine affected by (rat) 147,51 Adrenaline, adrenal cortical secretion from demedullated glands affected by (rat). 138, 456

adrenal medulla homogenates distribution of (bovine), 141, 184

adrenal medulla output of (calf), 152, 14 amine oxidase inhibition effect on (cat), 135. 343

area postrema ablation effect on vomiting produced by intraventricular (cst), 147, 172

atrial fibrillation affected by (dog H L), 137, 141

atrial fibrillation in heart-lung prepara tion prevention by (T), 135, 18P

blood coagulation time affected by (man), 135, 371

capacity blood vessels affected by (man), 140, 115

chromaffin granules containing (chick), 137, 318

corticoids action on heart response to (rat, guinea pig), 139, 329

erythrocyte potassium concentration af fected by (sheep), 136, 46

ethyleneiminium ions antagonize pressor effect of (rat, dog), 135, 62P

fluorimetric analysis in plasma of (ox, man), 135, 44P

foetal age effect on hypoxic bradycardia response to (guinea pig), 145, 6P foetal bradycardia induced by (guines

pig), 152, 4

foetal cardiovascular sensitivity to (rab bit), 138, 9P

foetal sensitivity to (rabbit), 139, 125 heart A H interval affected by (cat, dog), 142, 135

insulin hypoglycaemia release of (rabbit), 149, 228

intracellular action potential of atria affected by (rabbit), 140, 339

intraventricular injection of (sheep), 149,

isolated nictitating membrane response to

(cat), 141, 50 metabolic basis for action on intestinal smooth muscle of (guinea pig), 153, 30P

milk ejection response to oxytocin af fected by (dog), 152, 522 muscle spindles affected by (cat), 151, 337

muscle stretch receptors response to anti dromic stimulation affected by (cat), 148 257

neuromuscular propagation affected by (rat), 141, 291 parotid gland secretion affected by

(sheep) 144, 476

- Adrenaline, passage into cerebral ventricles and subarachnoid space of circulating (cat) 150, 34
  - passage into perfused subarachnoidal and cerebral ventricular spaces from intravenously infused (cat), 145, 24P

perfused heart weight affected by (rab bit), 148, 395

perfused heart weight loss caused by (rabbit), 142, 27 P

peristaltic reflex in ileum affected by (guinea pig), 136, 256

plain muscle phosphorylase and mem brane potential affected by (guinea pig), 148, 62 P

plain muscle spike potentials affected by (guines pig), 135, 416

pulmonary blood flow affected by (dog), 145, 108

pupil after ganglionectomy affected by (rabbit), 152, 453

quantitative measurement of pressor activity of (rabbit), 153 290

renal effects of (dog), 142, 52P

reserpine action on sympathetic ganglia (mammal), 141, 136

reticulum contractions affected by (rumi nant), 141, 14

salvary gland mucin secretion and phos pholipid phosphate turnover affected by (rabbit), 135, 21

sheletal muscle contractions affected by (cat), 144, 92

sweat glands affected by (man), 148, 590

taenia coli electrical properties affected by (guinea pig), 143, 183

temperature effect on response of artery to (bullock), 142, 397

thyroid affected by (man, dog), 151 261 thyroid response to TSH affected by (rabbit), 152, 535

tubocurarine action in aqueduct affected by (cat) 149, 68

uterus affected by (cat) 152, 243

vagus excitatory action on atria related to (cat rabbit), 142 174

virus infected sympathetic ganglia af fected by (rat) 146, 432

Adrenaline hyperpnoea, observations on mechanism of (mammal) 137 374

Adrenaline vasodilatation, forearm blood vessels showing (man) 148, 546

Adrenaline sweat tracking, skin lymph atics concerned with (horse), 135, 42P

Adrenergic blocking agent, experiments with a true (T) 142 47P

Adrenergic ganglion cells, broncho dilator response to nicotine and (guinea pig), 144, 203

Adrenocortical function, oestrogen effect on (rat), 138, 45P

Adrenocorticotrophin, adrenal ascorbic acid in wild rats affected by (rat), 135, 394

adrenal gland corticosterone content affected by (rat), 139, 300

adrenal nuclei affected by (guinea pig), 135, 12P

androgens action on adrenal cortex affected by (rat), 151, 126

corticosteroid secretion of autotrans planted adrenal gland affected by (sheep), 147, 38

observations on mechanisms controlling release of (T), 136, 23P

pituitary stalk section effect on release of (rabbit), 136, 344

ribonucleic acid in adrenal cortex distribution affected by (guinea pig), 146, 465

thyroid gland response to (guinea pig), 151 47

Aerosols, retention in lung of wet (man), 154, 9 P

Afferent abdominal vagus, reflexes me diated by (cat, rabbit), 142, 6P

Afferent C fibres, conduction velocity in (cat), 152 339

Afferent nerve fibres, analysis of diameter and receptor characteristics of cu taneous (cat), 153, 99

intracellular recording in spinal cord from primary (cat), 149, 250

Afferent nerve fibre terminations, ex citability in spinal cord of (cat), 142, 1

Afferent nerve section, central synapses affected by (cat), 145, 204

After-depolarization, primary afferent fibres in spinal cord showing (cat), 149, 255

After-discharge, non medullated fibres signalling touch showing (cat), 139, 393

After-effects, retinal illumination by white light showing (man), 150, 67

After-hyperpolarization, primary af ferent fibres in spinal cord showing (cat), 149 261

After-images, discrimination of (man), 147, 194

After-potential, atras showing (rabbit), 149, 78

chemical modification of skeletal muscle fibre (frog), 142, 78 After-potential, lateral geniculate body showing (cat), 154, 516

mechanism of production in giant axons of (cockroach), 151, 75

motoneurones supplying fast and slow muscles differences in (cat), 142, 279

temperature effect on skeletal muscle fibre (frog), 142, 103

Age, adrenal medulia pressor ammes con centration affected by (calf), 152, 16

alveolar capillary permeability affected by (man), 146, 574

anoxia survival time variation with (mammal), 144, 18 P

antidiuretic response affected by (rat), 141, 332

blood, red cell and plasma volumes affected by (rat), 139, 64

bone sodium variation with (rat), 139, 478

calorie requirement decrement in female with advancing (man), 135, 13P

convergence induced accommodation af fected by (man) 137 496

histamine and 5 HT of tissues affected by (rat), 137, 173

neurohypophyseal hormones variation with (mammal) 147 301

oxygen poisoning affected by (rat), 140, 30

parotid saliva secretion rate and com position affected by (goat), 150 539

peripheral vasodilatation in a hot environ ment affected by (man), 141, 262

radiation sensitivity variation with (mouse) 141 39 P

radio iodide distribution in body affected by (rat), 148 683

response of tissues to similar stimuli affected by (man), 141, 45P

vital capacity and maximum breathing capacity relation to (man) 135 102

Air-flow, simple interrupter of, 147, 40 P Air, oxygen and CO<sub>1</sub> O<sub>2</sub> mixture com parison in resuscitation from CO poisoning with (dog) 147, 279

Alanine, glutamic acid absorption from small intestine causing increase in (mammal), 140, 148

Albino rat, retinal photopigments in, 136,

rhodopsin regeneration in, 136 624

Albumin, calcium action on erythrocyte permeability affected by (man) 149, 573

intercellular volume of centrifuged ery throcytes measured by (man), 145, 662 thyroxine binding by (various), 153 181 Aldosterone, extraction from plasma and whole blood of (T), 148, 39P

isolated kidney affected by (cat), 149, 73P

neurohypophysial hormones interactions on isolated kidney with (cat), 152, 206 observations on the control of secretion of (dog), 148, 13 P

postural changes affecting excretion of (man), 143, 9P, 146, 133

regenerating adrenal cortex secretion of (rat), 146, 170

renal excretion of sodium, potassium and acid affected by (man), 151, 312

sodium and potassium movement in erythrocytes affected by (man), 136, 159

sodium depletion effect on output by autotransplanted adrenal gland of (sheep), 147, 38

urmary changes on standing and (man), 151, 43P

Aldosterone secretion, anotha by rbe removal effect on (dog) 153, 55P

plasma volume variations effect on rapid changes in (dog) (T) 143, 86 P

Algal polyanion, peptic ulceration protection by (guinea pig) 147, 52P

Alimentary osmoreceptor, localization of (man), 154, 270

Alimentary tract, nitrogen removal at different levels of (sheep), 139, 25P
'X ray films of ruminants' (T), 139, 8P

Alkalaemia, acid base changes in arterial blood and c s r induced by (man), 149, 71 P

Alkali, muscle internal pH affected by (crab), 142, 32

All-or-none response, plan muscle showing (guinea pig), 142, 427

Allantoic epithelium, electrolyte trans port through (pig), 151, 460

Allantoic fluid, bladder fluid comparison during persistence of mesonephros with (rabbit, pig), 151, 474

composition change with foetal age in (pig) 151, 486

foetal age and composition of (sheep), 140, 1

Alpha-ketoglutarate, citrate excretion and (rat), 149, 418

Alpha motoneurones, cerebellar antenor lobe action on (cat), 149, 626

characteristics of fast and slow (cat), 142,

Alpha rhythm, nitrogen high partial pressures and abolition of blocking of (man), 138, 18 P

- Altitude, barometric pressure variation with 135, 593
- Alveolar air, altitude effect on composition of (man) 135, 596
  - apparatus for sampling during hyper ventilation of (man) 143, 1P
  - sampling device for 142, 11P
- Alveolar-capillary permeability, age body size and lung volume effect on (man), 146, 572
- Alveolar carbon dioxide, respiratory manœuvres effect on plateau of (man) 142 43P
- Alveolar gas tensions, pulmonars vas cular resistance affected by changes in (dog) 139, 256
- Alveolar gas volume, pulmonary diffusing capacity measurement affected by (man), 141, 411
- Amine oxidase, mammalian plasma (T)
  140 24P
  - noradrenalme from sympathetic nerves to intestine affected by (cat) 143-45
- noradrenaline release from spleen affected by (cat), 138-89
  - salivary glands containing (man), 147
    639
- Amine oxidase inhibition, amines in activated after (cat) 135-339
- Amine oxidases, primary and secondary amines as substrates of 153 17P
- species difference in content in plasma of (mammal) 145 384
- Amines, paper chromatography separation of biologically interesting (T) 148 47 P
- Amino-acids, concentration and intestinal absorption relation in D and L (rat) 147 14P
  - concentration effect on rate of intestinal absorption of (rat) 149 433
  - cvstmuma and clearances of (man) 142
  - enantiomorphs competition in intestinal absorption of (rat) 145 57
  - heart cells permeation by (rat) 150 624 heart utilization of isotope labelled (rat, guinea pig) 136 389
  - milk secretion by isolated perfused man mary gland affected by (goat) 154, 554 pyridoxal effect on transport by small
  - intestine of (golden harnster) 136 203
- Aminobutvric acid, ileum affected by / (mammal) 142 147
- Aminoguanidine, histamine excretion during pregnancy affected by (rat) 143 96
- Ammonia, posture effect on urmarv ex cre ion of (man) 139 340

- Ammon's horn, dorsal commissure stimulation effect on (rabbit), 135, 464 tubocurarine action on (cat) 149, 60
- Amnion, acetylcholine and electrical stimulation effect on isolated (chick) 136, 36 P
- Amniotic fluid, foetal age and composition of (sheep) 140 I
  - serum proteins absorption from (monkey), 153 275
- Amoeba, factors altering form of (Film)
  (T) 143 28 P
- Amphenone, adrenal gland corticosterone content affected by (rat) 139, 301
  - hexoestrol inhibition of adrenal cortex and (rat) 138 468
- Amphibian, breeding habits of (Gastrotheca marsupiatum) (Film) 135 38P
- Amphibian muscle, sodium free solution effect on sodium efflux from (frog toad), 147 596
- Amplifier, compact mains driven for class use (T) 148 5P
- mains-driven biological DC (T), 153, 42P
  Ampullae of Lorenzini, temperature
- change and direct current stimulation effect on (Raja darata) 145, 1 Amygdala, affective reactions by electrical
  - stimulation of (cat), 138 29P defence reaction on stimulation of (cat).
  - 145 253
    defence reactions from stria terminalis
- and (cat) 153 27P
- Anaesthesia, alveolar arternal CO gradient during (man) 142 61 P cervical cord response to drugs affected
  - by type of (cat) 151 512 heart rate response to stimulation of
  - dorsal medulla affected by (cat), 151,
  - high pressure ovvgen effects on cardiac and respiratory function affected by type of (cat) 152, 507
  - high oxigen pressure effect on circulation and respiration under different types of (rat) 143, 154
  - intra ventricular injection of Ca producing (cat) 139 409
  - lung compliance affected by (man), 136–10 myoclonus induced by Newcastle disease virus affected by (cat) 143–69
  - new born dosage for (sheep) 146 323
  - parotid gland secretion affected by (goat), 150 541
  - responses to repeated cooling affected by (rat) 146 42P
  - thermal polypnoea onset affected by (calf) 136 415

Anaesthesia, vascular responses to CO<sub>2</sub> in halation affected by (man) (T), 142, 62 P

Anaesthetic, erythrocyte potassium con centration affected by (sheep), 136, 47 nictitating membrane (isolated) sensi tivity affected by previous (cat), 141, 65 preganghonic sympathetic activity af fected by (cat), 150, 116

single unit activity in lateral geniculate

body affected by (cat), 154, 213 spindle motor fibres activity affected by (rabbit), 149, 128

Anal region, sensory nerve endings in (man), 144, 1P

Anal sphincter, muscle spindles in external (cat), 151, 23P

Anaphylactic reaction, calcium require ment in, 136, 31 P

inhibition of (guinea pig), 135, 301

ionic strength influence on (guinea pig) 153, 66P

temperature effect on (guinea pig), 135

Anaphylactic shock (rat) 140, 47P histamine and 5 HT relation to (mammal), 144, 525

H pertussis vaccine action in sensitizing to (rat), 142, 570

splenectomy and (gumea pig), 142 5P Anaphylactoid reaction, 5 HT and (rat), 139. 27

glucagon and insulin effect on dextran induced (rat), 145, 667

Anaphylaxis, calcium and pH effect in (guinea pig), 140, 272

failure of aerobic metabolism inhibitors to prevent histamine release in lung during (guinea-pig) 154 11 P

lung production of slow reacting sub stance in (mammal) 151, 416

mast cells and (guinea pig), 140 6P

mast cells and histamme content of tissues affected by (guinea pig), 147, 425

Androgens, adrenal cortex secretory capa city affected by (rat), 151, 123

Angiotensin, circulatory effects of ad renaline and synthetic (cat) 149, 52P Animal calorimetry (T), 135 36P

Anions, chloride output from skeletal muscle affected by other (frog), 141, 351 mammary gland iodide concentrating power affected by (mammal) 135, 648 mechanical response of single muscle fibres affected by different (frog) 153 404

skeletal muscle membrane resistance affected by (frog) 146 117

Ankle muscles, monosynaptic excitation of motoneurones of (cat) 137, 33

Anode, calcium effect on axon sodium conductance at (squid), 137, 227

Anoxia, adrenalme hyperpness affected by (cat, rabbit), 137, 381

after potentials in skeletal muscle fibre affected by (frog), 142, 85 diaphragm resting potentials affected by

diaphragm resting potentials affected by stimulation induced (rat), 143, 312

foetal cardiac carbohydrate relation to effects of (sheep), 146, 526

foetal oxygen consumption affected by (sheep), 146, 301

foetus and new born ability to withstand total (sheep), 144, 18P

foetus and new born resistance to (monkey), 152, 286

kidney slice water content in recovery from (rat), 136, 585

respiration in new born affected by (rabbit), 145, 90, (sheep) 146, 324

resting membrane potentials of isolated tissues affected by (cat, guineapig), 139, 182

resting potentials of disphragm muscle affected by prolonged (rat), 140, 301

superior vena caval flow affected by (dog), 142, 372

survival time and tissue carbohydrate in young affected by (rat), 153, 461

tolerance to pressure breathing with mask and limb counterpressure affected by (man), 147, 47P

Anterior byssal retractor muscle, im proved method of preparing (Mytilus) (T), 142, 17.P

phasic and tonic responses in (Mytilus), 148 23P, 149, 154

Anterior chamber, fate of substances injected into (cat, rabbit), 151, 202

Anterior pituitary gland, regeneration after pituitary stalk section (sheep), 143 25 P

Anterior pituitary hormones, heart growth, work and size control by (rat), 150, 251

Anterior pituitary infarct, pituitary stalk section production of (baboon, rhesus monkey), 146, 2P

Anticholinesterases, ACh action on non my elinated nerve fibres affected by (rabbit) 153, 43P

ACh action on sweat glands affected by (man), 148, 601

pulmonary circulation affected by (dog), 139, 250

Ronshaw cell response to electropho retically applied (cat), 141, 447 spleen affected by (dog), 139, 489

Anticoagulants, platelet uptake of 5 HT affected by (man), 146, 481

Antidromic activation, red muscle spinal motoneurone excitability following (cat), 149, 374

Antidromic excitation, Pacinian corpuscle receptor potential affected by (cat), 141, 123

Antidromic impulse, functional activity in specific groups of fibres in nerve measurement by means of (rabbit), 138, 19

post-synaptic potentials analysis by interaction with (cat), 145, 534

Antidromic shock, spinal motoneurone inhibition by (cat), 138, 383

Antidromic spike potential, intramoto neurone recording of (cat), 139, 199

Antidromic stimulation, lateral geniculate neurones after potentials evoked by (cat), 154, 527

muscle stretch receptors affected by (cat), 148, 252

Antidromic transmission, giant motor synapses and (crayfish) 145 303

Antidiuretic activity, —SH active compounds destruction in vasopressin of (pig), 141, 111

Antidiuretic hormone, age effect on renal response to (rat), 141, 332

separate release of oxytocun and (man), 141, 30P, 149, 443

water deprivation and role of (rat), 136, 235

Antigen-antibody reactions, cutaneous (rat), 150, 489

Antigen, must cells of sensitized tissues affected by (guinea pig), 147, 425

passive sensitization to (guinea pig), 150, 546

Antihistamines, species difference in response to (mammal), 137, 55

Anti-insulin serum, acute insulin de ficiency produced by injection of (mammal), 153 131

diabetes production by (rat) 153, 146 Antipyretics, histamine release by antigen affected by (guinea-pig), 135 307

Antithrombin, brain tissue containing (man) 135, 12

Aortic imcompetence, pulsating cuff technique for determining index of regurgitation in (man), 153 65P

Aortic nerve, size frequency distribution of myelinated fibres in (cat) 135

Apnoea, lung inflation in new born causing (man) 151, 553

Apparatus, Alveolar air sampling during hyperventilation (man), 143, 1P

automatic oxygen consumption meter, 146, 20 P

binocular fixation (man), 137, 489

blood flow and blood pressure recording (T), 145, 4P

blood pH, continuous measurement, 141,

body pressure measurement without internal catheterization, 137, 3P

cannula for sheep rumen, 139, 6P

controlled movements of retinal image, 145, 100

drinking and feeding recording, 143, 31P fluid mixing in microcalorimeter, 152, 8P graphic determination of respiratory metabolism (man), 143, 3P

heart rate recording in conscious animals, 153, 37P

hypothalamic lesion making 137, 69 P intravascular infusion of conscious rats, 153, 162

isolated muscle, simultaneous determina tion of oxygen consumption and con traction response of, 140, 1P

laryngoscope for small animal use, 143, 32 P long continued infusions into unrestrained dog, 135, 21 P

manometer for continuous recording of low fluid pressures, 137, 5P

manometer requiring minimal movements of fluid 147, 1 P

micro pH electrode system for routine use 135, 1P

muscle isotonic and isometric contractions alternately recorded, 142, 42P

patient cycled respirator, 144, 7P pendulum auxotomic lever, 137, 35P

perfused electrode for nerve anodal block,

144 12P

perfused heart weighing, 136, 1P

pneumatic amplifier for recording jugular and carotid pulses in class experiments, 146, 18 P

portable for timed airway resistance, 145, 469

printing counter, high speed, 140, 31P rabbit colon perfusion 139, 3P

rapid arterial injection, 136, 431

recording compensatory rolling of the eyes, 140, 27 P

respiration counter, 144, 4P

stimulus coupler 152, 1P

sucrose gap, non medullated nerve actron potentials studied by, 135, 2P

thermocouple for skin temperature measurement 140 360

Apparatus, ultramicrotome, 137, 73P velodyne flowmeter, 146, 310

Aqueous humour, chemistry and rate of turnover of (bush baby), 145, 433

diamox effect on composition of and 24Na penetration into (mammal), 137, 279

ganglionectomy effect on flow rate of (rabbit), 152, 450

paracentesis effect on formation of (rabbit), 146, 252

pressure effect on rate of formation of (cat), 147, 29 P

sodium exchange between vitreous hu mour and (rabbit), 137, 112

Arctic peoples, excretory rhythms in indigenous 143, 69 P

Area centralis, ganglion cells receptive fields in retinal periphery and (cat), 153 589

Area postrema, emetic action of intra ventricular injected drugs affected by ablation of (cat), 143, 14 P

vomiting induced by nitrogen mustard and X irradiation and (T), 140 25 P

Arginine phosphate, giant axon meta bolism and (squid), 152, 551

giant axon Na efflux affected by injection of (squid) 147, 18P, 152, 564

Arginine, pituitary gland distribution of (rat), 149, 519

Arm blood flow, leg exercise effect on (man), 137 294

Arm capacity vessels, intrapulmonary pressure effect on (man), 137, 52 P

Arrhythmia, temperature effect on atrial (rabbit), 137, 86

Arterial air embolism, decompression under water and preventing of (rabbit) 151 32P

Arterial blood CO<sub>2</sub>, radioactive bicar bonate injection effect on specific activity of (dog), 147 471

Arterial blood, venous blood inhibits haemostatic capacity of (dog), 142, 244

Arterial impedance, differential mano meter in measurement of, 141, 17P

Arterial muscle, noradrenaline action affected by initial length of (sheep) 154, 15

Arterial occlusion, sweat gland responses affected by (man), 148 613

Arterial oxygen saturation, foetal and new born (sheep), 135, 623

Arterial preparation, simple form of 146

Arterial pressure, adaptation of response to localized cooling of (man), 136, 101 Arterial pressure, anticholinesterases action on (dog), 139, 256

bladder distension effect after buffer nerves section on (cat), 138, 311

bladder distension in spinal animal effect on (cat), 138, 302

brain stem local heating effect on (cat), 135, 56P

cerebral ventricular injection of histamine and ACh effect on (cat, dog), 140, 171

factors in general population affecting (T), 147, 41 P

foetal, new born and adult comparison of (rabbit), 139, 125

high oxygen pressure effect on (rat), 143, 154

liver blood flow affected by (rat, baboon), 136. 61

parotid secretion during Na-depletion affected by (sheep), 135, 235

Arterial pulse wave, reflections as cause of 'peaking of (dog), 145, 29 P

Arterial wall, dynamic elastic modulus of, 151, 26P

photo electric method for determining elasto viscous behaviour of, 141, 22 P

Arteries, blood flow changes effect on calibre of large (cat), 150, 23 P

external pressure effect on 'hardened' (man), 154, 17P

Artery, peripheral conducting mechanism in (cat), 149, 101

rapid contractile properties of (mammal) (T), 150, 13P

temperature effect on responses to con strictor drugs of (bullock), 142, 395

thickness of wall of (dog), 150, 10P Artificial insemination of cat (Film),

135 38P
Artificial respiration, sensory effects of

(man), 149, 494
Artificial vagina, improvement of (rab

bit), 143, 26 P
Ascites tumour cell, sodium transfer by

(mouse) 140, 48

Aspartic acid, spinal neurones activated by (cat), 150, 657

transamination during small intestine absorption of (dog), 135, 442

Asphyvia, cardiovascular responses in foetus and new born to (rabbit), 139, 124 foetus and new born resistance to (mon key), 152, 286

foetus and new born response to (mon key) 153 447

muscle stretch receptors response to antidromic stimulation (cat) 148, 261

Asphyxia, preganglionic sympathetic ac tivity affected by (cat), 150, 122 spindle motor fibre activity affected by

(rabbit), 149, 129

Athletes, cardiological observations at British Empire and Commonwealth Games 1958 of (T) 147, 57 P

Atria, ACh effect on conduction velocity and intracellular action potential of (rabbit), 140, 327

enzymes associated with ACh synthesis in (T), 147, 57 P

enzyme systems concerned with ACh synthesis in (rabbit) 149 462

excitatory effect of vagal stimulation on cooled (cat rabbit) 140, 45 P

intracellular potentials and contractions in (rabbit) 149 78

isolated preparation with sympathetic nerves of (T) 147, 57 P

K efflux from contracting (rabbit), 152 354

potassium loss from isolated (rabbit), 145 43P 221

simultaneous measurements of contractions and intracellular potentials during ACh action on (rabbit), 147, 325

vagus excitatory action in relation to adrenaline on (cat, rabbit) 142, 173

vagus inhibition and excitation of (rabbit), 138 172

Atrial arrhythmia, temperature effect on (rabbit), 137 86

Atrial cells, dimensions of (rabbit) 152,358 Atrial fibrillation, adrenaline and nor adrenaline effect on (dog) 137 141

Atrial pressures, anticholinesterases action on (dog) 139 256

respiration effect on left and right (dog), 145 482

Atrial receptors, physiological and histological study of (dog) 136 174 structure of (dog) 136 189

veratrum alkaloids action on (cat) 135,

Atrial wall, cholmesterase activity in (cat, dog) 137 421

Atrioventricular conduction, right atrial filling pressure effect on (rabbit), 149

Atropine, ACh action on sweat glands affected by (man) 148 602

cardiot ascular effects of anticholm esterases affected by (dog), 139 265 colon activity affected by (rabbit guinea pig) 152 409

forearm blood flow response to emotional stress affected by (man) 148 642

Atropine, hand and forearm blood flow during insulin hypoglycaemia affected by (man), 149, 486

nicotine action on colon affected by (rabbit), 152, 193

peristaltic reflex in ileum affected by (guinea pig) 136 257

pulmonary vascular resistance after anticholmesterases affected by (dog), 139, 283

pulmonary vascular response to carotid body stimulation affected by (dog) 137, 441

reticulum and rumen contractions affected by (sheep, goat), 151, 146

salivary gland oxygen consumption with nerve stimulation affected by (cat), 145 558

spinal neurones affected by (cat), 153, 25 sweating and heat vasodilatation affected by (man), 142, 225

Audio-cardiotachometer, transistorized (T) 142 47 P

Auditory cortex, seal (T), 150 13P Auditory ossicles, model of (Film), 153, 42P

Auditory stimulus, hypothalamic single neurones response to (rabbit) 148, 561

Auricle, carotid body chemoreceptors at mulation effect on rate of beat of (dog), 148 214

contraction and active membrane po tential relation in isolated (rabbit) 137, 80 P

DNP and chloride content of (rat) 152 31P

DNP and potassium exchanges in (rab bit), 150 6P

DNP effect on action potential duration and intracellular Na and K in (rat), 150 4P

nervous structures in (mammal) 142, 46P

potassium concentration effect on intra cellular potentials of (rabbit) 146, 411 potassium exchanges in (rabbit) 148, 14P

potassium movements in (rabbit) 146–392 separation of slowly exchanging fractions of potassium in (rabbit), 153, 50 P

vagus excitatory action on (rabbit) 137 46P

Auriculo-ventricular block adrenaline and noradrenaline action on (dog) 137 142

Autogenetic inhibition, soleus stretch reflex showing (cat) 147 527 spinal rigidity effect on (dog) 146, 601

- Autoradiograph, <sup>14</sup>C adenine nucleotide location in skeletal muscle by (frog), 145, 332, 150, 351
  - rapid quantitation of silver grains in, 152, 41P
- Autotransplanted adrenal gland, cor ticosteroid secretion by (sheep), 147, 33
- Avian lung, air pathway within (chicken), 138, 282
- Axillary arterio-venous oxygen difference, leg exercise effect on (man), 137, 299
- Axo-axonal synapse, impulse transmis sion across (squid), 143, 114
- Axon, calcium action on electrical properties of (squid), 137, 218
- Axon hillock, spike potentials in (cat), 139, 209
- Axon terminals, fine structure in neuro muscular junction of (frog), 150, 139
- Axoplasm, <sup>44</sup>Ca mobility in (squid), 138, 270
- Azide, after potentials in skeletal muscle fibre affected by (frog), 142, 84
  - phosphate compounds in giant axon affected by (squid), 152, 557
    - taema coli electrical and mechanical activity affected by (guinea pig), 136, 316
    - uterine segments active ion transport affected by (rabbit, cat), 154, 448
- Background discharge, spinal interneurones showing (cat), 147, 365
- Background, spectral sensitivities on white and black (Xenopus laevis), 153 52 P
- Bacterial exotoxins, thyroid gland activity in different species in response to (mammal), 144 229
- Ballistocardiogram, acceleration of ejected blood estimation from pulse and (man), 143 57 P
- Barbiturate buffer, thyroxine binding by serum proteins affected by (man duck), 153, 190
- Barbiturates, dorsal horn activity from cutaneous nerve stimulation affected by (cat), 137, 136
  - thyroxine binding by serum proteins affected by (man, duck), 154 66P
- Barium, crustacean muscle fibre mem brane properties affected by (crayfish), 142, 533
  - sodium deprived C nerve fibres affected by (rabbit), 145, 562
  - temperature reduction effect on response of ileum to (guinea pig), 137, 398

- Barometric pressure, altitude and, 135, 593
- Baroreceptors, pulmonary artery containing (dog), 150, 319
- Baroreceptor reflexes, new born showing (rabbit), 150, 201
- Basal ganglia, factor I concentration in (cattle), 144, 223
- Basal metabolic rate, polar environment effect on (man) (T), 138, 42P
- Basophils, blood histamine and (mammal), 136, 449
- Benzylamine oxidase, plasmas containing (mammal), 145, 387
- Beta-alanine, spinal neurones depression by (cat), 146, 185
- Beta-galactosidase, sex hormones effect in tissues on (mouse, rat), 139, 20P
- Beta-hydroxy-γ-aminobutyric acid, in hibitory action in nervous system of (dog), 145, 570
- Bicarbonate, CO<sub>2</sub> transport in blood after injection of radioactive (dog), 147, 469
  - carbonic anhydrase and renal reabsorption of (man, dog), 145, 277
  - ocular fluids concentration of (bush baby)
    145, 434
  - parotid gland secretion of (sheep), 144,
  - posture effect on urmary excretion of (man), 139, 340
  - recovery of uterine segments exposed to cold affected by (rabbit), 154, 436
- Bicarotid trunk, thermal polypnoea relation to blood temperature in (calf), 136, 414
- Big game, field research on (Film) (T), 143, 28 P
- Bile, metabolic inhibitors effect on excretion of water, bile pigment and bromsulphalein in (dog), 147, 63P
  - phlorrhizm exerction in (dog), 146, 565 secretion in conscious animal of (sheep), 154, 61 P
- Bile excretion, Benemid effect on (dog),
- 143, 72P
  Bile flow, back pressure effect on rate of (dog), 154, 60P
  - phlorrhizm effect on (dog), 146, 568
- Biliary obstruction, inhibition of some hepatic mechanisms by chronic (rat), 154, 59 P
- Binary inputs, device for finding code for least activity in outputs caused by (T), 148, 5P
- Binocular interaction, single neurones in stricte cortex showing (cat), 148, 582

Binocular stimulation, single unit activity in lateral geniculate body affected by (cat), 154, 211

Binocular vision (frog), 143, 20P

Biological tubes, theory of transfer of solutes in moving fluid in, 145, 14

Birth, oxygen consumption increase at (sheep), 143, 7P, 146 295

total body carbohydrate change at (sheep, monkey), 153, 541

Bladder, external urethral sphincter re flexes from (cat), 149, 654

somatic reflexes affected by distension of (cat), 146, 438

Bladder distension, blood pressure and renal oriculation affected by (cat), 138 300

splanchnic and buffer nerves in reflexes from (cat), 138 307

Bladder filling, external urethral sphincter reflex response to (cat) 139, 13P

Bladder outlet, method for studying mechanics of (man), (T) 146 24 P

Blister fluid, pain producing substance in (man), 135, 352

Bloch's law, short duration after images and (man) 147, 199

Blood, antihistamine extracts from buffy coat of (horse), 154 462

carbon monoxide dissociation curve of (man), 142, 63

pain producing substance in (man), 135, 355 potential difference between reticulo rumen contents and (sheep), 140, 98

amultaneous measurement of carduac outputs circulation times and circulating volumes of red cells and plasma in, 146, 17 P

Vaso active agents in stored (cat) 138, 220 Blood-bathed isolated organ, active sub stances in circulating blood tested by (mammal) 143 75 P

Blood-brain barrier (rabbit) 147 25P absence in special areas of brain of (cat), 152 20P

extracellular space of brain and (rabbit) 149 135

Renshaw cells and (cat) 141, 446

٢

Blood clotting factors, maternal and foetal comparison of (sheep), 150, 607

Blood coagulation, adrenaline action on (man) 135 371

companson of factors concerned in (man horse) 142 197

contact initiation of, 137, 95

Hageman factor in (man) 151 238

plasma kinin and (man) 144 1

saliva effect on time of (man) 136, 324

Blood flow, axial drift of erythrocytes in narrow tube (dog), 149, 593

hand blood vessels capacity affected by variations in (man), 135, 167

milk secretion by isolated perfused mam mary gland affected by rate of (goat), 154, 553

pattern in carotid and femoral arteries of (dog, rabbit), 147, 209

Blood fructose, foetal age relation to (sheep, monkey), 153, 533

Blood gas tensions, measurement of (T), 147, 41 P

Blood glucose, foetal and new born (sheep, monkey), 153, 532

mammary gland uptake of (goat), 153, 499

mixed enzyme oxygen acceptor reagent determination of, 137, 3P

nitrogen effect in new born on (rat), 153, 461

Blood glutathione, arteriovenous difference in oxidized and reduced forms of (rabbit) 136 32 P

Blood histamine, eosmophils and base phils and (mammal), 136, 449

Blood lactate, foetal anoxia effect on (sheep), 146, 523

hypoxia effect on new born (rat), 154, 160 resuscitation from CO poisoning by air, O<sub>2</sub> and CO<sub>2</sub> O<sub>2</sub> effect on (dog) 147, 286

Blood loss, nervous and humoral responses to acute (rat), 143 213

Blood oxygen saturation, foetal and new born (monkey), 152, 273

Blood pH, diffusion respiration effect on (dog), 150 80

high oxygen pressure effect on (rat), 143, 158 (cat), 152, 508

hypoxia effect on perfused lung (cat) 153, 413

method for continuous measurement of 141 19P

Blood phosphate, cortisol effect on (man), 148 227

Blood plasma adrenaline, intravenous adrenaline infusion effect on (cat) 150, 40

Blood platelets, ATP and 5 HT propor tionality in (man), 135, 63 P

adrenaline uptake and ATP content of (pig), 136, 30 P

contact clotting time and, 137 97

5 HT uptake by (man), 146, 472

5 HT uptake in cold by (man), 147, 153 5 HT and ATP in particles isolated from

(man) 149 55P

Blood pressure, bladder distension effect on (cat), 146, 451

carotid and vertebral arteries clamping effect on (sheep), 151, 39 P

carotid blood heating effect on (cat), 152, 88

diffusion respiration effect on (dog), 150,

foetal anoxia effect on (sheep), 146, 518 hand heating and cooling repeatedly effect on (man), 146, 154

kallıkrein action on (dog), 148 269

medulla local heating effect on (cat), 152, 94

ovytocin and vasopressin action during pregnancy on (rat) 149, 586

rumen distension effect on (sheep, calf), 148, 515

Blood sugar, anti insulin serum injection effect on (mammal), 153 131

foetal anoxia effect on (sheep), 146 521 isopropylnoradrenalme effect on (man) 151, 542

vasoconstrictor substance release determined by concentration of (rabbit), 149, 236

vital functions in new born dependence on (pig), 136 208

Blood sympathomimetic amines, ad renaline injection effect on concentration of (cat), 146 15 P

Blood transfusion, corticosteroid secretion of autotransplanted adrenal gland in sodium deficiency affected by (sheep), 147 43

Blood vasoconstrictor substances, fur ther observations on (man rabbit), 138, 402

Blood vessels, diphtheria toxin effect on electrolyte content of (guinea pig), 147 516

DMPP actions on (dog), 147 1

Blood viscosity, axial drift of erythrocytes in narrow tube relation to (dog), 149 593

Blood volatile fatty acids, mammary gland uptake of (goat) 153 499

Blood volume, cardiov ascular responses to carotid baroreceptor stimulation af fected by (dog) 143, 358

cold stress effect in Eskimos and white men on 140 347

growth effect on % body weight of (rat) 139, 64

Body chilling, cold vasodilator response affected by (man) 139, 497

Body composition, fasting and refeeding effect on (rat) 154, 235

Body fat, hypothalamic lesions in para biosis effect on (rat), 145, 347

Body heating, constructor and dilator nerves contribution to skin vasodilata tion during (man), 136, 489

heat elimination from normal and nerve blocked finger affected by (man), 138

446

Body irradiation, 15 MeV  $\lambda$  rays from linear accelerator for (T), 141 27 P

Body movement, method of recording whole (mouse) (T), 141, 27P

Body plethysmograph, problems in use of (man), 147, 50 P

Body size, metabolic rate in young affected by (pig), 154, 408

Body surface, activity of cold vasodilata tion phenomenon on various areas of (man), 151, 30P

Body surface area, lung diffusing capacity relation to (man), 146 574

Body temperature, activity and food m take effect on diurnal variations in (man) 138, 42 P

age effect on response to exercise in a hot environment of (man) 141 266

body fat effect on cold and warm water action on (man), 154 334

environmental heat stress effect on diurnal variation in (man), 137, 66 P foot vasomotor responses in paraplegia to

rise in (man) 136 547

heart rate prediction of (man), 135 51P hypoxia and environmental temperature effect in new born on oxygen consump tion and (cat) 149, 356

hypoxia effect in new born on (cat), 149,

panting response to external heat and (sheep) 146, 145

radioprotecting substances action on (mouse) 145 52P

spinal lesions affecting regulation of (man) 142 406

subcutaneous fat effect on response to body immersion in cold water of (man), 153, 168

temperature reduction effect on new born (pig), 147, 126

thermal balance and control of (man),

137 1 vasomotor control of forearm skin vessels in response to changes in (man) 139 457

ventilatory response in relation to other physiological variables to rise in (man) 140 55P

wet skin temperature relation to (man)
141, 160

Body water, measurement by tritium of total (mammal), 154, 169

Body weight, hypothalamic lesions in parablosis effect on (rat) 145 344 me abolic rate relation to (rat) 150, 694

Bone, growth hormone and insulin effect on emb-conic rudiments of (chick) 144,490 isotope sodium exchange in (rat) 139,474 plasma Na alteration effect on Na and K content of (rat) 147,115

sweet pea poisoning effect on strength of (rat) 139 17 P

theroxme and parathormone effect on calcium and sodium in (rat), 142 447

Bone grafts (dog) (T) 137 39P

Bone growth, quantitative effects of  $\beta$ armopropionitrile on (rat) 154. 46P

Bone marrow, method for studying rate of blood flow through (rabbit) 125, 39P

Bone marrow cells, vitamin B<sub>12</sub> folic acid and ascorbic acid content of (man) 145 35P

Bone mast cells, histamine and 5-HT in (ra\*) 141 593

Bone sodium, scute sodium depletion effect on (rat) 137 55P

edrenal-ctomy effect on metabolism of (rat) 142 438

Botnlinum toxin, DMPP and nicotine action on blood vessels affected by (dog) 147 4

post-contraction hyperaemia of muscle affected by (cat) 149 105

Ekelotal muscle affected by (cat) 151, 598 Bradykinin, actions of pure (mammal), 153 473

anti inflammatory agents action on bronchoconstructor action of (gumeapig) 149 54 P

b of ogical activity of pure (ox) 150 6P capillar: permeability affected by (gumeapig) 152 75

formation in skin of (man) 137 43P

hea vasodilatation of skin involving (man) 142 219

rm differentiation from (rat) 135 120 plasma kinin formed by plasmin com parison with (mammal) 140 289

plasmin action on plasma process producing (man) 135 7P

Varidilator action of (man) 154 16P

Brain, accessory sources of blood supply to (ca) 148 93

an ithrombin present in (man) 135-12 arterial anacromoses in (dog) 154-10 \$\beta\$ hydroxy ammobutyric and present in (ra) 145-571

Brain, blood supply to (cat) (T) 142 48P bromophenol blue penetration from per fused cerebral ventricles into (cat) 150 451

caroud and vertebral blood distribution in (cat) 140 236

<sup>11</sup>C-glucose effect on <sup>11</sup>CO<sub>2</sub> in blood entering and leaving (dog monkey), 147 492

connexions of mantle receptor units with respiratory and other neurones in (octopus) 153, 578

corticofugal discharges evoked by surfaceanodal and -cathodal stimulation of (baboon) 154 70P

costocervical and thyrocervical contributions to blood supply of (cat) 141, 12P

distribution of carotid blood in (cat) 137, 60P

extracellular space of (rabbit) 149 138 Factor I distribution in (cattle) 144 220 Factor I purification from (ox) 151, 31

free and occluded Factor I m (rat) 153, 423

histamine formation and catabolism in (mammal) 149 34 (cat) 152, 299

histamine formation in citro by (cat) 143

histamine uptake from ventricles by (cat) 150-59

identification of one active component in Factor I from (beef) 146, 358

mhibitory factor and / ammobutyric acid m (various) 139 79

msulm and glucose effects on heat production and blood flow in (monkey) 154 26

msulm and pentobarbitone actions on blood flow and heat production m (monkey) 149 38P

method for recording electrical activity in conscious monkey of (T) 152 49P

perfusion of ventricular system of (ca\*)
135 4P

temperature change effect on 5-HT con tent of (rat) 151 411

Brain blood supply, method for repeatable acute occlusion in conscious animal of (dog) 142 24 P

Brain extracts, ether soluble active lipid m (rabbit) 154 40P

Brain homogenate, acetylcholme and cholme acetylase distribution in fractions of (mammal) 142 187

Brain reticular formation, adrenaline and ACh effect on activity of single neurones in (cat), 140 11 P

Brain stem, auditory responses from (pigeon), 151, 21 P

cardiovascular responses to stimulation of (cat, dog), 141, 500

drugs action on conduction within extra lemniscal system in (cat), 145, 41P

oblique stereotaxic co ordinates of retro tentorial part of (cat), 142, 15P

Brain surface, instrument for charting, 153, 12P

Brain venous blood, simultaneous sam pling in conscious animals of arterial blood and (rabbit), 136, 21 P

Brain ventricles, perfusion of (cat), 140, 5P

Breath-holding, heart rate affected by (man), 144, 545

pulmonary diffusing capacity measure ments by other methods compared with (man), 141 408

Breathing capacity, barometric pressure changes effect on maximum (man), 137, 85 P

factors affecting open circuit determina tion of maximum (man), 135, 98

Bretylium toxylate, vascular reflexes in limbs affected by (man), 149, 74P

Bright flashes, occipital potentials evoked by (man), 152 108

Bromophenol blue, scratching movements elicited by application to upper cervical cord of (cat) 151, 503

Bromsulphthalein, plasma, liver and bile dye content relationship after single injection of (dog), 138, 38 P

removal from plasma of (man), 151, 37P

Bronchial circulation, pulmonary vas cular resistance affected by (dog), 148 212

pulmonary vascular resistance in isolated perfused lung lobes affected by (dog), 153, 14P

Bronchial tone, method for recording changes in, 141 20 P

Bronchial tree, gas flow patterns in upper (dog, man), 146, 50 P

hollow cast of upper (T), 146 30P

Bronchi, nicotino action on (mammal), 144, 207

Bronchoconstriction, histamine induced (man) (T), 154, 6P

lung stress relaxation affected by (rabbit), 146, 90

Bruch's membrane, R membrane in rotina and (cat), 149, 555

Buffy coat, antihistamine activity of extracts of (guinea pig) 154 464

Bundle of His, conduction velocity in (mammal), 147, 315

electrical activity of (dog, cat), 142, 127

Caecal sac, pharmacologically active sub stance in male (moth) (T), 153, 12P

Caeruloplasmin, chymotryptic digestion of (T), 140, 31 P

5 HT oxidation by (pig), 154, 599

Caesium, potassium replacement in skeletal muscle by (frog), 138, 140

Caffeine, skeletal muscle distribution of <sup>14</sup>C adenine nucleotide after contracture induced by (frog), 150, 363

Caffeine contracture, calcium effect on (frog), 151, 531

Calcarine cortex, visual field represents tion on (baboon, monkey), 148 33P

Calcium, action potential in giant axon affected by (cockroach), 151, 83

anaphylactic reaction affected by pH and (guinea pig), 140, 272

axon electrical properties affected by (squid), 137, 218

behaviour affected by supplementing raw meat diet with (cat, lion) (Film), 146, 30 P

cardiac muscle contraction affected by sodium and (frog), 143, 488

conditioned responses affected by intra ventricular injection of (cat), 146, 558

crustacean muscle fibre membrane pro perties affected by (crayfish), 142, 520

DDT action on giant axon potentials affected by (cockroach), 151, 620

DDT action on negative after potential of giant axon affected by (cockroach), 152 134

electroplate membrane potentials affected by (ray), 142, 267

erythrocyte permeability affected by (man), 149, 569

glycerol extracted muscle fibres affected by (rabbit), 135, 38

hydrazine action on cell membrane ex citability in Na free media affected by (frog., 150, 445

hydrazinium action on neuromuscular transmission in Na free solution affected by (frog), 147, 248

magnesium antagonism at neuromuscular junction to (frog), 138 435

medullated nerve fibre affected by (freg), 137, 245, 142, 360

muscle spindle response to cooling affected by (cnt), 153, 227

my ocardial sodium and potassium con tents affected by (rat), 143 14P

Calcium, nervous effects of intra ventricular injection of salts of (cat), 139 408

neuromuscular transmission affected by (stick insect), 138, 129

perfused heart weight affected by (rab bit), 148 396

plain muscle activity affected by changes in (guinea pig), 141, 480

potassium induced contracture of skeletal muscle affected by (frog), 151, 518

raw heart diet deficiency in (cat), 146, 36P resting potential of sartorius fibres and (frog) 153, 25P

skeletal muscle contraction affected by (rat) 151, 566

slow muscle fibres responses affected by (frog), 135, 515

sodium depletion effect on bone (rat), 139, 480

spermatozoa motility affected by (dog), 142 494

sympathetic nerve action on isolated per fused frog heart affected by (T) 138, 9P

ventricular fibrillation affected by po tassium and (rabbit), 141, 368

verstrum alkaloids action on visceral stretch receptors affected by (cat), 135 499

"Calcium, heart contraction and rate of action of (frog), 138 506

movements in giant axons of (squid) 138 253

Calcium carbonate, gostrogenic and sodine sparing effects of (rat, cat) (T) 151 21 P

Calcium excretion, prolonged intravenous infusions of magnesium lactate effect on (man) 143 300

Calcium lack, resting potential of plain muscle affected by (vertebrate) 140 161 Calculating device, simple (T) 140 3P

Calf blood vessels, distensibility of (man), 140 122

Calf, distensibility of capacity vessels of (man) 135 41 P

Calf muscles, walking and running effect on blood flow requirements of (man), 140 41 P

Calorimeter, direct gradient laver (T)
139 8P

micro-reaction (T) 142 2P

ì

Capacitance transducer heads, method of applying temperature compensation to 153 38P

Capacity blood vessels, drugs action on hand and forearm (man) 140 115

vaso active substances action in hand and forearm on (man) 137 16 P

Capillary permeability, abdominal radia tion effect on intestinal (rat), 148, 42P brady kinin action on (mammal), 153, 477 brady kinin and other substances effect on (guinea pig), 152, 75

histamine and 5 HT concerned in (rat), 140, 105

serum kallikrein and bradvkinin effect on (T), 152, 10 P

serum kallikrein, bradykinin and hist amine action on (guinea pig), 149, 80P species differences in susceptibility to factors causing (mammal), 137, 51

Capillary micro-electrode, paraffin section method for marking site of recording with (T), 143, 38 P

Carbachol, motor end plate desensitiza tion' by (frog), 138, 71

peristaltic reflex in ileum affected by (guinea pig), 136, 250

potassium and chloride flux in de polarized amooth muscle affected by (guinea pig), 148 68 P

potassium fluxes of auricle affected by (rabbit), 146, 401

temperature reduction effect on response of ileum to (guinea pig), 137, 398

tubocurarine quantitative antagonism at motor end plate to (frog) 152, 312

Carbogen, carbon monoxide action on visual thresholds affected by (man), 146, 585

Carbohydrate diet, 24 hour oxygen con sumption and CO, exerction during (man) 150 11P

<sup>14</sup>Carbon, counting on paper disks of (T), 146, 30 P

Carbon diovide, blood flow in hand affected by saturated solution of (man), 143 67 P

carboxybaemoglobin dissociation curve affected by (man), 142 68

circulatory and respiratory responses to increasing concentrations of (dog), 149, 75P

forearm vascular resistance affected by changes in partial pressure of (rat) 143, 226

muscle internal pH affected by (crab) 142, 38

noradrenalme effect on respiratory re sponse to (man), 139 12 P

oedema fluid formation in perfused lung affected by (rabbit) 142 296

radioactive bicarbonate injection effect on transport in blood of (dog) 147, 469

respiratory response to noradrenaline affected by (man) 137, 365

- Carbon dioxide, resuscitation from CO poisoning by O<sub>2</sub> affected by (dog), 147, 279
- Carbon monoxide, breath holding' comparison with other methods of measure ment of diffusing capacity of (man), 141, 408
  - poisoning, cytochrome C action on tissue oxygen consumption after (rat), 152, 482
  - haemoglobin partition equilibrium con stant between nitric oxide and (sheep), 136, 519
  - resuscitation from poisoning by (dog), 147, 274
  - visual thresholds affected by (man), 146, 583
- Carbonic anhydrase, foetal tissues con taining (pig), 151, 487
  - renal reabsorption of bicarbonate and (man, dog), 145, 277
- Carboxyhaemoglobin, lethal concentra tion of (dog), 147, 278
  - pH and p chloromercuribenzoate effect on formation of 137, 26P
- Carboxyhaemoglobin dissociation curve, oxyhaemoglobin dissociation curve comparison with (man), 142 71
- Carboxylic acids, 1rin distinction from (mammal), 146, 264
- Cardiac arrest, lactic acid production in (rabbit) 135, 38 P
- Cardiac carbohydrate, foetal age relation to (sheep monkey) 153 536
- Cardiac ganglion cells, diverse forms of activity in (crab, lobster) 138, 341
- Cardiac glycosides, sodium and po tassium movements in erythrocytes affected by (man), 136 148
- Cardiac muscle, ACh effect on conduction velocity and contraction in atria of (rabbit), 140, 331
  - calcium and sodium ion antagonism on (frog), 143, 486
  - oxidation reduction changes of cyto chromes following stimulation of (Am phibia) 147 14
  - oxygen consumption relation to con traction of (cat), 151, 186
  - plasma Na concentration effect on Na and K content of (rat) 140 190
- Cardiac nerves, course of efferent (sheep)
  139 417
- Cardiac output, anoxia in new born effect on (sheep), 146, 328
  - birth and anoxia effect on (lamb), 144, 16 P carotid artery pressure reduction effect on (cat), 148, 59 P

- Cardiac output, carotid baroreceptors stimulation effect on (dog), 143, 361
  - changes in exercise by Douglas and Haldane method of (man), 138 5P clinical assessment by dye dilution tech
  - nique of (horse) (T), 151, 21 P
  - dye injection method measurement of (cattle), 149, 16P
  - Fick method and radioactive indicator dilution method comparison in measure ment of (cat) 136, 24 P
  - perfused preparation and (cat), 138, 207 positive radial acceleration effect on (man), 147, 49 P
- Cardiac pace-maker potentials, description based on Hodgkin-Huxley equations of, 154, 64 P
- Cardiac vagal efferents, types of (cat), 149, 47P
- Cardioacceleration, central nervous con trol of sympathetic (cat), 151, 225
- Cardio-accelerator nerves, course of (sheep), 139, 422
- Cardio-inhibitor nerves, course in vagus of (sheep), 139, 419
- Cardiovascular reflexes, new born show mg (monkey), 152 282
- Cardiovascular response, brain stem stimulation invoking (cat, dog), 141,500
- Cardiovascular system, ovvtocin action on (cat), 136, 26P
- Carotid artery, blood flow pattern in (dog, rabbit) 147 209
- brain regions supplied by (cat), 140, 236 Carotid arteries, effects of occlusion of vertebral and (sheep, goat), 138, 20P
- Carotid artery compression, limb pen pheral resistance affected by (T), 137, 54 P
- limb vascular resistance affected by (man), 139, 377
- Carotid arteries occlusion, flow in vense cavae affected by (dog) 142, 374
  - pulmonary arternal pressure affected by (cat) 137 448
  - renal response to (dog), 141, 35P
- Carotid blood, blood pressure fall produced by direct heating of (cat), (T) 142, 48 P
- Carotid blood heating, cardiov ascular and respiratory responses to (cat) 152 87
- Carotid body chemoreceptors, cardiac output affected by stimulation of (dog) 147, 23 P
  - heart rate affected by hypoxia action on (dog) 145 440
  - heart rate affected by stimulation of (dog), 141 32P, 144, 148

Carotid body chemorecoptors, pulmonary vascular resistance affected by stimu lation of (dog), 137, 28P, 436

pulmonary vascular resistance in 'vaso sensory controlled perfused living animal' affected by stimulation of (dog), 148, 208

Carotid body, reflex changes in heart rate with perfused preparation of (T), 142,7P

Carotid sinus, adrenaline and norad arenaline effect on pulmonary haemo dynamics mediation by (dog), 145, 116 baroreceptor impulse activity from to pical application of drugs to wall of

empty (cat), 142 59 P

Carotid sinus baroreceptors, pulmonary arterial pressure affected by stumulation of (cat) 137 447

pulmonar, arterial pressure and blood flow affected reflexly from (dog), 143 343

pulmonary vascular bed in vasosensory controlled perfused living animal af fected by stimulation of (dog) 148 220

pulmonary vascular resistance affected by stimulation of (dog) 137 56P 427

Carotid sinus pressure, new born re sponse to change in (rabbit) 150 205

Carotid sinus reflex, limb vessels response in (man) 139 377

Carotid stretch receptors, stimulation in man of, 137, 45P

Carpopodite, innervation of muscles moving (crustacea) 143, 404

Cat, heart lung kidney preparations from, 145 17P

surface area of 138 43P

Cat brain, accessory sources of blood supply to (cat) 148, 93

carotid and vertebral blood distribution in 140 236

Catch mechanism, evidence for (Mytilus edulus) 152 233

Catecholamines, effects of peripheral tissue (rabbit) 140 7P

reserpine effect on sympathetic system 138 14P

reserpine and noradrenaline effect on actions of (mammal) 144 320

Catheter, aid to alignment for insertion into abdominal vessels of (T) 153 12P

Cations, erythrocytes exchange of (man)
145 641

Cell membrane, concept of 140 58P hydrazine effect in Na free media on excitability of (frog) 150 440

Cell volume sodium transfer in ascites tumour cell affected by (mouse) 140 62

'Cellosolve', histological technique and uses of (T), 143, 2P

Cellulose, mammalian (T), 142, 41P

sumple method for following enzymic hydrolysis of insoluble (T), 139, 8P

Central inhibition, latency of, 154, 29P Central nervous system, ammoacids related to tyrosme action after reserpine

lated to tyrosine action after reserpine on (mouse) 151 272

massive carriage for micro electrode experiments on (T) 138, 8P

sympathetic cardioacceleration control by (cat) 151, 225

synaptic vesicles isolated from (guinea pig) 153 35P

Central vasomotor mechanism, simple method of studying (cat) 136, 2P

Cerebellar electrical activity, micro electrode studies of (frog) 144, 23

Cerebellar excitatory factor, charac terization and distribution in CNS of, 148 20P

Cerebellum, α motoneurones affected by anterior lobe of (cat) 149 626

differentiation by microstimulation of alternative fibre systems converging on single Purkinje cells in (frog.) (T) 138, 35P

factor I distribution in (cattle), 144, 223 histological comparison of frog and cat (T), 138 8P

pathways converging on the Purkinje cells in (frog) 146 459

Purkinje cells affected by surface stimula tion of (cat) 135, 73

static and dynamic stretch reflexes af fected by anterior lobe of (T) 154 72P

Gerebral arteries, anastomoses between (dog), 154 5

Cerebral cortex, arterial anastomoses in (dog) 154 5

axon terminals by light and electron microscopy in (lizard) 152 3P

carotid and vertebral arteries contribution to blood supply of (sheep calf) 151 9P

characteristics of points of cardiovascular and respiratory representation in (sheep) 144 17 P

convergence within pathways to somatic sensory (cat) 144 257

cutaneous afferent nerve stimulation effect on electrical activity of (cat) 142,

electron microscopy of dendrites and axons of 145 25 P

end feet in (cat) 137 10P

evoked responses in (alligator) (T) 148, 37 P

- Carbon dioxide, resuscitation from CO poisoning by O<sub>2</sub> affected by (dog), 147, 279
- Carbon monoxide, 'breath holding' com parison with other methods of measure ment of diffusing capacity of (man), 141, 408
  - poisoning, cytochrome C action on tissue oxygen consumption after (rat), 152, 482
  - haemoglobin partition equilibrium con stant between nitric oxide and (sheep), 136, 519

end feet m (eat) 137 10P

evoked responses in (alligator) (T) 148 37P

- Cerebral cortex, Factor I and γ amino butyric acid effect on directly evoked potentials in (cat), 150, 309
  - Factor I distribution in (cattle), 144, 223 y aminobutyric acid effect on activity of (cat), 138, 365
  - insulin and glucose effects on heat production and blood flow in (monkey), 154.30
  - potassium salts and resting potentials in slices of (mammal), 152, 59 P
  - pseudocholmesterase and potentials in (cat), 136, 20
  - resting membrane potentials in isolated (cat, guinea pig), 139, 183
  - single unit activity in unrestrained animal of (cat), 147, 226
  - temperature change effect on (rat), 154, 33P
  - tubocurarine effect under pentobarbitone and chloralose on (cat), 138, 184 wireless telestimulation of (cat), 150, 1P
- Gerebral cortical stimulation, analysis of cortically controlled movement by automatically controlled (cat, monkey), 137, 37 P
  - response in opposite hemisphere to (cat), 137 40P
- Cerebral ganglia, efferent signals from (Mya), 143 558
- Gerebral hemispheres, pharmacologically active substance in extracts of (T), 151, 3P
- Cerebral ventricles, abolition and initia tion of tremor by drugs injected into (cat), 154, 34 P
  - anaesthesia and sleep like conditions produced by injections into (cat) 140, 20 P
  - conditioned responses affected by cations injected into (cat), 146, 550
  - drugs mjection into (sheep), 149, 200 effect of Ca and K salts injection into (cat), 139, 408
  - histamine absorption from (cat), 150, 50 histamine and ACh injection into (cat, dog), 140, 169
  - passage of circulating adrenaline into (cat) 150, 34
  - site of action of tubocurarine when ap plied via (cat), 149 58
- Cerebrospinal fluid, acetylcholine action on frog rectus sensitization by (man) 137, 460
  - adrenaline passage into (cat), 150, 34
  - cardiac input changes effect on pressure of (cat), 148 16P
  - diamox effect on composition of and <sup>24</sup>Na ponetration into (mammal), 137, 279

- Gerebrospinal fluid, tilting head up effect on pressure in cisterna magna of (dog), 145, 9 P
- Cerebrospinal fluid pressure, factors in perfused preparation affecting (cat), 138, 208
  - head down tilting effect on (dog), 141, 3P passive movement of head effect on (dog), 137, 19P
  - passive movement of head effect on (dog), 138, 24P
- Cervical cord, scratching elicited by tube curarine on (cat), 153, 36
- Cervical sympathetic, ACh effect on preganglionic trunk of (rabbit), 153, 250
  - intraocular pressure affected by pre and post-ganglionic section of (cat, rabbit), 152, 437
- Cervical sympathetic nerve, recurrent cardio accelerator fibres in right (sheep), 135, 58
- Cervical vagus nerve, size frequency distribution of myelinated fibres in (cat), 135, 191
- Cervix, trypsin effect on extensibility of, 148, 48 P
- C fibres, after potentials in sympathetic (rabbit), 144, 442
- <sup>14</sup>C-JII, binding by isolated tissue of (rabbit), 152, 50 P
- Chemoreceptor impulse activity, pH and pCO<sub>2</sub> effect on (cat), 154, 7P
- Chemoreceptive impulses, possible me chanism for initiation of (cat, rabbit), 149, 26P
- Chemoreceptors, cardiovascular responses to systematic hypoxia and role of (dog), 154, 6 P
- Chest, pressure volume relationships before and after death in (rabbit), 149, 178
- Chest volume, air flow and resistive pressure relationship to (man), 145, 462
- Chick muscle fibres, multiple innervation of, 148, 50 P
- Chirping, simultaneous recording of activity and rate of (chick), 152, 11P
- Chloralose, brain electrical activity af fected by tubocurarine and (cat), 138, 178
- Chloride, amons effect on output from skeletal muscle of tracer (frog), 141, 351
  - electroplate membrane potentials affected by (ray), 142, 261
  - end plate current equilibrium potential affected by (frog), 154 61
  - giant axon permeability to radioactive (squid), 154, 184

- Chloride, kidney slice uptake of water in anoxia affected by (rat), 136, 587
  - membrane potential of single muscle fibres affected by (frog), 148, 127
  - membrane potential of single muscle fibres affected by sudden changes in concentration of (frog), 153, 372
  - muscle membrane permeability change during mhibitory transmitter action affected by (crayfish), 144, 181
  - parotid gland secretion and (sheep), 144,
  - rest and activity effect on fluxes of (Chara globularis), 144, 514
  - reticulo rumen sac and absorption of (sheep), 140, 94, 146, 241
  - seminal vesicle mucosa incubation effect on concentration of (guinea pig), 135, 215
  - ventricular fibrillation affected by lack of (rabbit), 141, 370
  - Chloride conductance, skeletal muscle (frog), 151, 89
  - Chlorothiazide, action of a dibenamine like compound affected by (rat), 147, 59 P
  - pempidine action affected by (man), 149,
  - Chlorpromazine, forearm blood vessels response to intra arterial adrenalme affected by (man), 148, 547
    - habituation to hand heating and cooling affected by (man) 146, 158
    - mhibition of reactions to unfamiliar sur roundings by (rat), 147 20 P
  - Cholesterol, hexoestrol inhibition of ad renal cortex and (rat), 138, 461
  - thyroxine effect on synthesis by cell free fractions of liver of (rat), 154, 145
  - Choline, gastric contractions affected by (cat), 148, 441
    - renal cortex penetration by (rat) 143 277
    - sodium efflux from muscle with sodium replacement by (frog), 147, 593
    - tarnia coli affected by replacement of sodium with (guinea pig) 136, 577
  - Choline acetylase, acetylcholine distribution in fractions of brain homogenate and (mammal), 142 187
    - gill plates containing (Mytilus edulis), 145 33P
  - miracellular binding in ventral spinal roots of (mammal) 148 69 P
  - Choline acetylase inhibitor, site of action of (guinea pig) 138 13P
  - Cholinergic vasodilators, emotional stress excitation of (man), 148 631

- Cholinesterase, adrenal gland distribution of (mammal), 141, 97
  - atrial wall containing (cat, dog), 137, 421 hypothalamic distribution of (dog), 139, 137
  - location in extraocular muscles of (man), 153, 523
  - location in myoneural junction of (guinea pig), 152, 5P
  - selective inhibitory action on brain (cat), 136. 24
- Choline esters, marine gastropods and other invertebrates containing physio logically active, 139, 434
- Chordolingual nerve, plasma kının output of tongue affected by stimulation of (cat) 144, 535
- Chorioallantoic membrane, sodium transport by (pig), 151, 458
- Chorionic gonadotrophin, acid gastric secretion inhibition by (rat), 147, 585
  - disappearance from serum after intra venous injection of (rabbit), 151, 403
- Chranchid squid, buoyancy of (T), 145, 56 P Christmas disease, contact clotting time in (man), 137, 104
- Chromaffin granules, adrenalme and noradrenalme distribution in (chick), 137, 318
  - differential sedimentation of adrenaline and noradrenaline from suspensions of (bovine), 136, 8P
  - mitochondrial enzymes separation from (ox) 139 316
- Chromaffin reaction, nature of, 141, 193 Chromaffin tissue, pilo-erection by nico time and (cat), 145, 19*P*
- Chromatolysed motoneurones, intra cellular recording from (cat), 143, 11
- <sup>51</sup>Chromium, erythrocyte life span studied by (rat) 146, 228
- Chylomicron fat, removal from circulation of <sup>14</sup>C-labelled (rat), 138, 326
  - tissue distribution and oxidation of intra venously injected <sup>14</sup>C-labelled (rat), 140, 262
- Chyle, removal from circulation of <sup>14</sup>C labelled (rat) 138 328
- Ciliary activity, tubocurarine and ACh action on (frog, rabbit) 139, 157
- Ciliary movement, tubocurarine and ACh action on (frog), 141 520
- Ciliary processes, ganglionectomy effect on blood flow to (rabbit), 152 452
- Circulation, γ ammobutyric acid effects on (mammal) 146 70 isopropylnoradrenaline effect on (man).

151 540

- Circulation model, variable stroke volume (T), 150, 15P
- Circulation time, plasma and corpuscles difference in (cat), 135, 8P
  - plasma and erythrocytes difference in (cat), 136, 218
- Cisterna magna, histamine and ACh re covery after cerebral ventricular in jection from (cat dog) 140, 173
- Citrate excretion, acid base balance effect on (rat), 149, 413
- Climbing, efficiency relation to rate of (man) 141, 249
  - individual variations in energy expenditure of (man) 143, 575
- Cobra venom, pharmacologically active substances formed in egg yolk by, 136, 131
- Cocaine, antagonism to the effect of TM10 on sympathin liberation by (cat), 146, 39 P
  - cerebellar wave activity affected by (frog) 144, 29
  - DMPP and nicotine action on blood vessels affected by (dog), 147, 3
  - skeletal muscle affected by (frog) 148, 61 P virus infected sympathetic ganglia af fected by (rat) 146, 429
- Cochlea, effect of intense sound on (guinea pig) (T), 150, 3P
- Coelenterates, collagen in (T) 150, 15P histamine etc in nematocyst possessing, 142 56P
- Co-enzyme A, ACh synthesis in atria and (rabbit), 149 464
- Cold, adaptation to localized application of (man), 136 98
  - adrenal weight and ascorbic acid content in wild and domesticated Norway rats affected by long term exposure to (rat) 135, 384
  - C afferent fibre receptors response to (cat), 153 115
  - cutaneous mechanoreceptor response to (cat), 152 350
  - muscle spindle affected by (cat), 153, 218 new born metabolic response to (rat), 154, 154
  - non my elinated fibres from skin signalling of (cat), 150 266
  - reactive and exercise hyperaemia in fore arm affected by (man) 145, 241
  - spinal lesions effect on response to (man), 142 410
  - subcutaneous fat effect on response to exposure to (man) 153, 166
  - thalamic units responding to stimulation of tongue by (cat) 147, 12P

- Cold, thyroid gland response to (guinea pig), 151, 43
- Cold acclimatization, clothing records evidence of (man), 148, 79 P
- Cold injury (man), 139, 14P
- Cold receptors, stimulation in tongue of (cat), 148 180
- Cold stress, blood volumes of Eskimos and white men affected by, 140, 347
- Cold vasodilator response, body chilling effect on (man), 139, 497
  - limb position effect on finger (man), 135, 93
- Collagen, hormones action on uterme (rat), 152, 419
  - light scattering in cornea by fibrils of, 136, 272
  - oestrous cycle and hormones effect on uterine (rat), 135 270
  - pH measurement of (ox), 135, 26P pregnancy effect on uterine cervix (rat), 148, 529
  - protein free diet effect on body (mouse), 144, 307
- Colon, cooling effect on response to nerve and to drug stimulation of (rabbit) 135, 45 P
  - 135, 45 P
    DOCA effect on sodium and potassium
  - transfers in (dog), 151, 352 nicotine inhibition of (rabbit), 144, 5P 152, 191
  - perfusion in vitro through inferior mesen teric artery of (rabbit) 139, 3P
  - peristalsis and 5 HT release affected by nerve stimulation of (rabbit, guinea pig) 152, 405
- Colostrum, acceleration of globulins ab sorption in new born by factors in (calf) 147, 22 P
  - plasma volume and composition of new born affected by (pig) 145, 547
  - proteinuria following intake of (calf) 148,
- Colour, retinal receptive fields for (spider monkey), 154, 574
- Colour television, versatile microscope for visualizing histological material with (T), 151, 21 P
- Compensatory rolling of the eyes, recording of 140, 27P
- Conditioned reflexes, method of studying motor (T) 147, 3P
- Conditioned responses, intraventricular injection of K and Ca effect on (cat) 146 553
- Conditioning tetanus, synaptic potentia tion and depression in spinal neurones after (cat) 150, 383

- Conduction velocity, ACh action on vagal C fibres (rabbit) 152 151
  - ACh effect on atrial (rabbit), 140 328
  - ACh effect on taems coli (guinea pig), 143, 172
  - contraction frequency of atma effect on (rabbit), 149, 82
  - vagal afferent fibres variation in (cat), 142 119
- Cone, rod excitation effect on response of (cat), 137 338
- Cone pigments, trans scleral illumination evidence for (man), 147, 204
- Congenital porphyria, hving bovine cases of (T) 135 39 P
- Consciousness, e e g in assessment of state of (dog) 151, 6P
- Contact clotting time, factors concerned m 137, 95
- Contact factor, nature of (man) 144 4 Contraction bands, local activation of muscle fibre and (frog) 144 433
- Contracture, nitrate production of local (frog) 146 126
- Convergence, accommodation in eve relation to (man) 137 488
  - spinal interneurones showing (cat) 147 376
- Convulsants, spinal inhibition affected by (cat) 145 187
- Copper, placental enzymes inhibition by (man) 148 284
- Cornea, diffusion of different sized mole cules in 136 269
- structure and transparency of 136 263 Corneal nerve fibres, tissue osmotic
- pressure reduction effect on (rabbit)
  153 5P
- Coronary chemoreflexes, amidine de rivatives producing (T), 148, 52P
- Coronary flow, corticosteroids effect on (rat gumea pig) 139 325
- weight changes in perfused heart and (rabbit) 148, 404
- Coronary occlusion, myocardial injury and recovery times at different tem peratures after (dog) 145 56P
- Corpora pedunculata, visual stimulation effect on nervous activity in (locust) 146 509
- Corpus luteum, hormonal control of preg nancy by placenta and (rabbit) 151 583
- Correlation, some tricks with (T) 153
- Cortical neurones, smultaneous recording from several individual (T) 148 82P surface area of (cat) 137 29P

- Cortical responses, facilitation by competing stimuli of (rat), 148 24P interaction of evoked (cat) 140 17P
- Cortical units, skin touch receptors stimu lation and action potentials of (T), 135, 5P
- Corticosteroids, heart and its response to adrenaline affected by (rat guinea pig) 139, 323
  - renal elimination of (T), 147 38P
- Corticosterone, factors affecting content in adrenal gland of (rat) 139 298
  - oestrogens effect on maximal secretion rate of (rat) 139 308
  - regenerating adrenal cortex secretion of (rat) 146 168
- Corticotrophin, adrenal cortex functional changes induced by (rat) 138 450
  - hvdrocortisone effect after adrenalectoms on blood and pituitary gland (rat) 150, 683
  - stress effect on release from pituitary of (rat) 146 105
- Cortisol, phosphate uptake by muscle affected by (man), 148 227
- Cortisone, blood eosinophils and histamine affected by (guinea pig man) 136 457
  - blood eosinophils and histamine after adrenalectomy affected by (dog) 136 453
  - bone Na and K after adrenalectomy affected by (rat) 147, 120
  - independence of hyperglycaemic and introgen catabolic effects of (rabbit, rat) 148, 19 P
  - theroid response to hypothalamic stimu lation affected by (rabbit) 143 262
- Costocervical arteries, brain supplied by (cat) 148 101
- Cotton dust, pharmacology and physic logical effects of (T) 147 41P
- Cranial window, pressurized (T) 140 31 P Crayfish nerve cord, intracellular re cording from synaptic elements in (T), 137 11 P
- Cravfish synapse, electrical properties of (T) 136 18P
- Creatine phosphate, C nerve stimulation effect on (rabbit) 148 355
- Crossed extensor reflexes, bladder dis tension effect on (cat) 146 448
  - tension-extension relation in soleus stretch reflex affected by (cat), 147 556
- Crossed stretch reflexes, muscle tension effect on (cat) 145 193
- Crustacea, excitation of contraction in, 142 21P
  - inhibition of contraction in 142 22P

- Grustacean muscle, Ca, Sr and Ba production of regenerative responses in (crayfish), 140, 59 P
  - excitation and inhibition by amino acids of (crayfish), 148, 39
  - inhibitory nerves to, 143, 426
  - membrane permeability change during inhibitory transmitter action in (cray fish), 144, 176
  - membrane potential and contraction coupling in, 143, 441
  - variation in innervation of, 143 403
- Crustacean muscle fibres, ionic require ments for production of action po tentials in (crayfish), 142, 516
- Cryoscopic method, intracellular concentration determination by (rat, guineapig), 143, 236
- Cubital vein, source of blood withdrawn from deep branches of (man), 142 323
- Guneate nucleus, cortical stimulation effect on transmission through (rat), 142 2P
- Curare, action in cat of (T), 146, 9*P* intrafusal junctions affected by (cat), 150, 179
- Curarized muscle, end plate potentials on stimulation of (rat), 135, 524
- Cutaneous afferent fibres, pain producing chemicals effect on activity of (cat), 145, 28 P
- Cutaneous afferent nerve, spinal cord potentials generated by impulses in (frog), 152, 14 P
- Cutaneous afferent pathways, splanchme pathways convergence with (cat), 140, 470
- Cutaneous blood vessels, infra red radia tion effect on (man), 146, 488
- Cutaneous mechanoreceptors, afferent C fibres from (cat) 152, 337
- Cutaneous nerve, cortical activity evoked by stimulation of (cat), 142, 544
  - interneurones mono synaptically activated by (cat), 154, 103
- Cutaneous nerve stimulation, dorsal spinal grey matter activity following (cat), 137, 126
- Cutaneous non-myelinated nerve fibres, acetylcholme action on (cat), 150, 501
- Cutaneous receptive area, nucleus graculus neurone position relation to (cat), 153, 334
- Cutaneous receptors, single C fibres from (cat), 143, 47P
- Cutaneous sensory nerve impulses, initiation of (fish), 152 53P

- Cutaneous thermoreceptors, quantita tive study of C afferent fibre (cat), 153, 113
- Cutaneous touch receptors, properties of (cat), 153, 88
- Cutaneous vasomotor control, nose, lips and chin (man), 150, 22 P
- Cutaneous vasomotor nerves, ear and forehead (man), 150, 12P
  - upper arm, calf and thigh (man), 149, 19P
- Cuttlefish, daily changes in buoyancy of, 151, 36 P
- Cuvette, cold setting resin in making of, 147, 39 P
- Cyanide, ascites tumour cell sodium transfer affected by (mouse), 140, 84
  - giant axon Na efflux affected by potassium concentration and (squid), 152, 592
  - phosphate compounds in giant axon affected by (squid), 152, 551
  - platelet uptake of 5 HT affected by (man), 146, 482
  - respiration in new born affected by (rabbit), 145, 88
  - sodium flux of sodium loaded muscle affected by (frog), 148, 365
  - sodium ion secretion by skeletal muscles affected by (frog), 148, 62
  - uterine segments active ion transport affected by (rabbit, cat), 154, 447
- Cycling, work production in racing (man), 141.8P
- Cystathionine, pyridoxine deficiency effect on brain and liver (rat), 141, 31 P
- Cysteic acid, spinal neurones activated by (cat), 150, 657
- Cysteine, antidiuretic activity of vaso pressin inactivation by, 141, 111
- Cystinuria, amino acid clearances in (man), 142, 141
- Cytochemical studies, apparatus used for quantitative (T), 144, 14P
- Cytochrome C, iron deficiency effect on heart and skeletal muscle (rat), 154,
  - oxygen consumption of tissues after CO poisoning affected by (rat), 152, 482
- Cytochromes, cardiac muscle stimulation causing oxidation reduction changes in (Amphibia), 147, 14
- Dactylopodite, innervation of muscles moving (crustacea), 143, 404
- Dark adaptation, change of organization in retinal receptive fields during (cat), 137, 338

- Dark adaptation, retmal ganglion cell recording of (cat), 137, 327
  - single unit response in optic lobe to (locus\*) 154 480
  - spectral sensitivity curves from ganglion cell during (frog), 149, 312
- Dark adaptometer, use with experimental animals of (monkey) 146 27P
- 'Dark' after-effects, retinal illumination threshold of (man), 150 73
- Darmstoff, chemical nature of (horse), 137, 154
- mm dr. mc ion from (mammal) 146, 263 DDT, grant axon negative after potential affec ed by (cockroach) 151 608
  - grant axon negative after potential af fected by (cockroach) 152, 122
- Deafferentation, muscle activity in shiver ing affected by (car) 146 5
- Deafness, pitch dependence on intensity in unilateral (T) 137, 49P (man) 137
  - p-oduction by direct suggestion under hypnosis of selective (man), 152 67P
- Death, chest pressure volume relationships affected by (rabbit), 149 178
  - lungs and chest changes with (rabbit),
- Decamethonium, hypoxia action on heart rate affected by (dog) 144, 160
  - Renshaw cell response to electropho retically applied (cat) 141 454
- skeletal muscle fibres with multiple in nervation affected by (birds) 154, 592
- Decapitation, acetylcholme content of head affected by (blowfly), 142 169
- Decerebrate preparation, reflex activa tion of cholinergic vasodilator fibres to muscle in (cat) 154 504
- Decerebrate rigidity, visceromotor reflex paths and (cat) 141 492
- Decerebration, cerebellar stimulation ef fect after (cat) 135 75
  - γ-efferents affected by different methods of (cat) 140 408
  - pulmonary oedema development after (gumea pig) 145 377
  - re iculum contractions affected by (ru minant) 141 4
  - rpmal reflexes affected by (cat) 147 565 spmal reflex activity affected by (cat) 151 107
  - tubocurarme action on cervical cord affected by (cat) 153 42
  - Decompression brief anoxia and its pre vention following rapid (T) 153 73 P
  - Decompression procedure, calculation of safe (man) 137 47P

- Decompression sickness, localization of (man), 152 167
- Deep forearm veins, source of blood with drawn from (man) 142, 323
- Defaecation, 5 HT and 5-HTP effect on (mouse), 141, 14P
- Defence reaction, active muscle vaso dilatation produced by brain stem stimulation and (cat), 154, 400
  - amvgdala stimulation giving (cat) 145 253
  - sensory input to hypothalamic and mesen cephalic regions subserving (cat) 149, 45P
- Dehvdration, urme flow and osmolar clearance relation in (rat) 139, 111
- Delter's nucleus, muscle spindles affected by stimulation of (cat), 147 391
- 'Dendritic' response, / aminobutyric acid effect on cortical (cat), 138-372
- Dendrocoelum lacteum, light sensitivity and spectral threshold curve of 143, 369
- Denervated ear vessels, insulm action on (rabbit), 149 230
- Denervated end-plates, acetylcholme sensitivity of (frog), 151 12
  - spontaneous activity and structural changes at (frog) (T), 147, 10P
  - spontaneous subthreshold activity at (frog), 146 44P
  - spontaneous subthreshold activity at (frog) 150 149
- Denervated gastric pouch, portal venous ligation effect on secretion of (dog) 144, 126
- Denervated skeletal muscle, ACh con tractures in isotonic K<sub>2</sub>SO<sub>4</sub> of (rat), 152 12P
  - fibrillation potentials in (rat) 135 526
- hypersensitivity to drugs of (rat) 136, 4P
  Denervation, acetylcholine sensitivity of
  skeletal muscle fibres after complete or
  partial (frog.) 151, 1
  - DMPP actions on blood vessels following (dog) 147 7
  - parotid gland secretion affected by (sheep), 144 464
  - post-contraction byperaemia of muscle affected by (cat) 149 105
  - skeletal muscle sensitivity to ACh affected by (cat) 147 178
  - tubocurarme affinity for motor end plate affected by (frog), 152 319
- Density flowmeter, modifications to, 151 10P
- Dentate fascia, dorsal hippocampal commissure stimulation effect on (rabbit) 135 464

Deoxycorticosterone, alkaline phospha tase and antibody absorption in gut affected by (rat), 140, 44P

renal excretion of sodium, potassium and acid affected by (man), 151, 312

salt and sucrose taste preference thres holds affected by (rat), 151, 253

sodium and potassium movement in erythrocytes affected by (man), 136. 159

sodium and potassium transfers in colon affected by (dog), 151, 352

Deoxycortone, progestational action of (dog), 148, 465

Deoxynucleosides, erythrocyte active po tassium transport affected by (man),

Deoxyribonucleic acid, adrenal cortex enucleation and regeneration of (rat), 135, 540

Depolarization, muscle spindle response to stretch and to (cat), 153 211

tension changes in single muscle fibres during potassium induced (frog), 153, 392

Depolarizing current, visual cell response to (Limilus), 148 16

Detergents, gut responses to KCl affected by (guinea pig), 139, 22P

Dextran, 5 HT and histamine release by (rat), 139, 30

glucagon and insulin action of 'anaphylactoid' reaction induced by (rat). 145, 667

skin capillary permeability affected by (rat), 139, 1

DFP, arousal from sleep by (cat), 136, 33 end plate depolarization of phrenic nerve diaphragm preparation relation to re petitive response action of (rat), 144, 38

Diabetes, anti insulin serum production of (rat), 153 146

Diabetes insipidus, oxytocin and vaso pressin action on kidney during (dog), 142, 479

stillboestrol action on renal function affected by (dog), 145, 231

uterine and renal activity in (dog), 144 82

Diamox, see Acetazoleamide

Diaphragm, ACh diffusion into and distri bution in (rat) 153 570

anoxia effect on resting potentials of (rat), 140 301

calcium effect on (rat) 152 57P

curare rapid action on (rat) (T) 150, 15P extrafibre space and fibre diameter in stretched (rat) 140, 305

motor unit distribution in (rat), 140 427

Diaphragm, neuromuscular propagation failure in (rat), 140, 440

oxygen consumption and cytochrome C changes after acclimatization in (rat). 152, 55P

potassium content affected by stimulation of (rat), 143, 307

potassium in different layers of isolated (rat), 154, 133

properties of perfused (rat), 150 15P thyroxine binding by (rat) 149, 410

Dibenamine, noradrenaline output by spleen relation to frequency of stimula

tion affected by (cat), 138 91 Dibenyline, adrenaline hyperpnoea af fected by (cat), 137, 382

vascular response to sympathomimetic ammes in forearm affected by (man), 147, 57P

Dibenzyline, foetal bradycardia response to drugs affected by (guinea pig), 152, 6 noradrenaline output by spleen relation

to frequency of stimulation affected by (cat), 138 92

noradrenaline release from sympathetic nerves to intestine after (cat), 143, 43

Dichroism, skeletal muscle showing ultra violet (frog), 148, 379

Diet, erythrocyte potassium concentration affected by (sheep), 136, 47

Diffusion respiration, plasma adrenalme and noradrenaline during (dog), 150, 79

Digital nerves, finger mechanoreceptor stimulation evoking action potentials ın (man), 148, 30P

Digital resistance vessels, transmural pressure reduction effect on (man) 136,

Digoxin, ascites tumour cell sodium trans fer affected by (mouse), 140, 70

ATP in erythrocytes affected by (man), 140 490

sodium and potassium movements in erythrocytes affected by (man), 136, 150

Dihydro-beta-erythroidine, recurrent in hibition affected by (cat), 146, 382

Dimethylacrylylcholine, hypobranchial gland containing (oyster drill), 139, 450

Dimethyl-4-phenylpiperazinium, local vascular actions of (dog) 147 l

Dindivan plasma, contact clotting time of (man) 137 104

Dinitrofluorobenzene, inhibition of hexose transfer in erythrocytes by (man), 141, 226

Dinitrophenol, after potentials in skeletal muscle fibre affected by (frog), 142, 80 p methionine transfer by intestine in ritro affected by (rat), 151, 53

non medullated fibre post-tetanic hyper polarization affected by (rabbit), 136, 82

phosphate compounds in giant axon affected by (squid), 152, 554

sodium ion secretion by skeletal muscle affected by (frog), 148, 63

taema coli electrical and mechanical activity affected by (guinea pig), 136, 310

taema coli electrical properties affected by (guinea pig), 143, 186

uterme segments active ion transport affected by (rabbit, cat), 154, 449

Dioestrus, cervix tissues in pregnancy and (rat), 148, 531

Dipeptides, intestinal absorption of, 135, 43P

intestinal absorption of (rat, dog), 145, 48

mtracellular hydrolvsis during intestinal absorption of (rat), 152, 367

Diphospho-glyceric acid, erythrocyte in cubation effect on (man), 140, 485

Diphtheria toxin, peripheral actions of (mammal), 147, 511

Direct current, ampullae of Lorenzini response to temperature change and to stimulation (Raja clavata) 145 1

Disaccharides, small intestine absorption of (rat), 154, 39

Diurnal excretory rhythm, change from night to day work effect on (man), 137, 65P

exercise effect on (man), 143, 7P

Diurnal renal excretory rhythm, posture changes effect on (man) 148 488

p-Methionine, active transfer by intestine in vitro of (rat) 151 51

Dogfish, pituitary gland hormones m, 151, 50P
DOPA, awakening effect after reserving of

DOPA, awakening effect after reserpine of (mouse) 151 276

Dopamine, adrenal medulla homogenates distribution of (bovine) 141, 188 noradrenaline content of tissues after

reserpine affected by (cat) 154 281
Dorsal column, cortical response to cutaneous nerve stimulation affected by section of (cat), 142 551

dorsal root reflex following stimulation of (frog), 142 351

Dorsal columns, splanchnic afferent fibres in (cat) 137 68

Dorsal commissure, hippocampus electrical responses to stimulation of (rabbit), 135, 464

Dorsal root, meaning of record from stimulated (frog), 138, 27P

Dorsal root potential, antidromic im pulses in dorsal root fibres related to (frog), 142, 343

excitability changes in afferent terminals related to (cat), 142, 11

primary afferent fibres in spinal cord developing (cat), 149, 258

Dorsal root reflex, characteristics of (frog), 142, 344

tetanus in primary afferent fibres in spinal cord effect on (cat), 149, 280

Dorsal root section, spinal rigidity affected by (dog), 146, 605

Dorsal root stimulation, dorsolateral tract responses to (cat), 153, 307

intraspinal focal potentials initiated by (frog), 150, 634

Dorsal spinal grey matter, cutaneous nerve stimulation effect on activity of (cat), 137, 126

Dorsolateral tract, synaptic linkage be tween hind limb afferent fibres and ascending fibres in (cat), 153, 306

Double reflex discharges, intercostal nerves and trunk muscles (rabbit), 148, 29 P

Drinking, apparatus for recording feeding and, 143, 31 P

normal pattern of (rat), 138, 39P

Drinking behaviour, DOCA effect on (rat) 151, 255

Duodenal cells, fat absorption by (rat), 151, 47 P

Duodenum, localization of 5 HT in mucosa of (dog), 142 562

Duplicity theory, change of organization in retinal receptive fields and (cat), 137, 342

Ear, mode of vibration of drum and ossicles in (guinea-pig) (T), 148, 5P pitch dependence on intensity in uni

lateral deafness of (man) 137, 355

Eccentric cell, initiation of impulses in (Lamulus) 148 14

theoretical treatment of observations on activity of (Limilus) 148 29

Eccrine sweat glands, adrenaline ACh and other agents action on (man), 148, 590

Ectopic pacemaker, mechanism in anoxic heart for (rat) 154, 9P

Edrophonium, Renshaw cell response to electrophoretically applied (cat), 141, 448 Egg phospholipid, platelet like activity development on storage of crude, 138 37 P

Egg white, 5 HT and histamine release by (rat), 139, 30

Egg yolk, pharmacologically active sub stances formed by cobra venom in, 136, 131

Elbow extensor motoneurones, mono synaptic excitation of (cat), 137, 40

Electric eel pulses (T), 135, 40P

Electric motor, negative resistance power supply for stabilizing speed of small (T), 148, 5P

Electric organ, acetylcholine system in (electric catfish) 140 498

Electric organ discharge, temperature changes measurement during (T), 153, 35 P

Electric time constant, measurement of motoneurone membrane (cat), 145, 515

Electroencephalogram, bright flashes ef feet on occipital (man), 152, 111

state of consciousness assessment by (dog), 151 6P

apparatus 21 channel (T), 140, 34 P Electrolyte-active steroid, neuraxial abla tions effect on (sheep), 153, 52 P

Electrolyte concentration, spermatozoa motility affected by pH and (dog), 141

Electrolyte excretion, oxytocin and vaso pressin effect on (man) 145 12P

posterior pituitary hormones action on (dog) 142 468

postural changes effect on aldosterone and (man) 146 133

water diuresis effect on (dog) 141 177

Electrolyte metabolism, factors affecting (lizard) 145 37

Electrodes, analyte insulated (T), 143, 2P Electrodes for class use (T), 136, 23P

Electromagnetic puller, control circuit for, 151, 340

Electromyogram, single maximal stimulus to nerve effect on (cat), 150 342

temperature effect on forearm muscles (man), 143, 466

Electronic apparatus, novel mechanical construction for (T) 137 71P

Electronic averaging system, multi channel (T), 140, 34 P

Electron microscope, demonstration of Metropolitan Vickers E M 5 (T), 148 46P

Electronic potentials, giant motor synap tic transmission of (crayfish) 145 305 Electrophysiology, versatile console for (T), 153, 43 P

Electroplate, discharge mechanism of (electric cat fish), 143, 52 P

membrane potentials during rest and activity of (ray), 142, 251

Electroretinogram, additivity in (frog), 137, 51 P

occipital potentials relation to (man), 152, 109

origin of (frog), 140, 251

Embryonic bone, contrast between growth on natural and chemically defined medium of chick and rat (T), 154, 72 P

Embryonic chick bone, amino acid meta bolism in (T), 135, 58P

cultivation on chemically defined media of (T), 135, 39 P

Embryonic limb-bone, growth hormone and insulin effect in vitro on (chick), 144, 490

Emetic drugs, area postrema ablation effect on action of (cat), 143, 14P

Emotion, sweat composition affected by (horse), 147, 75

Emotional stress, cholinergic vasodilator nerves in forearm activation during (man) 147, 27 P

cholmergic vasodilators to skeletal muscle excited by (man), 148, 631

muscle blood flow during (man), 149, 61 P Emphysema, blood CO, dissociation curves in (man) (T), 154, 54 P

Encephalograph, expansion of push pull principle applied to 16 channel, 140

Endometrial curettings, plan muscle stimulant in (man), 142, 48 P

Endometrium, plain muscle stimulants in extracts of (man), 144, 68

End-plate, acetylcholine sensitivity of de nervated (frog) 151, 12

End-plate membrane, permeability during transmitter action at (frog), 154, 52

End-plate depolarization, DFP repetitive response of isolated phrenic nerve diaphragm preparation relation to (rat), 144, 38

End-plate potentials, adrenalino action on (rat), 141, 297

Ca and Mg effects on (frog), 138, 436 hydrazmum effect in Na free solution on (frog) 147, 244

stimulation rate effect on amplitude of (rat) 140, 447

variation in different fibres in one motor unit of (rat), 140, 433

- Energy expenditure, fasting and refeeding effect on (rat), 154, 223
  - individual variations in standardized activity (man), 143, 573
- Enterogastrone, gastric secretion affected by (dog), 149, 58 P
- Entorhinal cortex, dorsal commissure stimulation effect on (rabbit), 135, 464
- Environment, fluid distribution, reproduction and behaviour affected by (rat), 146,6P
- Enzyme inhibitors, acidic amino acids action on spinal neurones affected by (cat), 150, 668
- Eosinophils, blood clotting time relation to (man), 135 375
- blood histamine and (mammal) 136, 449 Eosinophil count, spinal transection effect on (man), 154, 249
- Ephedrine, reserpine effect on actions of (mammal), 144, 324
- Epidermis, radio iodide concentration in (rat) 152 469
  - thick membrane nature of (pig rabbit) 153, 54 P
- Epididymis, post-natal development of (cat), 136 40 P
- Ergotamine, nicotine action on traches affected by (gumes pig) 144 198
- Eructation, rumen movements and (sheep), 153, 39 P
- Erythrocytes, albumin and other media effect on intercellular volume of centrifuged (man) 145, 658
  - anal flow in narrow tube of (dog), 149,593 breed effect on potassium concentration in (sheep) 136 41
  - calcium effect on permeability of (man) 149 563
  - carbon monoride and oxygen rate of uptake by reduced (man sheep), 150, 18P
  - cardiac giveosides action on sodium and potassium movements in (man), 136, 148
  - cation exchanges of (man) 145 641
  - cation movement with different cation content in (sheep), 142 453
  - circulation time of plasma and of (cat), 136 218
  - density changes with agoing of (man) 143 325
  - differences between parts of packed columns of (man) 141 9P
  - unhibitors action on facilitated hexose transfer system in (man) 141 219
  - life span of (sheep) 145 36P (rat), 146
    217

- Ervthrocytes, nucleosides and deoxynu cleosides action on active potassium transport by (man), 154, 607
  - osmotic equilibria measured by im mersion refractometry in (man), 138, 23P
  - permeability to adenine and hypo xanthine and their ribosides of (man), 154, 613
  - permeability to labelled glucose of (man), 135, 61P
  - phosphate esters in (man), 140, 481
  - potassium movement and ATP in (man), 140, 479
  - potassium movements and phosphate metabolism in (man), 137, 13 P
  - random destruction of circulating (rat), 143, 43 P
  - sodium and potassium variations in (ox, goat) 139, 87
  - temperature and pH effects on facilitated transfer of glucose from (man), 152 64P
  - vitamin E affecting response to high oxygen pressures of (rat), 135, 60 P
  - Erythrocyte membrane, new method for determining half saturation of facilitated transfer of glucose across (man) 152 32P
  - Eserine, ACh action on non myelinated fibres affected by (rabbit) 152, 152
  - mtraventricular injection of (sheep) 149
  - potassium fluxes of auricle affected by (rabbit) 146, 403
  - Esidrone, renal cortex water and cation content affected by (rat), 143, 284
  - Ethanol, methylpentynol effect on drinking of (rat), 144 138
  - Evans Blue, intercellular volume of centrifuged erythrocytes by (man) 145, 660
  - Event-marker, Cossor 1428 oscillograph used with (T) 149 14P
  - Everest, muscular exercise studies on ex pedition up (man), 141 233
  - Excitability, time course of motoneurone membrane (cat), 145, 522
  - Excitation, tendon organ afferents causing motoneurone (cat) 138 241
  - Excitation pools, retina containing (frog), 149 327
  - Excitatory nerve, picrotoxin action on (cravfish) 143, 544
  - Excitatory post-synaptic potential, af ferent nerve section effect on (cat), 145, 206
    - afferent volley interval effect on mono synaptic (cat) 150 375

Excitatory post-synaptic potential, group I volley relationship to (cat), 136, 531

monosynaptic excitation of motoneurones studied by (cat), 137, 23

time course of (cat), 145, 529

Exercise, body temperature in cold water affected by (man), 154, 337

calf blood vessels distensibility affected by (man), 140, 125

cardiac output changes by Douglas and Haldane method in (man), 138, 5P

cold effect on forearm hyperaemia fol lowing (man), 145, 245

diurnal excretory rhythms affected by (man), 143, 8P

erythrocyte potassium concentration af fected by (sheep), 136, 46

high altitude effect on oxygen consumption and ventilation associated with (man), 141, 238

pulmonary capillary blood volume and membrane diffusion component mea surement during (man), 154, 13 P

pulmonary diffusing capacity in athletes and non athletes on (man), 152 67P

temperature effect on body temperature and performance during strenuous (man), 147, 60 P

Exercise hyperaemia, arterial inflow restriction effect on (man), 148, 651

'blood flow repayment' during (man), 145 38P

temperature effect on (man) 145, 447

Exercise hyperphoea, peripheral neural mechanism of (dog), 148, 49 P

Exophthalmos-producing hormone, serum containing (man) 146, 12P

Expiration, abdominal muscles activity with increased resistance to (man) 136, 556

thoracic compliance with increased resistance to (man), 136, 563

Expiratory muscles, chest inflation effect on electrical activity in (cat), 142 35P

Expired GO<sub>1</sub>, radioactive bicarbonate in jection effect on specific activity of (dog), 147, 472

Extensor motoneurones, cerebellar an terior lobe action on (cat), 149 631

recurrent inhibition in relation to firing frequency and discharge rate limitation of (cat), 154, 308

Extensor muscle motoneurones, mono synaptic excitation of (cat) 137 27 tendon organ afferents action on (cat), 138, 244

External urethral sphincter, bladder filling effect on (cat), 139, 13P reflexes involving (cat), 149, 653

Extra ocular muscle, motor innervation of (man), 153, 522

Extra-ocular muscle spindles, motor supply to (T), 141, 33P

sensitivity to stretch of, 145, 15P

Extra-systole, perfused heart weight af fected by (rabbit), 148, 398

Eye, absence of position sense in (man), 153, 127

accommodation fluctuations during steady focusing by (man), 143, 44P accommodation fluctuations under steady

viewing conditions of (man), 145, 579 apparatus for stimulating with known

amounts of light energy the cat's (T), 138, 1P

compensatory movements of (pigeon), 139, 19P

dynamics of accommodation responses of (man), 151, 285

fate of substances injected into anterior chamber of (cat, rabbit), 151, 202 initiation of impulses in visual cells of

(Lamulus), 148, 14 intraretinal recording in intact (cat), 149,

537
minimum flux of energy detectable by

(man) (T), 143, 45P, 145 369 retinal noise and sensitivity of (man), 136,

sensitivity to differences in focus of (man), 143, 18P

vision affected by controlled movements of (man), 145, 98

Eye convergence, accommodation relation to (man), 137, 488

Eye movements, cine technique for measurement in dynamic environment of (man), 150, 2P

electrical method for recording (man)
141, 7P

'Eye-spots', spectral sensitivity of (flat worm), 143, 373

Facilitated transfer, importance of reaction at both interfaces in erythrocytes of. 136 13P

Facilitation, decerebration effect on spinal cord (cat), 147, 567

γ efferents paralysis effect on soleus stretch reflex (cat), 147, 500

monosynaptic reflex showing (cat), 135, 402

nucleus gracilis neurones showing (cat)
153, 337

- Facilitation, splanchme nerve non myelnated fibres activation of intercostal nerves showing (rabbit), 150–472
- Facilitation period, fusimotor activity and sensory discharge (cat) 150 191
- Factor I, brain distribution of (cattle), 144
  - identification of one active component m (beef brain), 146-358
  - mhibitory transmitter substance m extracts of (cat) 153 55P
  - plam muscle preparations affected by (various), 145, 66
    - purification of (ox) 151 31
  - state m bram of (rat) 153, 423
- Faeces, endogenous thyroid hormone ex cre ion in (rat), 136, 198
  - "Fe excretion in (rat) 146 226
- Farm animals, closed-circuit anaesthesia m (T) 151 21 P
- Fasting, fat-mobilizing activity of urme during (man) 141, 9P
  - metabolic rate affected by (rat) 150 695
  - total metabolism during (rat) 154, 219
- Fast muscles, differentiation after birth of (cat) 150 399
- unnervation from slow muscle nerve effect on speed of (cat) 150 418
- Fatigue, rhythmical activity of groups of motor units affected by (man) 137 477
- Fat muscle ratio, nitrogen elimination during oxygen breathing relationship to (man) 152 167
- Fat-mobilization, substance in human fasting urme causing (mouse), 141 9P
- Fatty acids, intestmal transfer of short chain (rat) 141 73 152 48
  - reticulo rumen contractions affected by introduction into rumen of (sheep) 147 61
  - rumen contractions and parotid secretion affected by (sheep) 149 53
  - thyroxine effect on synthesis by cell free fractions of liver of (rat) 154, 145
  - throud effect on synthesis from acetate by liver of (maramal) 144 364
- Fatty acid absorption, carbon charlength effect on (rat) 148 51P Feeding, about a segretion of acid 1
- Feeding, abomasal secretion affected by (sheep) 154 117
- Femoral artery, blood flow pattern in (dog) 147 209
  - leg muscle stimulation causing dilatation of (cat) 149 95
- Ferry-Porter law, observations on 137

- Fertility, hypothalamic lesions effect on (ferret) 147, 101
  - starvation effect on (mouse), 147, 221
- Feulgen-stained material, apparatus for microphotometry of (T), 137, 38P
- Fibrillation, filling pressure of heart effect on (rabbit), 149, 198
- Fibrillation potentials, occurrence of (rat), 135, 522
- Fibrinogen, blood-clotting time affected by concentration of (man, horse) 142, 202
  - foetus and mother companson of (sheep), 150, 612
- Film records, simple method for measuring time intervals on continuous 35 mm, 137, 74P
- Fimbria, commissural components of (rab bit), 135, 470
- Fine capillary, device for drawing lengths of (T), 143 35P
- Finger, blood flow and heat loss in ice water measurement in (man), 139, 498
  - critical closing pressure in (man) (T) 136 20P
  - limb position effect on vasodilator response to cold in (man), 135–93
- Finger heat elimination, nerve block effect on response to body heating of (man), 138 446
- Finger movements, pempheral nerve block effect on appreciation and execution of (man) 143 55
- Fish, retinal photosensitive pigments in deep sea, 140 220
- Flechsig's tract, synaptic linkage between hind limb afferent fibres and ascending fibres in (cat) 153 306
- Flexor digitorum longus, responses from receptors in adjoining interosseous region and (cat), 153-74
- Flexor motoneurones, cerebellar anterior lobe action on (cat), 149 636
- Flexor muscle motoneurones, mono synaptic excitation of (cat), 137, 30
  - tendon organ afferents action on (cat) 138, 244
- Flexor reflexes, bladder distension effect on (cat) 146 444
- Fluctuation theory, visual noise and (man) 136 474
- Fluoride, uterme active ion transport affected by (rabbit cat) 154 451
- Foetal activity, early human (Film) 146
- Foetal blood sugars, comparative study of (mammal) 146 53 P

- Foetal bradycardia, gestational age and hormones influence on (guinea pig), 152, 1
- Foetal cardiovascular system, sensitivity to adrenaline of (rabbit), 138, 9 P
- Foetal fluids, acid base relationships of (pig), 151, 484
- Foetal heart rate, electrical recording in utero of (T), 145, 4P
- Foetal heat production, measurement of (fowl), 150, 239
- Foetal liver, fructose metabolism in iso lated perfused (sheep), 153, 199
- Foetal muscle, ACh sensitivity of (rat), 149, 50P
- Foetal plasma, sorbitol estimation in (sheep), 146, 29 P
- Foetal resorption, high external tempera ture causing (rat), 135, 451
- Foetus, allantoic and amniotic fluids com position variation with age of (sheep), 140, 1
  - amines in (rat), 147, 144
  - asphyxia effect on (monkey), 153, 447
  - blood clothing factors in mother and (sheep), 150, 607
  - blood sugars and tissue carbohydrate in (sheep, monkey), 153, 527
  - cardiovascular effects of anoxia in (sheep), 146, 518
  - cardiovascular responses in (rabbit), 139, 123
  - growth rate of (whale), 146, 21 P
  - histamine formation by (rat), 144, 343 (man, rat), 145, 30P, (rat), 151, 131
  - hypoxic bradycardia response to ad renaline affected by age of (guinea pig) 145, 6P
  - hypoxic death in (sheep), 149, 37P
  - lactate and pyruvate metabolism in (sheep), 143, 50 P
  - maternal serum proteins transmission to (monkey), 153, 265
  - metanephros function in (rabbit, pig), 151, 479
  - new born comparison with (monkey) 152, 271
  - observations in utero of (monkey), 150, 3P oxygen consumption and arterial oxygen saturation in (sheep), 135, 623
  - prolongation of survival in anoxic (sheep), 153, 16 P
  - protein bound iodine in serum of (rabbit), 142, 337
  - renal function in (sheep), 140, 14, (guinea pig), 141, 323
  - serum proteins including thyroxine binding proteins in (rabbit), 146, 344

- Foetus, thyroxine binding protein passage between mother and (rabbit), 151, 66 tissue carbohy drate reserves in (lamb, monkey), 151, 24 P
  - umbilical venous occlusion effect on circulation of (sheep), 138, 53P
- Fog, simple method of making, 147, 38 P Food intake, individual variation in energy expenditure and (man), 136, 34 P
- Foot, toe heat elimination affected by exposure to subatmospheric pressure of (man), 135, 171
- Foot temperature, hexamethonium effect on (man), 141, 284
- Foot vasomotor responses, raised body temperature in paraplegia causing (man), 136, 547
- Foramen ovale, valve in new born of (ox, horse) (Film), 135, 58P
- Force-velocity curve, comparison of 150 tonic contraction and contraction after release (frog), 143, 519
- Forearm, cold vasodilatation in (man), 137, 84 P
  - cooling effect on hyperaemia following arterial occlusion and exercise in (man), 136, 35 P
  - functional communications between su perficial and deep voins in (man) (T), 140, 3P
  - local cooling effect on glucose metabolism in (man), 152, 68 P
  - positive and negative pressure breathing effect on capacity and resistance blood vessels of hand and (man), 140, 40P
  - temperature effect on sustained contraction to fatigue in (man), 136, 41 P
  - vasomotor control of cutaneous vessels in (man) 139, 455
- Forearm blood flow, age effect on response to hot environment of (man), 141, 262
  - atropine action during insulin hypoglycaemia on (man), 149, 486
  - brachial artery occlusion effect on (man), 148, 652
  - constrictor and dilator nerves contribution during body heating to (man), 136,
- 490 dibenyline effect on sympathomimetic
- ammes action on (man), 147, 57P
  5 HT effect on respiration and on (man),
  151, 343
- infra redradiation effect on (man), 149, 424 isopropylnoradrenaline effect on (man), 151, 540
- insulin hypoglycaemia effect on muscle and skin (man), 147, 269

- Forearm blood flow, plethysmograph and strain gauge measurement of (man), 140. 318
  - temperature effect on response to muscle contractions of (man), 143, 465
  - voluntary hypersentilation effect on (man), 137, 80
  - water height in occlusion plethy smograph effect on (man), 143 380
- Forearm blood vessels, adrenalme an tagonists effect on adrenaline action on (man), 148, 546
- Forearm muscle, blood flow on AV oxygen difference relationship with overen consumption of (man) 142.314

leg exercise effect on 24Na clearance from

(man), 137, 303

- temperature effect on duration of sus tained contraction of (man), 143 454
- Forearm resistance blood vessels, in creased transmural pressure effect on tone of (man), 149, 614
  - subatmospheric pressures effect on tone of (man), 143 67P
- Forearm skin, msulin hypoglycaemia effect on blood flow in (man) 143, 332
- Forearm vascular resistance, CO, role in anoxia effect on (man) 140 39P hypoxia effect on (man), 143, 226
- Forebrain, affective reactions representa tion in (cat) 145 251
- Forelimb motoneurones, integrative pattern of Is synaptic actions on (cat) 144, 280
- Forelimb muscles, early cortical pro jection of group I afferents from (cat) 143 61 P
- Forelimb, repetitive activity of muscle in (frog) 154 71P
- 48,80, capillary permeability in different species affected by (mammal) 137, 53 mast cells histamine and 5 HT of tissues

affected by (rat) 137 182

- skin capillary permeability affected by (rat) 139 1
- skin histamine depletion by \$ irradiation and by (rat) 136 125
- Fourier analysis, simple electric com putor for 141 23 P
- Forea, photo labile pigments in normal and cone monochromatic (man) 148 47P
- Fragility, erythrocyte ageing effect on (man) 143 327
- Frog, binocular vision in 143 20P blood pressure in, 139 11P blood pressure and pressure pulses in arterial arches of 137 12

- Frog retina, 'narrow band' pigment in, 145, 630
- Frogmen, physical and physiological prin ciples in design of breathing apparatus for (T), 154, 6P
- Fructose, placents production of (man). 146 98
  - small intestine absorption of (rat, guinea DIG1 154, 47
- Fructose metabolism, foetal and neonatal isolated perfused liver (sheep), 153, 199
- Fundic pouches, feeding responses before and after isolation of innervated an trum in separated (dog), 154, 53P
- Fusimotor neurones, soinal reflex regula tion of (cat), 143, 195
- Fusion frequency of flicker, increased nitrogen pressure effect on e e g and (man) 151. 28P
- Gall-bladder, bile duct ligation mitotic activity in mesenchyme cells of (guinea pig), 147, 36P
- concentrating activity of (T), 153, 73P
- Gamma-aminoputyric acid, brain in hibitory factor and (various), 139, 79 circulatory and resouratory effects of
  - (mammal) 146, 70
  - cortical activity affected by (cat) 138,
  - giant motor fibre affected by (cravfish). 145, 332
  - glutamic acid action on muscle con traction affected by (cravfish), 148, 46
  - inhibitory action of 8 hydroxy v amino butyric acid compared with (dog), 145, 575
  - muscle membrane permeability affected by (erayfish), 144, 187
  - nervous structures inhibited by Factor I affected by (cat rabbit), 150, 306
  - nicotine baa  $TH \bar{c}$ antagonism (guines pig), 144, 349
  - plain muscle preparations affected by (various) 145, 66
  - spinal neurones depression by (cat), 146, 185
  - virus infected sympathetic ganglia af fected by (rat) 146 432
  - Gamma cells, antidromic inhibition and (cat) 138 391
  - Gamma-efferent fibres, procame action on (cat) 140, 421
    - tension-extension relation in stretch reflex affected by paralysis of (cat) 147 548
  - Gamma-efferent spindle system, drugs effects on (man) 145 12P

Gamma-globulins, inhibition of passive sensitization in vitro by (mammal), 145, 46P

passive sensitization affected by (guinea pig), 150, 553

placental transmission of (monkey), 153, 272

Gamma loop, time of (cat), 147, 386 Gamma motor fibres, procaine effect on

(cat), 135, 256 Ganglia, transmission of excitation through

(Mya), 143, 38P, 553
Ganglion-blocking agents, peristaltic re
flex in ileum affected by (guinea pig),

136, 253
Ganglion cells, organization of receptive fields in retina of single (cat), 149, 546

receptive fields in area centralis and retinal periphery of (cat), 150, 589

Ganglion cell stimulation, spontaneous activity affected by (crab, lobster), 138, 356

Ganglionic stimulant, local vascular actions of (dog), 147 1

Gangliosides, cerebral tissues response to electrical pulses conditioned by, 152, 60P

Gangrene, noradrenaline release from artery walls as cause of (T), 153, 17P

Garden Tiger Moth, choline ester and other substances in. 146, 38 P

Gas analyser, kinetic, 149, 10P Gas analysis apparatus, special forms of

(T), 149 15P Gas analysis, mass spectrometer for rapid and continuous 137, 33P

Gas mixtures, air tight box for exposing animals to, 136, 22 P

Gas sampling, device from impulse of variable duration for constant volume, 143, 28 P

Gasping, lung inflation in new born causing (man) 151, 557

Gastric acid secretion, 5 hydroxytrypto phan effect on (dog), 143 21P

histamine effect in single short term intra venous injections on (dog) 137 31 P

cerebral ventricular injection of histamine effect on (cat), 140, 180

Gastric chemoreceptors, conduction ve locity in fibres from (cat), 142, 120

Gastric contraction, post activation potentiation of (cat), 138, 47 P 148, 438

Gastric emptying, osmotic regulation of (T), 154 72P

simple molecules and ions effect on rate of (man), 154, 254

Gastric function, pregnancy and lactation effect on (man) (T), 141, 29 P

Gastric motility, vago vagal reflex in volving (cat), 148, 422

Gastric mucosa, electron microscopy (T),
151, 20 P

Gastric pH receptors, slowly conducting centripetal fibres from (cat), 137, 17P

Gastric pouch, secretory responses of denervated (dog), 143, 85P

Gastric secretion, chorionic gonado trophin inhibition of acid (rat), 147, 585 enterogastrone action on (dog), 149, 58P Europeans and Bantu differences in 146 13P

factors affecting histamine stimulated (dog), 141, 22, 42P

5 HT effect on (dog), 141, 27

5 HT precursors effect on histamine induced (dog), 146, 10

histamine and (man), 153, 61P

histamine and methacholine action on (guinea pig), 142, 233

histomine discontinuous infusions effect on (dog), 152, 73P

histamine in cerebral ventricles affeoting (cat), 150, 53

hyperglycaemia inhibition of vagally in duced (dog), 154, 4P

measurement of total gastric blood flow and (dog), 152, 47P

method in unanaesthetized animal for obtaining (guinea pig), 135 22P

method of studying effect of emotional changes under hypnosis on (man), 152, 46P

peptic activity and electrolyte concentration of (guinea pig), 136, 38P

phenylbutazone action on (gumes pig), 137, 61 P

portal venous occlusion effect on (dog), 137, 76P, 144, 123

potassium and H+ ion content of hist amine stimulated (cat), 154, 68P

sympathomimetic amines mode of action in inhibiting (dog), 138, 48P

vago vagal reflex involving (cat), 148, 420

Gastric stretch receptors, veratrum alkaloids action on (cat), 135, 498

Gastric ulceration, neurological and hor monal mechanisms involved in ex perimental (rat) 154 56 P

Gastrin, further purification of and secretory response to (man), 154 52P

preparation and properties of (hog), 149, 70P

sham feeding effect on release from pyloric antrum of (dog), 145 14P, 148, 291

- Gastro enterectomy, tissue 5 HT and urine 5-HIAA affected by (rat), 153, 239
- Gastro-intestinal osmoreceptors, site of (man) 154, 270
- Gastro-intestinal tract, 5 HT liberator in (dog), 138, 489
- Gastro-intestinal venous outflow, hver blood flow affected by (rat), 136 71
- Geniculate synapses, recovery of re sponsiveness following optic nerve stimulation (cat), 150 221
- Germitrine, pulmonary and gastric stretch receptors and atrial receptors affected by (cat) 135, 488
- Gestational age, foetal bradvcardia re sponse to drugs affected by (guinea pig), 152, I
  - foetal weight relation to (monkey) 152 276
- oxygen consumption relation to (sheep), 135, 631
- Gestation time, blood clotting factors in foctus and mother with (sheep), 150 609
- Giant axon, after potential production in (cockrosch), 151 75
  - "Ca movements in (squid) 138, 253
  - cranide and arginine phosphate effect on cation transport in (squid) 152 591
  - negative after potential in (cockroach) 151 608 152, 122
  - 'energy rich phosphate compounds effect on sodium efflux from (squid) 152 561 internal pH of (squid) 142 44
  - p-meability to radioactive potassium and chloride of (squid) 154, 177
  - phosphate bond energy utilization for sodium extrusion from (squid) 137
  - phosphorus metabolism and sodium trans port m (squid) 152 545
  - velocity of impulse increased in (squid)
- Glant cells, pace maker function of (Archachaina) 151 15P
- Giant motor fibre slow post-straspic potentials recorded from (cravfish) 145 326
- Glant motor synapses transmission at (cravfish) 145 223
- Giant nerve cell, si e of origin of efferent action po critals in (Aplyno) 152 36P
- Giant nerve fibres, energy neb phospha e compounds miserton mto (squid) 147 ISP
- Giant potentials, nouromuscular junction thorang (rat), 136, 505

- Giant snail, functional characteristics of nervous system in, 135, 34P
- Giant synapse, mechanism of impulse transmission across (squid), 143, 114
- Gibson gas analysis apparatus, modified for class use, 138, 1P
- Gill plates, choline acetylase in (Mytilus edulis), 145, 33P
- Gingival blood flow, qualitative assess ment of variations in (rabbit), 152, 48 P
- Giraffe, fatigue in (T), 148, 56P Glass, pam producing substance activation by, 135 355
  - plasma activation by contact with (man),
    144 1
- Glaucoma, poppy alkaloids and (mam mal), 138, 40P
- Glomerular filtration, wreter occlusion effect on (T) 148 82P
- Glomerular filtration rate, oxytocin and vasopressin action on (dog), 142, 476 stilboestrol effect on (dog) 145, 235
  - urine flow and osmolar clearance affected by reduction in (rat), 139, 117
- Glomeruli, bisection of isolated (T) 152, 3P
- renin location near (rabbit) 149 529
- Glucagon, dextran anaphylactoid reaction affected by insulm and (rat), 145, 667
- Glucose, ascites tumour cell sodium transfer affected by (mouse), 140, 81
  - bram heat production and blood flow affected by (monkey) 154, 26
  - fatty acids transfer in intestine affected by (rat), 141, 76
  - unsulm action on liver blood flow affected by (rat baboon) 144, 55
  - unsulm and growth hormone interaction on uptake by perfused heart of (rat), 136 436
  - mtestinal absorption of (dog) 135 581 ionic environment affecting transport by mtestine of (toad), 151, 59
  - liver and muscle blood flow and metabolism affected by (rat) 150 590
  - milk secretion by isolated perfused mammary gland affected by (goat) 154, 556 phlorrhizm action on intestinal transfer in rutro of (rat), 144, 387
  - phlorrhizm site of action in inhibiting intestinal absorption of (rat) 148 83
  - res ing membrane potential of isolated cerebral cortex affected by lack of (gumea-pig) 139 186
  - salts amon on gasine emptying affected by (man) 154 257
  - emistarvation effect on absorption from small in estine of (rat), 152, 184

- Glucose, survival time of anoxic young affected by (rat), 153, 468
  - two stage transfer in intestine of (rat), 154 63P
  - water and solutes transport in small intestine affected by (rat), 136, 634
- Glucose absorption, phlorrhizm site of inhibition in intestine on, 139, 21 P
- Glucose <sup>14</sup>C labelled, radioactive CO<sub>1</sub> movements in body during oxidation of (dog, monkey), 147, 487
- Glutamic acid, alanine concentration in mesenteric blood during absorption from small intestine of (mainmal), 140, 148
  - muscle contraction affected by (cravfish) 148, 42
  - spinal neurones activated by (cat), 150, 657
  - transamination during small intestine absorption of (dog), 135, 442
- Glutamic aspartic acid transamination, perfused heart showing (rat), 150, 627
- Glycerol, gastric emptying affected by (man), 154, 263
- Glycerol-extracted muscle fibres, ionic strength and phosphate concentration effect on tension responses of (rabbit), 135, 30
- Glycine, absorption rates of glycyl glycine and (rat) 152 70P
- Glycogen, modification of method of estimation of 146, 52 P
- Glycolysis, ascites tumour cell sodium transfer and (mouse), 140, 83
- Glycosuria, anti insulin serum production of (rat) 153 154
- Glycyl-glycine, intestinal absorption of (rat) 146 11 P
- Golgi organs, loop time of (cat), 147 407 Golgi recurrent collaterals, physiological significance of (cat) 138, 381
- Golgi tendon organ afferents, synaptic actions on motoneurones caused by impulses in (cat), 138, 227
- Gonadotrophins, cytological changes in kidney and adrenal cortex in male induced by (cat) 135 11 P
  - disappearance from scrum after intra venous inspection of (rabbit), 151, 403 incompatibility within species and strains
  - of (rat), 140, 13P
- Grasp reflex (cat), 149, 60P Green rods, function of (frog), 149 311
- Growth, blood red cell and plasma volumes affected by (rat), 139, 64
  - hypothalamic lesions in parabiosis effect on (rat) 145 340

- Growth hormone, heart growth and size control by (rat), 150, 254
  - msulin interaction on perfused heart with (rat), 136, 435
  - limb bone rudiments of embryo affected in vitro by (chick), 144, 490 man affected by human preparation of
  - man affected by human preparation of, 148, 39P
- Guanidinopropionic acid, Factor I in brain extracts and (beef), 146, 363 Gustatory nerve impulses, stimulants
- causing (ruminant ungulates), 146, 14PGustatory sweating, adaptation in (man), 136, 24P
  - parotidectomy resulting in (T), 141, 33P
- Habituation, responses to hand heating and cooling showing (man), 146, 162, 146, 10 P
- Haematocrit, albumin and other media effect on value of (man), 145, 658
  - growth effect on value of (rat), 139, 64 plasma trapped with cells in (sheep), 142, 455
- Haemoglobin, concentration and total content of (kitten), 150, 7P
  - kinetic studies of electrophoretically distinct (sheep), 145, 32P
  - nitric oxide combination with (sheep), 136, 507
  - oxygen and carbon monoxide relative affinity for (man), 142, 73
  - velocity of combination of first oxygen molecule with (sheep), 140, 37P
- velocity constant k, of (sheep) 145, 32 P
- Haemoglobinometry, obscure factors in, 138, 22P
- Haemolysis, oxygen poisoning and toco pherols action on (rat), 140, 39
- Haemophilia, contact clotting time in (man), 137, 104
- Haemophilus pertussis, anaphylactic shock assisted by vaccine from (rat), 142, 570
- Haemorrhage, nervous and humoral ro sponses to acute (rat), 143, 213
  - tissue electrolytes affected by (guinea pig), 147, 112
- Haemostasis, arterial and venous blood differences in (dog), 142, 242
- Hageman factor, mode of action in release of plasma kinin by (man), 151, 238
- 'Hageman trait', plasma contact factor in (man), 144, 12
- Hair, radio iodide uptake by (rat) 152,
- 474
  Hair follicles, thermal gradients in skin (man), 140, 375

- Hair receptors, nerve fibre diameter and characteristics of (cat), 153, 102
- Haldane's gas analysis apparatus, de relopment of 143, 5P
- Halogeno-phenylethylamines, an\*iadrenalme activity in a series of (rat) 147 60P
- Hand, adaptation to cooling of (man) 136,
  - hab 'ua'ron to heating and cooling of (man) 146 152
  - remains of adaptation to warming and cooling of (T) 141, 3P
- Hand blood flow, at opine action during meulm hypoglycaemia on (man), 149, 486
  - contracto- and dilator nerves contribu "on during body heating to (man) 136, 446
  - mental anthmetic effect on (man) 145, 5P 148 108
- Hand blood vessels, capacity and dis
- Hand heat elimination, leg exercise effect en (man), 137 300
- Hand vasodilatation, pyrogen effect on radian near induced (man) 145, 77
- Head orientation, linear motion perception affected by (man) 153 350
- Head's paradoxical reflex (rabbit) 145
- Heart, A-H and H-V intervals in (dog car) 142 131
  - ELF work and strength of (rat) 150 251
  - celmm ions rate of action on contraction of (freg) 138 507
  - commarion frequency as factor in drugs across in isolated (rabbit) 138 16P
  - corner for and weight changes in temped (rabbit) 148 404
  - commerce de amon on rale and am purede of transparence pure 139 325 drammer of those 144. 9P
  - Entities recording of entities of pos-
  - erraraerder find 'srees in perfored (rabbre, 149 303
  - Emergence effect on the of their and a V oradion to the series of Indibnit 145 47P

- Heart, oxidation reduction changes of cyto chromes during contraction of (Amphibia), 147-14
  - partition of the venous return to (dog)
  - pericardial organ neurohormones effect on (crustaceans) 149 217
  - reflex control of stroke work of (dog) 144
  - sympathetic nerve stimulation effect on ventricular diastolic pressure and change in length of (dog) 152 19 P
  - transaminase activity in perfused (rat)
  - vagal stimulation effect on isolated per fused (rat) 145, 266
  - valvular incompetence effect on output of isolated (frog) (T), 137 12P
  - Heart beat, detection recording and tele metering from active subject of (T) 142 1P
  - Heart carbohydrate, nitrogen effect in new born on (rat) 153 459
  - Heart contracture, sodium effect on (frog) 143 492
  - Heart-lung preparation, heart sounds in (dog) (T), 151 35P
    - peripheral resistance in (T) 147
  - Heart muscle, rapid high frequency heating effect on resting potential of (T) 148 37 P
  - Heart-oxygenator preparation, isotope experiments with (rat, guinea pig), 136, 380
  - Heart rate, ACh action on conduction velocity in isolated atria and on (rabbit) 140, 329
    - adaptation of response to localized cooling of (man) 136 101
    - apparatus for recording in conscious animals 153 37P
    - asphyxia effect on foetal and new born (monkey) 153 448
    - blood pressure effect on response to adrenaline of (rabbit) 139 129
    - body temperature prediction from (man), 135 51P
    - carotid body chemoreceptor stimulation affecting (dog), 141 32P 144 148
    - central nervous control of sympathetic acceleration of (cat) 151 225
    - filling pressure effect on isolated (ver
    - hand hearing and cooling affecting (man) 145 155
    - The or ten presture effect on (rat) 143

Heart rate, hypoxia action on carotid body chemoreceptors effect on (dog), 145, 440 respiratory manœuvres effect on (man),

**144,** 541

right atrial pressure change effect on (cat), 143, 6

sympathomimetic amines action on (dog H L), 145, 10P

vagal facilitation effect on (rat), 146, 205 ventricle repolarization affected by (frog), 154, 394

Heat, anaphylactic reaction mactivation by (gumea pig), 135, 322

C afferent fibre receptors response to (cat), 153, 117

cutaneous mechanoreceptor response to (cat), 152, 349

receptors concerned in panting response to (sheep), 146, 142

seasonal variations in plasma antidiuretic activity response to (man, sheep), 135, 1 spinal lesions effect on body response to (man), 142, 412

Heat acclimatization, rate of decay of (man) 152, 26 P

Heat adaptation, serum P change in (man), 149, 26

Heat exchange, relation between coefficients by convection and evaporation for, 138 53 P

Heat exchange coefficients, convection and evaporation (man), 141 164

Heat loss, body fat effect on cold and warm water action on (man), 154, 329 evaporation and convection relation in (man) 141, 166

Heat production, foetal (fowl), 150 239 hypoxia effect in new born on (man), 138, 158

plam muscle contraction and (molluses), 141, 390

Heat stress, heat loss from lungs during (calf), 136, 404

rectal and bicarotid trunk temperatures compared in (calf), 136 393

Heat vasodilatation, bradykının formation concerned in (man), 142, 219

'Hemicholinium' compound, central in spiratory discharge and diaphragm activity affected by (cat), 153, 62P

Hensel needle, tissue blood flow changes measurement by modified (T) 145 4P

Heparin, <sup>14</sup>C labelled chylomicron fat re moval from circulation affected by (rat), 138, 332

liver uptake of <sup>14</sup>C labelled chylomicron fat injected intravenously affected by (rat), 140 264 Hepatectomy, liver blood flow affected by partial (rat), 136, 287

Hepatoma, histidine decarboxylase activity in malignant (rat), 153, 31P

Hepatic arterio-venous oxygen difference, leg exercise effect on (man), 137, 309

Hepatic artery, liver blood flow affected by clamping of (rat), 136, 63

Hepatic artery ligation, liver blood flow affected by (rat), 139, 168

Hepatic heat production, indirect mes surement of (rat), 144, 60

Hepatic nerves, intravascular hepatic pathways and (cat, dog), 153, 31P

Hepatic venous blood flow, magnitude of (dog), 142, 369

Hering-Breuer reflexes, weakness of (man), 140, 36P

Hexamethonium, bronchial muscle af fected by (guinea pig), 144, 213

colon activity affected by (rabbit, guinea pig), 152, 410

hypoxia action on metabolism in new born affected by (cat), 149, 511

isolated perfused heart affected by (rat), 145, 272

nicotine action on colon affected by (rabbit), 152, 194

oxygen consumption and body tempera ture of new born affected by (cat), 149,

superior cervical ganglion partially de nervated affected by (cat), 135, 151 temperature regulation affected by (man),

141, 281

Hexoestrol, adrenal gland corticosterone content affected by (rat), 139, 300, 311

cholesterol and inhibition of adrenal cortex by (rat), 138, 461

Hexose transfer, inhibitors action in erythrocytes on (man), 141, 219

High altitude anoxia, prevention of (T), 146, 1P

High altitude, oxygen consumption and ventilation in exercise affected by (man), 141, 238

High-protein diet, balance studies on (cat), 148, 74 P

thyroid changes with (cat), 148, 73P

Hip muscles, integrative pattern of In synaptic actions on motoneurones of knee muscles and (cat), 144, 271

Hippocampus, affective reactions representation in (cat), 145, 257

commissural and septal connexions of (rabbit), 135, 460

- Hippopotamus, body temperature of, 147, 53P
  - posterior pituitary hormones of, 151, 47 P
  - skin secretion of (T), 148, 22P
- Histaminase, two kinds of (pig), 142, 33P Histamine, absorption from cerebral ven tricles of (cat), 150, 50
  - adrenalectomy effect on tissue (rat), 147,
  - adrenal gland corticosterone content affected by (rat), 139, 302
  - anaphylactic shock in different species and (mammal), 144, 525
  - antigen and histamine liberators release of (guinea pig), 135, 303
  - antigen and octylamine action on content in sensitized tissues of (guinea pig), 147, 425
  - artery dilator response to peripheral in jection of (cat), 149, 100
  - blood eosmophils and basophils and (mammal), 136, 449
  - brain formation and catabolism of (main mal), 149, 34, (cat), 152, 299
  - Ca and pH effect in anaphylactic release of (guinea pig) 140, 273
  - capacity blood vessels affected by (man), 140, 115
  - capillary permeability in different species affected by (mammal), 137, 53
  - central nervous effects in protected ani mals of (gumea-pig) 154 469
  - cerebral ventricular mjection with and subsequent fate of (cat, dog) 140 169 chorionic gonadotrophin inhibition of acid gastric secretion induced by (rat) 147 566
  - corticotrophin release from pituitary by (rat) 146 107
  - depolarized plain muscle response to (various), 143 480
  - distribution and fate of radioactive (rat). 147, 437
  - distribution in tissues of (sea anemone), 151 301
  - envenomed egg yolk sensitizing action to (guinea pig), 136 135
  - feeding effect on gastric secretion response to (dog) 141, 22
  - 5 HT effect on gastric secretion response to (dog) 141 28
  - foetal formation of (rat), 144, 343, (man. rat) 145 30P, (rat) 151 131
  - foctus and new born content of (rat) 147,
  - y aminobutyric acid antagonism on ileum to (guinea pig) 142, 150

- Histamine, gastric acid secretion response to single short term intravenous injec tions of (dog), 137, 31 P
  - gastric secretion and (man), 153, 61P gastric secretion induced by methacholine and by (guinea pig), 142, 237
  - H pertussis vaccine action on sensitivity to (rat), 142, 575
  - inhibition of formation of (rat), 149, 66P irin differentiation from (mammal), 135,
  - lung release in anaphylactic shock of slow reacting substance and (mammal), 151, 416
  - mast cells, 5 HT and (mammal), 137, 170,
  - perustaltic reflex in ileum affected by (guinea pig), 136, 250
  - plain muscle spike potentials affected by (guinea-pig), 135 417
  - portal venous ligation effect on gastric pouch response to (dog), 144, 131
  - pregnancy effect on formation of (rat), 143, 91
  - pregnancy effect on urmary excretion of (rat), 140, 12P
  - pulmonary diffusing capacity affected by inhalation of (man) 152, 176
  - serum oxidase affinity for (pig), 145, 395 site of formation in pregnancy of (rat), 142, 37P
  - skin anaphylaxis and (rat), 150, 491 superior cervical ganglion transmission affected by (cat) 135, 66
  - temperature effect on release in ana phylaxis of (guinea pig), 135, 321
  - temperature reduction effect on response of ileum to (guinea pig), 137, 398 uterus content of (man), 154, 417
  - Histamine aerosol, buffy cost and oak
  - gall extracts protection against (guinea pig), 154, 461
  - Histamine liberators, skin capillary per meability affected by (rat), 139, 1
  - Histamine release, thyroxine effect on (rat) 138, 51 P
  - Histidine, brain formation of histamine from (cat), 152, 304
    - concentration effect on rate of intestinal absorption of enantiomorphs of (rat), 149 433
    - methionine competition in intestinal ab sorption of (rat), 145 59
    - methionine enantiomorphs in competition with intestinal absorption of enantio morphs of (rat), 142, 51 P
  - Histidine decarboxylase, factors affecting activity in tissues of (T), 151, 21P

Heart rate, hypoxis action on carotid body chemoreceptors effect on (dog), 145, 440

respiratory manœuvres effect on (man), 144, 541

right atrial pressure change effect on (cat), 143, 6

sympathomimetic amines action on (dog H L), 145, 10P

vagal facilitation effect on (rat), 146, 205 ventricle repolarization affected by (frog), 154, 394

Heat, anaphylactic reaction inactivation by (guinea-pig), 135, 322

C afferent fibre receptors response to (cat), 153, 117

cutaneous mechanoreceptor response to (cat), 152, 349

receptors concerned in panting response to (sheep), 146, 142

seasonal variations in plasma antidiuretic activity response to (man, sheep), 135, 1 spinal lesions effect on body response to

Heat acclimatization, rate of decay of (man), 152, 26P

(man), 142, 412

Heat adaptation, serum P change in (man) 149, 26

Heat exchange, relation between coefficients by convection and evaporation for, 138, 53 P

Heat exchange coefficients, convection and evaporation (man) 141, 164

Heat loss, body fat effect on cold and warm water action on (man), 154 329 evaporation and convection relation in (man) 141, 166

Heat production, foetal (fowl), 150, 239 hypoxia effect in new born on (man), 138 156

plain muscle contraction and (molluscs) 141, 390

Heat stress, heat loss from lungs during (calf), 136, 404

rectal and bicarotid trunk temperatures compared in (calf), 136 393

Heat vasodilatation, bradykının formation concerned in (man) 142, 219

'Hemicholinium' compound, central in spiratory discharge and diaphragm activity affected by (cat) 153, 62P

Hensel needle, tissue blood flow changes measurement by modified (T), 145, 4P Heparin, <sup>14</sup>C labelled chylomicron fat re moval from circulation affected by

(rat), 138, 332 hver uptake of <sup>14</sup>C labelled chylomicron

fat injected intravenously affected by (rat), 140, 264

Hepatectomy, liver blood flow affected by partial (rat), 136, 287

Hepatoma, histidine decarboxylase activity in malignant (rat), 153, 31P

Hepatic arterio-venous oxygen difference, leg exercise effect on (man), 137, 309

Hepatic artery, liver blood flow affected by clamping of (rat), 136, 63

Hepatic artery ligation, liver blood flow affected by (rat), 139, 168

Hepatic heat production, indirect mea surement of (rat), 144, 60

Hepatic nerves, intravascular hepatic pathways and (cat, dog), 153, 31 P

Hepatic venous blood flow, magnitude of (dog), 142, 369

Hering-Breuer reflexes, weakness of (man), 140, 36P

Hexamethonium, bronchal muscle af fected by (guinea pig) 144, 213

colon activity affected by (rabbit, guinea pig), 152, 410

hypoxia action on metabolism in new born affected by (cat), 149, 511

isolated perfused heart affected by (rat), 145, 272

nicotine action on colon affected by (rabbit), 152, 194

oxygen consumption and body temperature of new born affected by (cat), 149, 56P

superior cervical ganglion partially de nervated affected by (cat), 135, 151 temperature regulation affected by (man),

141, 281

Hexoestrol, adrenal gland corticosterone content affected by (rat), 139, 300, 311

cholesterol and inhibition of adrenal cortex by (rat), 138, 461

Hexose transfer, inhibitors action in erythrocytes on (man), 141, 219

High altitude anoxia, prevention of (T), 146 1P

High altitude, oxygen consumption and ventilation in exercise affected by (man), 141, 238

High-protein diet, balance studies on (cat), 148, 74 P

thyroid changes with (cat), 148, 73P

Hip muscles, integrative pattern of Ia synaptic actions on motoneurones of knee muscles and (cat), 144, 271

Hippocampus, affective reactions representation in (cat), 145, 257

commissural and septal connexions of (rabbit), 135, 460

- Hippopotamus, body temperature of, 147, 53P
  - posterior pituitary hormones of, 151,
- skm secretion of (T), 148, 22P
- Histaminase, two kinds of (pig), 142, 33 P Histamine, absorption from cerebral ven
  - tricles of (cat), 150, 50 adrenalectomy effect on tissue (rat), 147, 51
  - adrenal gland corticosterone content affected by (rat), 139, 302
  - anaphylactic shock in different species and (mammal), 144, 525
  - antigen and histamine liberators release of (guinea pig) 135, 303
  - antigen and octylamme action on content in sensitized tissues of (guinea pig), 147, 425
  - artery dilator response to peripheral in jection of (cat) 149 100
  - blood eosmophils and basophils and (mammal), 136 449
  - brain formation and catabolism of (mammal), 149, 34, (cat), 152, 299
  - Ca and pH effect in anaphylactic release of (guinea pig) 140 273
  - capacity blood vessels affected by (man), 140, 115
  - capillary permeability in different species affected by (mammal) 137, 53
  - central nervous effects in protected am mals of (guines pig) 154 469
  - cerebral ventricular injection with and subsequent fate of (cat dog) 140, 169 chorionic gonadotrophin inhibition of acid gastric secretion induced by (rat) 147 566
  - corticotrophin release from pituitary by (rat) 146 107
  - depolarized plain muscle response to (various) 143 480
  - distribution and fate of radioactive (rat), 147, 437
  - distribution in tissues of (sea anemone)
    151, 301
  - envenomed egg yolk sensitizing action to (guinea pig) 136 135
  - feeding effect on gastric secretion response to (dog), 141 22
  - 5 HT effect on gastric secretion response to (dog), 141, 28
  - foctal formation of (rat), 144 343 (man rat) 145 30 P, (rat) 151, 131
  - fortus and new born content of (rat) 147,
  - γ aminobutvine acid antagonism on ileum to (guinea pig), 142 150

- Histamine, gastric acid secretion response to single short term intravenous injections of (dog), 137, 31 P
  - gastric secretion and (man) 153, 61P gastric secretion induced by methacholine and by (guinea pig), 142, 237
  - H pertussis vaccine action on sensitivity to (rat), 142, 575
  - inhibition of formation of (rat), 149, 66*P* irm differentiation from (mammal), 135, 120
  - lung release in anaphylactic shock of slow reacting substance and (mammal), 151, 416
  - mast cells, 5 HT and (mammal), 137, 170, 180
  - peristaltic reflex in ileum affected by (gumea pig), 136, 250
  - plam muscle spike potentials affected by (guinea pig), 135–417
  - portal venous ligation effect on gastric pouch response to (dog), 144, 131
  - pregnancy effect on formation of (rat), 143, 91
  - pregnancy effect on urmary excretion of (rat), 140, 12P
  - pulmonary diffusing capacity affected by inhalation of (man), 152, 176
  - serum oxidase affinity for (pig), 145 395 site of formation in pregnancy of (rat), 142, 37 P
  - skin anaphylaxis and (rat) 150, 491 superior cervical ganglion transmission affected by (cat) 135, 66
  - temperature effect on release in ana phylaxis of (guinea pig), 135, 321
  - temperature reduction effect on response of ileum to (guinea pig), 137, 398
  - uterus content of (man) 154, 417
  - Histamine aerosol, buffy coat and oak gall extracts protection against (gumea pig), 154 461
  - Histamine liberators, skin capillary per meability affected by (rat) 139 1
  - Histamine release, thyroxine effect on (rat) 138, 51 P
  - Histodine, brain formation of histamine from (cat), 152 304
    - concentration effect on rate of intestmal absorption of enantiomorphs of (rat) 149 433
    - methionine competition in intestinal ab sorption of (rat), 145, 59
    - methionine enantiomorphs in competition with intestinal absorption of enantio morphs of (rat), 142 51P
  - Histidine decarboxylase, factors affecting activity in tissues of (T) 151, 21 P

Homarine, distribution in tissues of (sea anemone), 151, 306

hypobranchial gland containing (inverte brates), 139, 440

Homogenizer, plastic, 136, 2P

Homosynaptic depression, monosynaptic reflex after activation showing (cat), 135, 400

Horizontal cell layer, graded potentials in retina from (bream), 152, 497

Hornet venom, ACh, 5 HT and other substances identified in, 151, 35 P

Horse, blood coagulation in 142, 197 intestinal movements of (Film) 148, 39P

Hot environment, age effect on response of forearm blood flow to (man), 141, 262

H potential, factors affecting (mammal), 147, 316

nature of (dog, cat), 142, 129

Humeral breathing, tracheal breathing comparison with (chicken) 138 287

Humidity, rectal and bicarotid trunk tem peratures in heat stress affected by (calf), 136, 396

sweat rates and skin temperatures at different atmospheric temperatures affected by (man), 144, 299

Hunger, occurrence of response reinforced by food relationship with (T), 144 27 P

Hyaluronidase, antidiuretic activity in urine and (man), 151 44P

antiduretic activity of urine and (man), 154, 378

Hydrazine, cell membrane excitability in sodium free media affected by (frog), 150, 440

Hydrazinium, neuromuscular transmission restoration in Na free solution by (frog) 147, 231

Hydrocortisone, corticotrophin in blood and pituitary gland after adrenalectomy affected by (rat) 150 683

muscle phosphate affected by (man) 142, 50P

renal excretion of sodium, potassium and acid affected by (man), 151 312

Hydrogen ion excretion, posture change effect on diurnal rhythm of (man) 148 495

Hydrostatic pressure, water transport in small intestine affected by (rat), 136, 636

Hydroxy-acids, pharmacological actions of (rat, hamster), 146 277

Hydroxytryptamine, anaphylactic shock in different species and (mammal) 144 525 Hydroxytryptamine, anaphylactoid re action and release of (rat), 139, 27 biosynthesis of (rat), 140, 9P

blood platelet uptake of (man) 146, 472 capacity blood vessels affected by (man), 140, 115

capillary permeability affected by (mammal), 137, 53, (rat), 140, 105

carbon monoxide effect on recovery from blood of, 141, 10P

cardiovascular effects of intravenous in fusions of (T), 148, 47P

cations and water passage through skin affected by (frog), 135, 59P

colon activity affected by (rabbit, guinea pig), 152 411

defaccation and gut propulsion affected by (mouse), 141, 14P

depolarized plain muscle response to (various), 143, 480

distribution in tissues of (sea anemone), 151 298 dock leaf extracts antagonism to (rat,

guinea pig), 135 58 P drugs causing release from tissues of

histamine and (rat), 137, 179

enzymic oxidation by serum of (pig), 154, 598

estimation in blood and serum of 140, 10 P

foetus and new born content of (rat), 147, 148

γ aminobutyric acid antagonism to (guinea pig) 144, 349

gastric secretion affected by (dog), 141, 27 gastro-enterectomy effect on tissue (rat) 153, 239

gastro intestinal tract containing liberator of (dog), 138, 489

gill plates oxidation of (Mytilus) 148, 54 P

H pertussis vaccine action on sensitivity to (rat), 142 575

intestinal peristalsis affected by (guines pig) 146, 31

intestinal peristalsis affected by intra luminal (guinea pig, rabbit) 140, 381 intracellular localization in relation to

mitochondrial enzymes of (dog) 143,

irin differentiation from (mammal), 135

isolated nictitating membrane response to (cat), 141, 50

localization in duodenal mucosa of (dog), 142, 562

mast cells containing (mouse, rat) 141 510

Hydroxytryptamine, mitochondria and storage granules of (dog), 145, 473

non medullated afferent fibre activity affected by (rabbit) 138, 34

pencardial organ neurohormones and (crustaceans), 149, 217

penstalsis affected by (guinea pig), 138

penstaltic reflex in ileum affected by (guinea pig), 136, 254

plain muscle affected by ACh and by (Mytilus edulis) 152, 230 236

plasma containing (dog) 142, 53 P platelet uptake in cold of (man), 147, 153 pressure effect on intestinal mucosa re

lease of (guinea pig), 146, 18

pyrogen release of (rabbit), 138 429 rat's stomach for assay of low concentra tions of (T), 137, 39 P

respiration stimulation by (man) 151, 342

skin anaphylaxis and (rat) 150 491

ckin permeability to Na and K affected by (frog toad) 138, 496

superior cervical ganglion transmission affected by (cat) 135-66

temperature change effect on content in tissues of (rat) 151 410

temperature reduction effect on response of fleum to (guinea pig), 137, 398

tissue mast cells and (rat) 137, 169

Vascular action on liver of (dog), 141, 38 P Hvdrovytryptophan, acid gastric secretion affected by (dog) 143 21 P

5 HT release and peristalsis of small intestine affected by (guinea pig rab bit) 140 393

histamine stimulated gastric secretion af feeted by (dog) 146-10

intestinal peristalsis affected by (guinea pig) 146-31

Hyperaemia, mechanical factors in (rab bit) 147 42P

Hyperhidrosis, mental arithmetic effect on hand blood flow in (man) 148 108

Hypergly caemia, anti insulin serum production of (mammal) 153 132

Hyperoxaluria primary (man) 141 18P Hyperpolarization, excitatory post vi naptic potential during (cat) 145 539

potassium effect on nerve membrane (squid toad) 148 309

red muscle spinal motoneurone showing antidromic inhibitors (cat) 149 383

oltage current relations in nerve cell affected by (molluse) 148 175

Hypertension increased vasomotor tone in (T) 153 73 P

Hypertonic solutions, electroplate mem brane potentials affected by (rav), 142, 265

sartorius velocity of shortening affected by (frog), 137, 23 P

skeletal muscle contraction affected by (frog), 144 167

Hyperventilation, capacity vessels distensibility in forearm reduced by (man), 152, 16P

Hypervitaminosis A, bone strength and calcium retention in (rat), 154 45P

Hypnosis, suggestion effect on circulatory response to thermal stimuli under (man) 151, 29 P

Hypobranchial glands, choline esters present in (invertebrates) 139, 440

Hypoglycaemia, blood flow m intact and sympathectomized bmbs affected by (man) 139 97

forearm skin blood flow affected by (man), 143, 332

Hypophyseal portal system, lactation affected by destruction of (rabbit) 137 414

Hypophysectomy, aldosterone action on isolated Lidney affected by (cat) 152, 213

effects of partial (rabbit), 149, 394

heart growth work and size affected by (rat), 150, 254

theroid gland activity affected by thero tropin after (rat) 144 232

Hypothalamic lesion, apparatus for making 137 69P

parabiosis and (rat) 138, 15P

Hypothalamic stimulation, conditioned defence reaction on basis of (cat) (T) 145 23 P

unconditioned defence reactions elicited by (cat) (T) 140 3P

Hypothalamoneurohypophysial system maturation of (mammal) 147 299

Hypothalamus, active muscle vasodilata tion on stimulation of (cat) 154 492 cholinesterase location in (dog) 139 137 functional recovery after lesions in lateral

(rat) 143 41 P
histamine formation in (mammal) 149 37

lactation and (rabbit) 137 410
oestrus relationship to (ferret) 147 93
parabiosis and effect of lesions in (rat)
145 336

sexual behaviour affected by local application of oestrogen to posterior (cat) 142 26P

sexual maturation affected by (rat) 147,

Hypothalamus, single neurones activity in response to osmotic and other stimuli in (rabbit), 148, 552

thyroid activity affected by electrical stimulation of (rabbit), 143, 246, 152, 535

Hypothermia, citrate intoxication in (T), 137, 61P

drugs and anaesthetics effect on reanima tion from (mouse), 140, 23P

glucose metabolism in (rabbit), 143, 37P technique for studying drugs action during (monkey), 138, 6P

Hypoxanthine, erythrocyte uptake of (man), 154, 616

Hypoxla, chemoreceptors role in cardio vascular responses to systemic (dog), 154, 6P

forearm vascular resistance affected by (man), 143, 226

heart rate affected by (dog), 144, 152 heart rate affected by carotid body chemo receptors stimulation by (dog), 145, 440

heat production in new born affected by (man), 138, 156

maturity, environmental temperature and animal size effects on action of (cat, guinea pig) 149, 352

new born oxygen consumption affected by (rat), 154, 158

oxygen consumption and body tempera ture of new born affected by (cat), 149, 500

oxygen consumption in young at low temperature affected by (rabbit) 149 149

potassium distribution in diaphragm affected by (rat), 154 135

pulmonary arterial pressure in perfused lungs affected by (cat), 153, 414

pulmonary vascular bed affected by (cat) 135, 45

I band, autoradiographic localization of adenine nucleotide in relation to (frog), 145, 166

local activation and movement of (frog), 144, 432

stretch and contraction of muscle fibres affecting length of (frog) 144, 413

Heum, buffy coat and oak gall extracts affecting sensitivity to histamine of (guinea pig), 154, 464

 $\gamma$  aminobutyric acid action on (mammal), 142, 147

peristaltic reflex inhibition in (guinea pig), 136, 249

Heum, reflex contractions of longitudinal coat of isolated (guinea pig), 146, 369 surface active substances effect on re sponses to KCl of (guinea pig) 139, 22 P

temperature reduction effect on responses of (guinea pig), 137, 396

tension changes induced by passive lengthening and shortening of (guinea pig) (T), 139, 5P

Iliopsoas motoneurones, monosynaptic activation from other muscle afferents of (cat), 144, 275

Infant, cerebral lipids in (T), 140, 31P leucocytes in saliva of (man), 149, 52P

Inferior colliculus, single unit response to binaural stimulation in (cat), 138, 34P

Inferior molar diands secretion of

Inferior molar glands, secretion of (sheep), 150, 522

Inferior vena cava, atrial receptor dis charge affected by occlusion of (dog), 136, 180

Infra-red radiation, local response of cutaneous blood vessels to (man), 146, 48 P

skin vessels affected by (man), 149, 424 Infusion apparatus, 145, 2P

Infusion, apparatus for long-continued in unrestrained animal (dog), 135, 21P

Inhibition, cerebellar surface stimulation producing Purkinje cell (cat), 135–81 dorsolateral tract neurones showing (cat), 153, 321

factors causing reticulum and rumen (sheep, goat), 151, 147

monosynaptic reflex showing (cat), 135, 402

nucleus gracilis neurones showing (cat), 153, 338

spinal interneurones showing (cat), 147,

tendon organ afferents causing moto neurone (cat), 138, 230

tetanus toxin action on motoneurone (cat), 135, 659

Inhibitory hyperpolarization, red muscle spinal motoneurone showing anti-dromic (cat), 149, 383

Inhibitory nerve, picrotoxin action on (crayfish), 143, 543

Inhibitory post-synaptic potential, con ditioning tetanus effect on (cat), 150, 386

group I volley relationship to (cat), 136, 538

latency and time course of inhibition of monosynaptic reflexes correlation with motoneurone (cat), 154, 354 time course of (cat), 145, 529

- Inhibitory potentials, crustacean muscle showing 143 428
- Inhibitory responses, retinal ganghon cells giving (cat), 149, 550
- Inhibitory synapses, synaptic delay at, 154, 39P
- Inhibitory transmitter action, membrane permeability change in muscle during (craviish) 144, 176
- Inosine, ervthrocyte uptake of (man) 154, 614
- Insect fibrillar muscle, rhythmic pro porties of 153 34P
- Insect nervous system, visual pathways m (lorust) 136, 27P
- Inspiratory-expiratory valve, solenoid operated, 145, 1P
- Insulin, abomasal secretion affected by (sheep) 154, 122
  - bram heat production and blood flow affected by (monkey), 154, 26
  - dextran anaphylactoid reaction affected b- glucagon and (rat), 145-667
  - Fartor I in brain affected by (rat) 153
  - growth hormone interaction on perfused heart with (rat) 136, 435
  - limb bone rudiments of embryo affected in ri ro br (chick) 144, 490
  - liver and muscle blood flow and metabolism affected by (rat) 150 589
  - hver b'ood flow and metabolism affected br (rat baboon) 144, 52
  - molarular configuration of monosacchandes and acron of (dog) 147 54 P
  - paralities caused by (rat) 141 377
- Insulin deficiency anti-merilin serum production of (mammal) 153 131
- Insulin hypoglycaemia, adrenalme release m (rabbit) 149 225
  - a ropms effect on hand and forearm blood for during (man) 145 15P
  - bool for m extremities afferred by (man) 135 12P
  - bood from m mer and simpather of mixed limbs affected by (man), 139 97 foreign sum b'ood from affected by (man) 143 332
  - tum and more a bood flow afferred by
  - The function in test both afferred by
- Integrating motor pneumotachograph,
- Intensity modulator, enemousely and the sp

- Interclavicular sac, respiration through (chicken) 138, 285
- Intercostal muscles, activity in respiration of (man), 151, 390
  - electrophysiological properties of (man), 154, 601
- Intercostal muscle activity, respirators air flow and (man) 149, 471
- Intercostal nerves, splanchnic nerve nonmyelmated fibres reflex activation of (rabbit), 150, 463
- Interference microscope, measurement of structions in skeletal muscle fibres by (frog.) 144, 403
- Intermediate nucleus, neurone types in and around (cat), 154, 89
- 'Internal calorimetry', metabolic heat production measurement by (rat), 150, 583
- Interneurones, acidic amino acids activation of (cat) 150 657
  - , ammobitivite acid and  $\beta$  alanme de pression of (cat) 146 187
  - spmal reflex activity affected by state of (cat) 151, 112
  - spinal rigidity and (dog) 146 596
- types in lumbosacral cord of (cat), 154, 89 Internodal length, conduction velocity in nerve relation to (trout) 136, 606
- Interosseous nerve, sensory receptor fibres m (cat) 153 78
- Intestinal active transport, diet effect on (rat) 146 10P
- Intestinal capillary permeability, abdominal radiation effect on (rat), 148
  \*2P
- Intestinal contractions, post-activation potentiation of (car), 148 443
- Intestinal distension, temperature reduction effect on response to (guinea-p.z) 137, 399
- Intestinal 5-HT, diet and antibiotics action on (rat), 137 63P
- Intestinal motility, vago-ragal reflex m volving (cat), 148 -24
- Intestinal mucosa, pressure effect on 5-HT release from (gamea-pig) 146, 18 eignificance of desquamation of (T) 139, 8P
- Intestinal peristalsis, 5-HT 5-HTP and recorping action on (gamea-pig), 146,
- Intestinal pressure, refer contraction of longitudinal cost elected by (gumeapig) 146-371
- Intestine, amino ands concentrat on effect on rate of absorption from (rat) 149 +33

- Intestine, competition between enantio morphs of amino acids in absorption by (rat), 145, 57
  - chemical transmitter release from sym pathetic nerves to (cat), 143, 41 dipeptides absorption by (rat, dog), 145.
  - 48

    Direction in a transport of state by fact
  - D methionine transport in vitro by (rat), 144, 21 P, 151, 51
  - glucose absorption from (dog), 135, 581

    10nic environment effect on sugar trans
  - port by (toad), 151, 59
    morphine inhibition of stimulants to
  - (guinea pig), 149, 77P
    phlorrhizin site of action in inhibiting
  - glucose absorption by (rat), 148, 83 reserpine effect on response to nerve stimulation of (rabbit), 147, 31 P
  - short chain fatty acids transfer in isolated (rat), 141, 73
  - short chain fatty acids transfer in vitro by (rat), 136, 39 P
  - sympathetic transmitter release from (cat), 140, 22 P
  - thyroid hormone reabsorption by (rat), 136, 199
  - triethyltin sulphate effect on transport and metabolism of (rat), 148, 117
  - water transfer in different parts of (rat), 149 78 P
- Intra-abdominal pressure, increased re spiratory resistance effect on (man), 136, 556
- Intra-amniotic pressure, measurement without internal catheterization of (man), 137, 3P
- Intracarotid hypertonic injection, milk ejection response to (dog) 152, 520
- Intracarotid injections, oxytocin liberation following (rabbit) 152 384
- Intracellular action potentials, ACh effect on conduction velocity in atria and on (rabbit), 140, 333
- Intracellular concentration, cryoscopic measurement of (rat, guinea pig), 143, 236
- Intracranial vagotomy, vagus nerve stimulation effects affected by (cat), 135, 186
- Intrafusal muscle fibres, action potentials of single (frog), 137 193
  - electrical activity of (cat), 150 169 junctional potentials of (frog) 139, 15 morphology of (cat), 153 28 P
- Intrafusal potential, sensory discharge facilitation relation to amplitude of (cat), 150, 187

- Intramuscular sensory nerves, propaga tion of impulses in (cat), 148, 240
- Intra-ocular pressure, ATP effect on (rabbit), 147, 419 aqueous humour formation and outflow
  - resistance in living eye affected by (rabbit), 143, 11 P
  - corneal light-scattering affected by, 136, 282
  - pre and post ganglionic section of cervical sympathetic affecting (cat, rabbit), 152 437
  - superior cervical ganglionectomy affecting (rabbit), 147, 58P, 152, 447
- Intrapulmonary pressure, heart rate relation to (man), 144 545
- Intrapleural pressure, intra oesophageal pressure comparison with (man), 136, 12
  - intratracheal and intraoesophageal pres sures relation to (goat), 142, 505
- Intraretinal recording, excitation pools and (frog), 149, 340
- Intrathoracic receptors, vasoconstrictor tone release in muscle on stimulation of (man), 137, 53 P
- Intrathoracic venous pressure, skeletal muscular vasoconstrictor tone affected by (man), 139, 369
- Intravascular infusion, apparatus for use in conscious animals of (rat), 153,
- Intravascular pH, device for continuous measurement and recording of (T), 154, 55P
- Intraventricular tubocurarine, pento barbitone and chloralose influence on effects of (cat), 138, 187
- Inulin clearance, pregnancy effect on (rat) 151, 385
- Invertebrate muscle, drugs action on (Mytilus edulis), 142, 41 P
- Invertebrates, physiologically active cho line esters in, 139, 434
- Iodide, mammary gland concentration of (mammal), 135 644
  - salivary glands concentration of (mam mal), 145 595
  - skeletal muscle membrane resistance af fected by (frog) 146 120
  - small intestine transport in vitro against a concentration gradient of (rat), 147, 260
  - skin concentration of (rat) 148, 62P stress effect on release from thyroid gland of (guinea pig) 151, 42
- Iodoacetate, adenine uptake by erythro cytes affected by (man) 154 619

Iodoacetate, after potentials in skeletal muscle fibre affected by (frog), 142, 85

ascites tumour cell sodium transfer af fected by (mouse), 140, 87

histamine release by antigen and histamine liberators affected by (guinea pig), 135, 303

platelet uptake of 5-HT affected by (man), 146, 482

skeletal muscle distribution of <sup>14</sup>C-adenine nucleotide after treatment with (frog), 150, 363

sodium efflux from sodium loaded muscle affected by (frog) 148, 369

sodium ion secretion by skeletal muscle affected by (frog), 148, 63

tarna coli electrical and mechanical ac tivity affected by (gumea pig), 136, 317 uterine segments active ion transport affected by (rabbit, cat) 154, 451

Ion exchanges, localization in uterine segments of (rabbit), 154, 429

Iproniazid, effects of intraventricular (rat), 153 47P

Factor I content of brain affected by (rat), 183 426

histamine catabolism in brain affected by (cat) 152 303

Irin, preparation, purification and nature of (rabbit) 146 255

properties and actions of (mammal), 135, 114

rapid purification and hamster colon use in assay of 138 6P

unsaturated hydroxy fatty acids showing activity like 147, 28 P

unsaturated nature and interaction with lactones of 140 24 P

Iris, irin extraction from (rabbit), 135, 114 supersensitivity to noradrenaline of denervated (cat) 147 136

"Iron, erythrocyte life span studied by (rat) 146 221

Iron absorption, factors affecting (man), 137 54 P

Iron deficiency, cytochrome c content of heart and skeletal muscle in (rat), 154, 58 P

Iron wire model, hyperpolarizing re sponses in 148 329

Isolated kidneys and suprarenals, se parate and combined perfusion of (dog)
(T) 148 1P

Isolated perfused heart, extracellular space of (rat) 149 15P

Isolated tissue preparations, simple automatic apparatus for repetitive stimulation of (T) 136 6P

Isometric contraction, A band length affected by (frog) 144, 416

Isometric tension-length curve, plam muscle resting tension and (Mytilus), 141, 399

Isometric tetanus, calculation of rise in tension in (frog), 143, 521

Isoniazid, intestinal mucosa 5 HT content and release after reserpine affected by (guinea pig), 146, 44

Isoprenaline, breathing under chloralose affected by (cat), 141, 42P

depolarized plain muscle response to (various), 143, 480

skeletal muscle contractions affected by (cat) 144, 92

Isopropanol, odour threshold affected by self adaptation to (man), 139, 13

Isopropyinoradrenaline, circulatory, me tabolic and respiratory effects of (man) 141, 40 P

circulatory, respiratory and metabolic responses to (man), 151 539

isolated nictitating membrane response to (cat) 141, 53

Isotonic contraction, characteristics of plain muscle (molluses), 141, 386

Isotonic twitch, A band length affected by (frog), 144 416

IS spike potential, threshold depolariza tion for initiation of (cat), 139, 237 time course of (cat) 139, 209

Jerkin plethysmograph, use with re spiratory analyser of (man), 151 6P

Joints, decerebration effect on facilitatory action of impulses from (cat), 147, 573 interaction between muscles controlling hip and knee (cat), 144, 271

Joint movement, muscle tension effect on threshold of appreciation of (man), 143, 60

Junctional potentials, crustacean muscle fibres showing 143, 407

inhibitory nerve stimulation affecting (crustacea) 143 433

mtrafusal muscle fibres showing (frog) 137, 199

intrafusal, twitch and slow fibres comparison of (frog), 139, 15

Kailidin, serum kallikrein and plasmin release of (guinea pig) 152 79

Kallikrein, assay in urine of (man) 142

estimation in urine of (man), 148 267 urokinase comparison with (man) 149 477

- Ketonuria, anti insulin serum production of (rat), 153, 154
- Kidney, acid base balance effect on citrate content in (rat), 149, 415
  - adrenal corticoids effect on excretion of acid and potassium by (man), 146, 34P
  - adrenaline, noradrenaline and isoprenaline effect on excretion by (rat), 140, 57P
  - aldosterone and neurohypophysial hor mones interactions on isolated (cat), 152, 206
  - antidiuretic activity of vasopressin de struction by fractions of homogenate of (pig), 141, 107
  - cation content of (rat), 138, 36P
  - <sup>14</sup>C glucose effect on <sup>14</sup>CO<sub>2</sub> in blood entering and leaving (dog, monkey), 147, 491
  - excretory powers in foetus of (guinea pig), 141, 327
  - glycolysis and potassium transport in slices of new born (mammal), 153, 15P
  - haemorrhage effect on vasoactive sub stances from (rat), 143, 222
  - Henle's loops and sodium content of medulla in (mammal), 147, 48 P
  - high water intake effect on concentrating ability of (man), 139, 42
  - histamine uptake from blood by (rat) 147, 441
  - hydrocortisone, DOCG and aldosterone action on Na, K and acid excretion by (man), 151, 312
  - ketone excretion in post-exercise ketosis by (man), 146, 51 P
  - low sodium diet effect on water and electrolyte content of (rat), 142, 58 P
  - method of separating glomeruli from (T), 138, 8P
  - oestrogen and progesterone action on inulin and PAH clearances in (rat), 154, 42P
  - oxytocin and vasopressin action on (dog), 142, 468
  - phlorrhizin excretion by (dog), 146, 567 post-pituitary hormones action on activity of uterus and (dog), 144, 80
  - posture effect on water and electrolyte excretion by (man), 139, 337
  - potassium deficient diet effect on water and electrolyte content of (rat), 143, 73 P
  - pressor activity of vasopressin excretion by (rat), 138, 13
  - protein reabsorption in (rat), 148 1
  - renin location in (rabbit), 135, 46P 143, 78P, 149, 526

- Kidney, resting membrane potentials in isolated (cat, guinea pig), 139, 181
  - stilboestrol effect on (dog), 145, 225 stop flow technique use with (dog), 144,
  - 19P temperature effect on sodium and po
  - temperature effect on sodium and potassium transport in slices of (dog), 142 208
  - thiourea excretion by (dog, man), 145, 22 urea reabsorption by (rat), 140, 34P
  - uterine distension effect on excretory function of (dog), 141, 527 water reabsorption in (rat), 137, 64P
- Kidney cortex slices, metabolism of new born (mammal), 153, 364
- Kidney slices, factors affecting water con tent in recovery from anoxia of (rat), 136, 585
  - glycerol concentration effect on weight of isolated (rabbit), 145, 54P
  - urea effect on oxygen consumption and water content of (rat), 137, 21P
- Knee muscles, integrative pattern of Ia synaptic actions on motoneurones of hip muscles and (cat), 144, 271
  - monosynaptic excitation of motoneurones of (cat), 137, 27
- Labour, oxytocin and ADH action on uterus during (man), 149, 447
  - plasma kinins affected by (man), 150, 20 P
- Labyrinth, reflex and postural activity of gastrocnemius soleus affected by stimu lation of (man), 146, 37P
- Labyrinthectomy, linear motion perception affected by unilateral (man), 153, 350
  - sensibility to linear acceleration after unilateral (man), 149, 33 P
- Lactation, hypothalamus and (rabbit), 137,
  - mammary gland blood flow during (goat), 153, 496
- Lactic acid, enzymic estimation of L(+)-, 138, 3P
  - glucose absorption from intestine forming (dog), 135, 586
  - nucleosides and erythrocyte production of
  - (man), 154 607
    phlorrhizin action on intestinal production in vitro of (rat), 144, 391
  - small intestine absorption of sugars and production of (rat), 154, 46
- Lactones, pharmacological actions of (rat, hamster), 146, 280
- Lactose, erythrocyte permeability affected by (man) 149, 565

Langendorff heart perfusion apparatus, (rat), 149, 1 P

Langendorff preparation, pressure effect on heart and perfusion rates of, 153, 18 P

Large intestine, peristalsis in vitro of (gumea-pig rabbit), 148 63 P

tissue 5 HT and urine 5 HIAA affected by removal of (rat), 153, 241

Laryngoscope, easily constructed for small animal use (rat, mouse), 143, 32P

Latent period, hypertonic solutions effect on skeletal muscle (frog) 144, 169

Lateral column stimulation, intraspinal focal potentials initiated by (frog), 150, 634

Lateral geniculate body, absolute visual threshold recorded from (cat), 146, 179 binocular stimulation effect on patterns of discharge of single units of (cat), 140,

optic nerve section effect on histology of (monkey) 143 3P

recovery of responsiveness in sensory synapses of (cat) 150, 214

single unit activity in (cat), 154, 206 single unit activity in conscious animal

of (cat) 150, 95 Lateral geniculate neurones, synaptic potentials, after potentials and slow

rhythms of (cat) 154 513
Latissimus dorsi muscles, action potentials from anterior and posterior (chick), 153 19 P

Lattice theory, light scattering in cornea and 136 275

Lecithin, cobra venom action in producing pharmacologically active substances from 136 137

Left auricular pressure, pulmonary ar terial pressure flow relationship affected by (cat) 136 116

Left lung, method for perfusion of (cat)

Leg exercise, arm blood flow affected by (man) 137 294

hepatic blood flow affected by (man) 137

\asomotor reactions in forearm and hand during (man) 152 17 P

Leg volume meter (man) 149 6P

Lens, age variation of transmissivity of living (man) 145 45P

Lens capsule, specific deposition of chemical substances on 146 28 P

Leptomeningeal collateral circulation (Macacus rhesus) 154 67 P extent of (dog) 154 1 observations on (dog) 149 79 P

Leucocytes, pyrogen liberation by (rabbit), 152, 51 P

Light adaptation, reversal of 'on' and 'off' discharges by (cat), 137, 342

single unit response in optic lobe to (locust), 154, 480

Light intensity, single unit activity in lateral geniculate body affected by (cat), 154, 208

Light substitution, retinal stimulation by (man, frog), 149, 288

Lillie's model of nerve impulse, convenient modification of, 148, 1P

Limb blood flow, hypoglycaema and sympathectomy effect on (man), 139, 97

Limb-bone rudiments, growth hormone and insulin effect on (chick), 144 490 thyroid hormones metabolism in vitro by (chick), 144, 250

Limb temperature, factors affecting (mammal) 141, 420

Limb vascular resistance, carotid artery compression effect on (man), 139, 377

Linear motion, experiments on perception of (man) 149 33 P 154 71 P

unilateral labyrinthectomy effect on per ception of (man) 153 350

Lipid, ervthrocyte age effect on content of (man), 143, 328

Lipid-soluble substances, removal rate from anterior chamber of eye of (cat) 151 207

Lithium, cardiac muscle response to sub stitution of sodium by (frog), 143, 488 erythrocytes' sodium affected by (man) 145 648

non medullated fibre post-tetanic hyper polarization affected by (rabbit) 136 87 renal cortex water and cation content affected by mcubation with (rat) 143 288

skeletal muscle permeability to (frog) 147 626

sodium efflux from muscle with sodium replacement by (frog) 147 593

Lithium flux, calcium effect on ervthrocyte (man) 149, 570

Liver, <sup>11</sup>C glucose effect on <sup>11</sup>CO<sub>2</sub> in blood entering and leaving (dog monkey) 147 489

<sup>14</sup>C labelled chylomicron fat after intra venous injection uptake by (rat), 140 264

equivalent plasma volume of (dog), 149

fructose metabolism in foetal and neo natal isolated perfused (sheep) 153 199 Liver, histamine formation in foetus by (rat), 151, 132

msulin effect on blood flow and meta bolism of (rat, baboon), 144, 52

mercaptomerm effect on water and cation content of slices of (rat), 143, 292

phlorrhizm excretion by (dog), 137, 18P pressor activity of vasopressin affected by (rat), 138, 15

protein bound sulphobromphthalein up take by (mammal), 143, 49 P

resting membrane potentials in isolated (cat, guinea pig), 139, 181

thyroid effect on cholesterol synthesis by (mammal), 144, 361

thyroxine and triodothyronine excretion by (rat), 135, 426

thyrovine effect on cholesterol and fatty acids synthesis by cell free fractions of (rat), 154, 145

Liver blood flow, hepatic artery ligation effect on (rat), 139, 168

partial hepatectomy effect on (rat), 136, 287

spleen and hepatic artery in regulation of (rat), 136, 60

Liver blood flow and metabolism, insulin and glucose effect on (rat), 150 588

Liver carbohydrate, birth effect on (rat), 153, 459

foetal age relation to (sheep, monkey), 153, 533

Liver slices, age effect on critical oxygen concentration of (kitten), 138, 44 P

Load-tension relation, pregnancy effect on cervical (rat), 148, 531

Lobeline, adrenocortical pathway of protection from pulmonary oedema by (rat), 137 79 P

respiration affected by (rabbit), 145, 89 Local tetanus intoxication, anaesthesia

and (rat), 141, 40P

Locust, femoral mechanoreceptors in, 147, 8P

single unit discharges in optic lobe of, 154, 478

visual responses transmission in nervous system of, 146, 492

Loop time, variation in different muscles of (cat), 147 401

Loudness recruitment, unlateral deaf ness and (man) 137 355

Lumbosacral cord, neurone types in and around intermediate nucleus of (cat), 154, 89

Lumbo-sacral cord isolation, fast and slow leg muscles differentiation affected by (cat), 150, 410 Lumbo-sacral cordisolation, nerve cross union of fast and slow leg muscles affected by (cat), 150, 427

Lumbar subarachnoid space, tilting effect on pressure in (dog), 151, 31 P

Lund, instruments and appliances recently designed and made at University of (T), 154 2P

Lungs, blood pressure flow relationship in (cat), 138, 105

bradykının effect on isolated perfused (dog), 154, 57P

bronchial and arterial constriction effects on alveolar gas concentration in lobe of (dog), 146, 49 P

capillary blood flow and volume and diffusing capacity during rest and exerouse of (man), 146, 5P

death effect on pressure volume relation ships in (rabbit), 149, 178

elastic pressure volume curves of living (rabbit), 138, 474

evaporative heat loss from (calf), 136, 404

helium and sulphur hexafluoride in assess ment of diffusive mixing in (man), 148, 72P

method for administering micromicellar aerosols to isolated (guinea pig), 135, 14P

oedema fluid formation in perfused (rab bit), 142, 292

15O compared with <sup>16</sup>O<sub>2</sub> uptake in (man),
 148 17P, 152, 325

radioactive carbon dioxide uptake by (man), 154, 12P

slow reacting substance in anaphylactic shock released from (mammal), 151, 416

smooth muscle activity in (frog) (T), 154, 57 P

stress relaxation in (man) (T), 135 57P, (rabbit), 146 85

vascular receptors in (dog), 148 30P

ventilation under standardized breathing conditions of (man) (T), 154, 5*P* Lung blood volume, blood flow relation to

(cat), 136, 116 Lung carbohydrate, foetal age relation to

(sheep, monkey) 153 535 Lung compliance, determination of (man),

136 8 (mammal). 141

histology relation to (mammal), 141, 20 P

negative and positive pressure breathing effect on (man) 144, 14P

pulmonary congestion and oedema effect on (cat, rabbit), 142, 306

- Lung denervation, hypoxia action on heart rate affected by (dog), 144 156
- pulmonary arterial pressure reflex re sponses affected by (cat), 137, 454
- Lung diffusing capacity, age, body size and lung volume effect on (man), 146, 572
- Lung function, nitrogen meter for investigation of (T), 147, 41 P
- Lung inflation, new born response to (man), 151, 551
- pulmonary vasoconstructor response to forced (cat), 144, 26P
- Lung pressure, air flow and chest volume relationship to (man), 145, 462
- Lung volume, anaesthesia and muscular paralysis effect on (man) 136, 11
  - expiratory resistance effect on (man), 135 40P
  - mverted position effect on alveolar capillary diffusion and (man), 153, 71P
  - measurement of airway resistance and (T), 147, 41P
  - positive pressure inflation compared with increased respiratory resistance effect on (man), 136, 565
- Lymph, composition of mammary gland (goat) 153, 513
- Lymphatics, in vivo radiography demon stration of peritoneal drainage into diaphragm (T), 153, 1 P
- Lymphocytes, daily replacement factor of (guinea pig), 136 229
- recirculation from blood to lymph of (rat)
  143 84 P 146. 54
- Lymphopenia, pituitary stalk section effect on stress induced (rabbit) 136
- Lysergic acid diethylamide, lateral geni culate neurones synaptic and after potentials affected by (cat), 154 525
- Lysolecithin, plain muscle affected by (guinea pig) 136, 140
- Macrophages, dental tissues of young rats containing (T) 152 50 P
- Magnesium, axon electrical properties affected by (squid) 137 240
  - calcium antagonism at neuromuscular junction to (frog) 138 435
  - (squid) 138 264
  - cations excretion and balance affected by prolonged intravenous infusions of (man) 143 300
  - electroplate membrane potentials affected by (ray) 142, 267

- Magnesium, erythrocyte permeability affected by (man), 149, 569
  - gly cerol extracted muscle fibres affected by (rabbit), 135, 34
  - medullated nerve fibre affected by (frog), 142, 360
  - neuromuscular transmission affected by (stick insect), 138, 133
  - skeletal muscle contraction affected by (rat) 151, 566
  - slow muscle fibres responses affected by (frog), 135, 515
  - spermatozoa motility affected by (dog), 142, 494
  - ventricular fibrillation affected by (rab bit), 141, 371
- Mammary glands, androgens and oestro gens effect after hypophysectomy and injected thyroxine, insulin and cortisone on (rat), 154, 3P
  - blood flow and oxygen, glucose and volatile fatty acid uptake in conscious animal by (goat), 153, 492
  - factors affecting milk secretion by isolated perfused (goat), 154, 546
  - nodide concentrating mechanism of (mam mal), 135, 644
  - lymph flow and composition from (goat), 153 510
- Mammotrophic substances, male breast response to (mouse), 141, 27 P
- Mandibular incisor, changes in cell density along growth axis of pulp of continuously growing (rabbit), 151, 33 P
- Manometer, electrical indicator for mercury U tube (T) 135, 36P
  - low fluid pressures continuous recording by (frog) 137, 5P
- minimal movements of fluid in 147, 1P Mantle, innervation of (Mya) 143 555
- receptor units in (octopus) 153 573
  Marine dastropode, physiologically activities
- Marine gastropods, physiologically active choline esters in, 139 434
- Marsilid, 5 HTP action on intestinal peri stalsis affected by (guinea pig, rabbit), 140 394
- Mass spectrometer, rapid and continuous gas analysis by, 137 33 P
- Mast cells, amino acid decarboxylases of (mouse) 143 7P
  - anaphylaxis and (guinea pig) 140  $\,6P$   $\beta$  irradiation of skin effect on (rat), 136
  - 5 hvdroxytryptamine and (rat) 137
  - foetal and new born content in skin of (rat), 147, 147

Mast cells, histamine and 5 HT in (rat, mouse), 139, 9P, 141, 510

octylamine and antigen effect in sensi tized tissues on (guinea pig), 147, 425 polymyxin B action on tissue (rat), 135,

Masticatory muscles, electromyographic studies on (man), 137, 36 P

Mating behaviour, oestrogens effect in spayed female on (cat), 138, 46P

Maximal isometric tetani, temperature effect on (cat), 148, 25P

Max-Planck respirometer, modified sampling system for, 149, 11P

Mechano-receptor effect, cerebellum showing (frog) 144, 26

Mechanoreceptors, afferent C fibres from (cat), 152, 337

conduction velocity in fibres from gastro intestinal (cat), 142, 119

femoral (locust) 147, 8P

properties of skin (frog), 141, 305

rapid mechanical events in (cat), 141, 198 small intestine mucosa containing (cat), 139, 353

Median eminence, pituitary stalk section effect on volume of (rabbit), 136–333 stalk section effect on volume of (rabbit), 135–47*P* 

thyroid activity affected by stimulation of (rabbit), 143, 254

Medulia, cardiovascular responses to stimu lation of (cat dog), 141, 500

heat sensitive region located in (cat), 142, 55P, 152, 93

visceromotor reflexes influenced by centres in (cat), 141, 495

Meduliary emetic chemoreceptor zone, intraventricular adrenaline action af fected by ablation of (cat), 147, 172

Medullated nerve fibre, calcium and magnesium action on (frog), 142, 360 calcium effect on (frog), 137, 245

functional activity measurement in whole nerve of specific groups of (rabbit), 138, 19

membrane currents under voltage clamp conditions in (frog), 143, 76

membrane resistance and conduction velocity in (Xenopus) 148 675

steady state in activation of sodium permeability in (Xenopus), 148 669

Megaloblastic anaemia of pregnancy, vitamin B<sub>12</sub> folic acid and ascorbic acid of bone marrow cells in (man) 149, 36 P

Melanophore-expanding hormone, me thods of assay of (T) 147 38 P

Melanophore-expanding substances, blood containing (man), 152, 459

Membrane constants, temperature effect on mammalian muscle (cat), 147 453

Membrane current, voltage clamp changes at node of Ranvier effect on (Xenopus laevis), 148, 190

voltage clamp on nerve fibre effect on (frog), 143, 83

Membrane depolarization, <sup>45</sup>Ca entry into giant axon affected by (squid), 138, 265

Membrane potential, acetylcholme effect on taema coli (guinea pig), 143, 171

acetylcholine desensitization' of motor end plate affected by (frog), 138, 71

caesium and rubidium effect on skeletal muscle (frog), 138, 149

calcium effect on (frog), 137, 247

calcium effect on relation between sodium conductance and axon (squid), 137, 222

chromatolysis effect on motoneurone (cat), 143, 13

flux ratios of K and Cl relation to (Chara globularis), 144, 515

ions effect on crustacean muscle fibre (crayfish), 142, 520

isolated tissues showing (cat, guinea pig), 139 178

magnitude in plain muscle of (guinea pig), 141, 464

method for recording in isolated midelinated nerve of (frog), 135, 550

motoneurone spike potentials and (cat), 139, 225

muscle contraction coupling with (crus tacea), 143, 441

plain muscle spike potentials affected by changes in (guinea pig), 135, 415 potassium and chloride influence on single

muscle fibre (frog), 148, 127 potassium chloride movement in skeletal

potassium chloride movement in skeleta muscle and (frog), 151, 154

relation between tension developed in potassium contracture and (frog), 153, 389

resting and active electroplate (ray), 142 251

skeletal muscle resting (rat), 135, 530 sodium and calcium ion effects on tension relation in heart to (frog), 143 496

sodium ion secretion by skeletal muscle relation to (frog) 148 71

sudden changes in ionic concentration effect on single muscle fibre (frog) 153 370

- Membrane resistance, amons effect on skeletal muscle (frog) 146 117
  - illumination effect on visual cell (Li mulus) 148 20
  - miniature end plate potential amplitude relation to (frog), 137 271
  - partial denervation of skeletal muscle effect on (frog), 151 14
  - potassium action on medullated nerve (Xenopus) 148 677
  - spinal motoneurone (cat), 145 509
- theoretical treatment of illumination effect on visual cell (Limilus), 148, 35 Menstrual cycle, ovarian hormones ex
- cretion and vaginal epithelium cornification relationship in (man) 135, 50 P
- Menstrual fluid, plain muscle stimulants in (man) 142 48P
  - plain muscle stimulants in extracts of (man) 144 68
- Menstrual stimulant, chemical nature of (T) 152 55P
  - dibutamide antagonism to (man) 149,
- Mental arithmetic, hand blood flow affected by (man), 148, 108
- Mercaptomerin, renal cortex water and cation content affected by (rat), 143, 275
- Mercurial diuretics, renal cortex slices water and cation contents affected by (rat) 143 284
- Mescaline, amine oxidase action on (mammal) 145, 388
- Mesencephalic lesions, active muscle vasodilatation induced by hypothala mic stimulation affected by (cat) 154, 509
- Mesencephalic stimulation, active muscle vasodilatation elicited by (cat) 148, 32 P
- Mesenteric arterial strip, tension length curves of resting (sheep) 154 17
- Mesenteric Pacinian corpuscles, spinal
- pathway of fibres from (cat) 137 74
  Mesonephros, bladder and allantoic fluid
  composition during persistence of (rab
  bit pig) 151 472
- Mesopic spectral sensitivity, analysis of (frog) 149 308
- Mesopic state, silent substitution in (frog)
  149, 332
- Metabolic heat production, measurement in conscious animals of liver (rat) 150 582
- Metabolic inhibitors, histamine release by antigen and histamine liberators af fected by (guinea pig), 135-303

- Metabolic inhibitors, intestinal plain muscle electrical activity and tension affected by (guinea pig), 135, 15P
  - passive sensitization affected by (guinea pig), 150, 552
  - sodium flux in sodium loaded muscle affected by (frog), 148, 362
- Metabolic rate, body fat effect on cold and warm water action on (man), 154, 329
  - body size, temperature and age effect in young on (pig) 154 408
  - comparison of four means of expressing (rat), 150, 694
  - maturity, environmental temperature and body size effect on hypoxia action on (cat guinea pig) 149, 346
  - subcutaneous fat effect on response to body immersion in cold water of (man), 153 172
  - temperature coefficient in hypoxia in new born of (cat) 149 513
- Metabolism, fasting and refeeding effect on (rat) 154 219
  - temperature reduction effect on new born (pig), 147 124
- Metabolism studies, device to facilitate in small restless wild mammals, 151, 8P incubating chamber for 147, 5P
- Metabolism tray (cat) (T), 136, 23P
- Metamorphosis, oxygen consumption during (amphibia) 145 353
- Metanephros, function in foetus of (rab bit pig), 151 479
- Metatyrosine, awakening effect after reser pine of (mouse) 151 277
- Methacholine, arterial occlusion effect on sweat gland response to (man), 148 614
  - gastric secretion affected by (guinea pig) 142 235
- sweat glands affected by (man) 148 590 Methantheline, ACh action on plam muscle affected by (Mytilus) 148, 457
- Methionine, concentration effect on rate of intestmal absorption of enantiomorphs of (rat) 149 433
  - intestinal transport in vitro of D isomer of (rat) 144 21P
  - histidine competition in intestinal ab sorption of (rat), 145 59
  - histidine enantiomorphs in competition with intestinal absorption of enantio morphs of (rat) 142 51 P
- Methyl diethylthiourea, urme flow relation to clearance of (dog) 145 29
- Methyldopa, brain and intestinal 5 HT affected by (mouse) 148 18 P

Methylene blue, muscle spindle staining by (cat) 144, 10P

Methylhistamine, brain formation of (cat), 149 38

plasma oxidation of (mammal), 148, 568 Methylpentynol, activity affected by (rat), 137 88P

alcohol drinking and water metabolism affected by (rat), 144 138

learning affected by (rat), 142, 30P water metabolism affected by (rat), 142,

Methylsulphate, skeletal muscle potentials

affected by replacement of chloride by (frog), 151, 92

Methylthiourea, urine flow relation to clearance of (dog, man), 145, 26

Mevalonic acid, cholesterol synthesis by liver from (mammal), 144, 364

Microcalorimeter, method for mixing fluids in, 152, 8P

Micro-electrodes, mounting for intra cellular recording from contracting muscle of 147 3P

Micro-incineration technique, logical investigations and (T), 154, 57 P

Micro-pH electrode system, routine laboratory use of, 135, 1P

Microscope micrometer, accurate par ticle size analysis by double image (T), 147, 41 P

Microscope slides, field locating device for (T), 142, 47P

Microtome, electronically controlled con stant velocity, 147, 33P

Micturition, external urethral sphincter activity in (cat) 149 653

Mid-brain, active muscle vasodilatation on stimulation of (cat) 154 492

Middle ear, decompression chamber effect on pressure in (man), 147, 43P

Milk, factors affecting production by 180 lated perfused mammary gland of (goat) 154 546

mammary gland blood flow relation to yield of (goat) 153, 499

mammary gland lymph flow relation to vield of (goat) 153, 512

thyroxine binding protein in (rabbit). 151, 71

yield and composition in first and second lactations of (T) 139 27P

Milk ejection, oxytocin and intracarotid ACh effect in unanaesthetized animal on (dog) 149, 41P

oxytocin dosage relation to (dog) 152 519 Milk yield, mother weight effect on (rab bit) 137, 412

Miniature chart recorder, 145, 21 P Miniature end-plate potentials, acetyl choline sensitivity and (rat), 151 25 adrenaline action on (rat), 141, 298

factors determining amplitude of (frog).

137, 267

focal and diffuse (chick), 150, 708 giant potentials relation to (rat) 136, 595 intercostal muscle fibres showing (man), 154, 602

partial denervation effect on (frog), 151,

Mitochondria, chromaffin granules separa tion from enzymes of (ox), 139, 316 endoplasmic reticulum relationship to (mouse), 153, 58P

5 HT storage granules and (dog), 145, 473 Mollusc, transmission through ganglia in (Mya), 143 553

Molluscan muscle, ACh and 5 HT action on (Mytilus edulis), 152, 236

innervation and activity of (Mytilus edulis), 152 220

Monkey, bacterial stress effect on thyroid gland activity in, 144, 239

Monosynaptic connexions, demonstra tion in spinal cord of (frog), 150 638

Monosynaptic discharges, method of re cording effect of conditioning volleys on (T), 154, 5P

Monosynaptic excitatory action, group I volley relationship to (cat) 136 531

Monosynaptic excitatory post-synaptic potentials, afferent volley interval effect on (cat), 150, 375

Monosynaptic paths, changed moto neurone function causing development of new (cat), 152, 29P, 154, 68

Monosynaptic patterns, motoneurones regenerated to antagonistic muscles and changes in (cat) 154, 68

Monosynaptic reflexes, acetylcholine and nicotine action on (cat), 136 422

bladder distension effect on (cat), 146, 440

cerebellar anterior lobe action on (cat), 149 629

chromatolysis of motoneurones affecting (cat), 143 17

Factor I and y aminobutvric acid effect on (cat), 150 312

homosynaptic depression following acti vation of (cat) 135, 400

inhibitory post-synaptic potential of motoneurones correlation with latency and time course of inhibition of (cat), 154, 354

spinal rigidity effect on (dog), 146 599

Monosynaptic reflexes, tetanus toxin action on (cat), 135, 657

viral afferent nerve stimulation effect on (ca\*) 140 203

Morphine, autonomic neuro-effector trans n...on mhibition by (guinea pig), 139, 23P

mar cells histamine and 5 HT of tissues affected by (rat), 137 185

p-us altic reflex in fleum affected by (zumea pig), 136–259

por ganglionic sympathetic nerve stumu larion affected by (cat) 149 59 P

preganghome sympathetic activity af ferted by (cat) 150 124

Moth muscle fibres, membrane potentials recorded from 142 20 P

Motoneurones, acidic amino acids effect on (ca\*), 150, 663

ansesthe ics effect on hind limb gamma (ra) 154, 24P

changed monosynaptic patterns after regeneration to antagonistic muscles of (ca\*) 154, 69

correal thresholds for minimal synaptic errion on (cat) 149 24 P

d\_tribution of recurrent inhibition among (cat) 153, 49P

fixation by perfusion or by immersion affecting (monkey), 149 9P

firs' ion me hod and time of fixation after death affecting (monkey) 149 3P

/ ammobutyric and and 2 alanine de Pramon of (cat) 146 190

generation of impulses in (cat), 139–232 group I mustle afferent volley two components synaptic action on (cat) 136, 527

m'erra ive pattern of Ia synaptic actions on hip and knee muscles (cat), 144, 271 interneurone spike duration comparison with (cat) 147 351

intrac-llular recording from chromatol sed (ca\*), 143 11

la ene and time course of inhibition of monographic reflexes correlation with inhibito— post-synaptic potential of (cat) 154–354

munosynap is excitato— afferents con Victories on (ca\*) 137 22

Po Antials and thresholds of (car) 139,

Frozere and atropire action on (cat), ential fields in instead during mono-

the all muse's speed afferred by (cat), 150 417

Motoneurones, surplus excitation in reflex action of (cat) 154 288

tendon organ afferents synaptic actions on (cat), 138, 227

tetanus toxin action on inhibition of (cat)
135, 655

time courses of inhibitory and excitatory synaptic actions at (cat) 145, 529

Motoneurone membrane, electrical con stants of (cat) 145 505

Motoneurone spike potentials, interpretation of (cat), 139, 198

Motor activity, registration and evaluation of (mouse), 151 274

simple inexpensive apparatus for re cording and integrating (mouse) (T), 149.9P

Motor axon, discharge of impulses along (cat) 139 232

motoneurone action potential relation to conduction velocity of (cat), 142, 281

Motor cortex, positive extracellular spikes in antidromically activated (cat) 149, 23P

Motor cortex stimulation, β-hvdroxv-/ ammobutvic acid action on seizure following (dog), 145-573

Motor end-plate, acetylcholine 'desensitization of (frog), 138 63

repetitive nerve stimulation desensitization of (rat) 148 657

tubocurarine quantitative antagonism to carbachol and ACh at (frog) 152 309

Motor nerves, acetylcholine in regenerating (cat) 154 69P

acetylcholune effect on regenerating (rabbit) 145, 623

Motor nerve fibres, back response m (cat) 150 332

range of normal conduction velocity to hand and foot small muscles (T), 140, 53P

Motor systems, frequency of fluctuation in different (man), 145, 590

Motor unit, contraction time in fast and slow muscles of (cat), 142 285

sure and distribution in disphragm of (rat) 140 427

Mountain-sickness, potassium depletion and (T) 143, 36P

Mount Everest expedition, muscular exercise studies on (man) 141 233

Mount Everest, physiology on (Film) 135, 5P

resting ventilation and alveolar air on (man) 135 590

Mouth, reflex semulation of parotid gland secretion from (ruminants), 144-466

MRC prototype sledging rations (T). 135, 6P

Mucosal mechanoreceptors, small in testine containing (cat), 139, 353

Mucin, phosphate turnover in phospholipid and secretion by salivary gland in vitro of (rabbit), 135, 18

Multiple innervation, properties of skele tal muscle with (birds), 154, 580 Muscarine, vagus excitatory action on

atria and (rabbit), 142, 180 Muscle, internal pH of (crab), 142, 22

isotonic and isometric recording apparatus for, 142, 42P

Muscle afferent fibres, dorsal root re flexes in 153, 48P

interneurones monosynaptically activated by (cat), 154, 91

Muscle afferent volley, motoneurones affected by two components of group I (cat), 136 527

Muscle blood flow, emotional stress effect on (man), 149, 61P

strain gauge plethysmograph measure ment of skin and (man) 140, 318

venous temperature indicator of (cat), 145, 20P

Muscle contracture, internal pH affected by (crab), 142, 31

Muscle fibres, electrical recovery in skeletal and cardiac (frog), 145 4P sodium and potassium movements in single (T), 143, 61P

Muscle spindle, cholmesterase location in extraocular (man) 153, 523

classification of endings of (cat) 154 25P

cooling effect on (cat), 153 218

dekatron scaler recording discharge of single (mammal) 153 3P

diameter and distribution of nuclear bag and nuclear chain muscle fibres in (cat). 153, 23P

early discharge at onset of contraction of (cat), 147 399

electrical and mechanical factors in adaptation of (cat) 153 209

fast supraspinal control of (cat) 147, 385 y efferent paralysis by procaine indicated by discharge from (cat) 140 421

isolated preparation of (cat), 144 11P

location by intrafusal potentials of (cat) **150** 170

mammalian muscles of differing function containing (T) 138 9P

methylene blue technique for staining of (cat), 144 10P

motor nerves to (rabbit) 149 120

Muscle spindle, primary and secondary endings of (mammal), 153, 8P

procame on nerve affecting (cat), 135 256

secondary endings in (cat), 149 27P sensory terminations in (frog), 152 13P simple and compound (cat), 145, 55P (T), 149, 9P

spinal reflex regulation of efferent supply to (cat), 143, 195

sympathetic stimulation effect on (cat), 151, 332

tandem (cat, frog), 154 23P

transfer function relating deformation to impulse frequency for (frog) 144, 16P two types of efferent fibres to (rabbit), 143. 54P

ultrastructure of (frog), 137, 6P

Muscle spindle control system, electro mechanical analogue of (T), 142, 1P

Muscle spindle discharges, motor regu lation of (cat), 150, 186

Muscle stretch receptors, antidromic stimulation effect on (cat), 148, 252

Muscle tremor, loading effect on fre quency of (man), 149 29P

Muscle twitch, pressure receptors affected by (cat), 152, 257

dynamics of (frog), 143, 104

Muscular activity, influence of afferent and descending pathways on (man cat), 146, 1

tubocurarine in cerebral ventricles effect on (cat), 149, 62

Muscular contraction, dynamics of (frog), 143, 104

local temperature influence on successive sustained (man), 136, 12P

Muscular fatigue, factors affecting re covery from (man), 147, 162

Muscular paralysis, lung volume affected by (man) 136 11

relation of potassium deficiency to insulin induced (rat), 141 377

Muscularis mucosae, mechanoreceptor stimulation by activity of (cat), 139, 364

Myanesin, fusimotor neurone discharges affected by (cat) 143 202

Myasthenia, delayed increase of neuro muscular block in a series of faradiza tions of motor nerve in (man), 140 3P

Myelinated cutaneous afferent fibres, analysis of fibre diameter and receptor characteristics of (cat) 153 99

Myelinated nerve, quantitative descrip tion of sodium currents in (Xenopus laevis) 151, 491

Myelinated nerve, method for recording resting and action potentials in isolated (frog), 135, 550

rollage clamp technique in investigation of sodium currents in (Xenopus Idevis), 148, 188

Myelin sheath, ultrastructure near nodes of Ranvier of (frog), 135, 56P

Myocardial fibres, amons effect on impulse generation and membrane conductance in (dog, sheep), 147, 16P

Myocardium, blood flow in (rabbit), 154,8P calcium influence on sodium and potassium content of isolated (rat), 143, 14P

Myoclonus, intraventricular injection of Newcastle disease virus causing (cat), 143 68

Myofibrils, quantitative interference mi croscopy applied to cross striated (T), 136, 6P

Myoglobin, carbon monoxide reaction with natural and reconstituted, 136, 27 P

Myometrium, hormonal control during pregnancy of (rabbit), 138, 1

non exchanges in cold of (rabbit), 154, 429 menstrual fluid and endometrial extracts action on (man), 144, 68

staircase effect shown by (mammal), 154, 48P

Myoneural junction, cholmesterase loca tion in (guinea pig), 152, 5P

denervation, muscle immobilization and ischaemia effects on histochemical appearance of cholinesterase at (guinea pig), 136, 8P

electron microscopy of (frog) (T), 142, 1 P nerve degeneration effect on physiology and structure of (frog), 150, 145

ultra structure in amphibian myotomes of (T), 148, 46P

Myotatic loop gain, soleus isometric con traction and (cat), 143, 391

Mythus muscle, active state in, 146, 32P
pharmacological analysis of contractile
mechanism of, 148, 450

Nasal mucous membrane, autonomic regulation of blood vessels of (cat) 137, 37P

Negative after-potential, DDT effect on giant axon (cockroach) 151, 608, 152 122

mechanism of production in giant axons of (cockroach), 151 78

potassium effect on sympathetic C fibres (rabbit) 144, 446

Nepenthes, acid secretion by, 150, 16P

Nephrogenic diabetes insipidus, hyal uronidase and antidiuretic activity in urine following vasopressin injection into (man), 154, 381

Nerve, acetylcholine effect on normal and regenerating (rabbit), 145, 611

acetylcholine excitation of regenerating (rabbit), 140, 51 P

anodal block while monitoring compound action potential of, 143, 42P

conduction velocity relation to fibre diameter and internodal length of (trout), 136, 606

functional activity measurement in spe cific groups of fibres in (rabbit), 138, 19

internal pH of (squid), 142, 44

perfused electrode system for anodal block of, 144, 12P

sodium effect on receptor potential and its (cat), 142, 385

sodium permeability of myelinated and unmyelinated (toad, squid), 152, 159 substance P extraction from (cattle), 149, 34P

subthreshold disturbance propagation in, 148. 80P

Nerve action potential, muscle twitch relation to (cat), 151, 451

Nerve block, finger movement appreciation and execution affected by (man), 143, 55 sodium deficient solutions producing differential (cat), 154, 41 P

Nerve-blocked finger, body heating effect on heat elimination from normal finger and from (man), 138, 446

Nerve cell, voltage current relations in (molluse), 148, 161

Nerve cholinesterase, section and compression injury effect on histochemical appearance of (guinea pig), 137, 86P

Nerve cross-union, changed monosyn aptic patterns on motoneurones after (cat), 154, 68

Nerve degeneration, cation and water changes in (cat), 135, 281

physiological and structural changes at myoneural junction caused by (frog), 150 145

substance P in 149, 35P

Nerve excitability, ischaemia effect on (man) 149, 13 P

Nerve fibres, barum effect on sodium deprived B and C (rabbit) 145, 562

development of myelinated and non myelinated (mouse) 153 40P

membrane currents under voltage clamp conditions in (frog) 143 76 ultrastructure of (frog), 137 6P Nerve fibre diameter, conduction ve locity relation to (trout), 136, 606

Nerve impulse, <sup>45</sup>Ca entry into giant axon during (squid), 138, 263

increase in velocity of (squid), 148, 663 instantaneous frequency meter for recording of, 143, 34 P

Nerve membrane, DDT effect on rectifying properties of (cockroach), 151, 617

two stable states of (squid, toad) 148, 306
Nerve-muscle preparation, foetal whale
thymus gland extract effect on (cat),
144, 24 P

plain muscle (Mytilus edulis), 152 223 Nerve polarization, presynaptic neuro muscular block affected by (rat), 149,

Nerve roots, phenol effect immediate and chronic on (T), 140, 31 P

Nerve volley desynchronization, back response of motor nerve fibres affected by (cat), 150, 335

Nervous conduction, phenol effect on (cat), 150, 565

Nervous system, electronic analogue com puter for investigating theories of functioning of (T) 137, 10 P

Factor I inhibition compared with γ aminobutyric acid and other compounds action on structures in (cat, rabbit), 150, 306

functional characteristics of (giant African snail), 135, 34 P

Neurohypophysis, cytochemical and radio isotope techniques in study of hypothalamus and (T) 150, 1P

maturation of (mammal), 147 200

Neurohypophysial hormones, anaesthe tics and haemorrhage release of (rab bit), 143, 16 P

identification of new (pollock), 152, 56P Neuromuscular block, class demonstration of different types of (chick) (T), 148, 46P

temperature effect on (mammal), 141 425 Neuromuscular blocking drugs, muscle temperature effect on action of (man) 149, 112

Neuromuscular blocking substances, factors influencing action of (T), 136 23 P

Neuromuscular junction, Ca and Mg antagonism at (frog) 138, 435 electron microscopic observations on de

generating (frog), 146, 45P excitation at (crustacea), 143, 403 fine structure of (frog), 150, 134 Neuromuscular junction, inhibition at (crustacea) 143, 426

intracellular recording from muscle with multiple (birds), 154, 582

magnesium and calcium antagonism at diaphragm (rat), 136, 9P

muscle fibres containing several (click) 150, 710

permeability during transmitter action at (frog), 154, 52

Polymyan E action on (rat), 136, 19P presynaptic failure at (rat), 149, 1

properties of regenerating (frog), 154, 190

spontaneous release of transmitter sub stance in multiquantal units at (rat), 136, 595

ultrastructure of (frog), 137, 6P

Neuromuscular propagation, adrenaline action on (rat), 141, 291

cause of failure of (rat), 140, 440

Neuromuscular spindles, innervation of (cat), 140, 14P

Neuromuscular transmission, brain in hibitory factor effect on (crustacea), 139, 81

hydrazinium restoration in Na free solu tion of (frog), 147, 239

nons effect on (stick insect), 138, 119 presynaptic failure of (rat), 148, 56 P

Neurone somata, diverse forms of activity in (crab, lobster), 138, 341

Neurosecretory material, arginine distribution in pituitary gland and (rat), 149, 519

New-born, adrenaline and noradronaline stimulation of heat production in (cat) 154, 49 P

amines in (rat), 147, 144

anoxia effect relation to cardiac carbo hydrate in (mammal), 146 528

anoxia, oxygon consumption and cardiac output in (sheep), 146, 316

anoxia, temperature and breathing in (rabbit), 145, 11P

asphyxia effect on (monkey), 153, 447 baroreceptor reflexes in (rabbit), 150, 201

blood sugars and tissue carbohydrate in (sheep monkey), 153, 527

blood sugar concentration and vital functions in (pig), 136, 208

body size and temperature effect on metabolic rate of (pig), 154, 408

calorigenic activity of catechol derivatives in (cat), 153, 67 P cardiovascular responses in (rabbit), 139,

123

New born, colostrum effect on absorption of globulins by (calf) 147, 22P

colostrum effect on plasma volume and composition of (pig), 145, 547

environmental temperature influence on oxygen consumption of (rat) 151, 22*P* feetus comparison with (monkey), 152,

fructose metabolism in isolated perfused liver of (sheep), 153, 199

gasp in response to lung inflation in (man), 149, 53 P, 151 551

glycolysis and potassium transport in kidney slices from (mammal), 153 15 P

heat production affected by grouping together of (pig) 147, 24 P

heat production in hypoxic (man), 135, 9P

hexamethonium effect on oxygen con sumption and body temperature of (cat) 149,56P

hvaluronidase and antidiuretic activity of urine in (man), 154, 381

hypoxia effect on heat production of (man), 138, 156

hypoxia effect on oxygen consumption and body temperature of (cat), 149 500

hypoxia effect on oxygen consumption of adult and (cat, guinea pig), 149, 352

lung inflation effect on (man), 151 551 noradrenaline calorigenic action and hy

poxia inhibition in (cat), 152, 52P oxygen consumption of (rat), 154 153

oxygen consumption and arterial oxygen saturation in (sheep), 135, 623

orygen consumption and skin and rectal temperatures in (cat), 136 23 P

orygen consumption changes with growth of (pig), 142 57 P

oxygen consumption, hypoxia and en vironmental temperature relation in (cat), 143 64P

potassium excess intake effect on (pig), 141 88

proteinuria in (calf), 148, 468

regional oxygen consumption change during anoxia in (sheep) 143 71 P

reflex respiratory activity in (rabbit), 145,

renal cortex slices metabolism in (mam mal) 153 364

renal function in (guinea pig) 141 323 specificity of intestinal absorption of large molecules by (calf), 148 71P

spermine oxidase in plasma of (goat), 145,

surmal in nitrogen of (rat) 150, 8P, 153 457

New-born, temperature and age effect on metabolism of (pig), 147, 333

temperature effect on oxygen consumption of (monkey), 152, 277

temperature reduction effect on meta bolism of (pig), 147, 124

thermal environment and breathing in (rabbit), 149, 144

thyroxine binding proteins in (rabbit), 146, 348

tissue carbohydrate reserves in (lamb monkey), 151, 24P

vasopressin content of neuro hypophysis in (mammal), 147, 301

water, salt and food intake effect on balances in (dog), 141, 81

Newcastle disease virus, myoclonus in duced by intraventricular injection of (cat), 143, 68

Nicotine, artery dilator response to peripheral injection of (cat), 149, 100

bronchial responses to (cat, guinea pig), 144 195

colon activity affected by (rabbit, guinea pig), 152, 410

colon inhibition by (rabbit), 144, 5P, 152, 191

DMPP action on blood vessels compared with (dog), 147, 2

 $\gamma$  aminobutyric acid antagonism on ileum to (guinea pig) 142, 150

γ aminobutyric acid antagonism to (guinea pig), 144, 349

isolated nictitating membrane response to (cat), 141 60

optic lobe discharges affected by (locust), 146, 506

regenerating nerve affected by (rabbit), 145, 617

Renshaw cell response to electropho retically applied (cat) 141, 440

respiration affected by (rabbit), 145, 88 spinal reflexes affected by (cat) 136, 422 sympathomimetric effects of (cat), 148,

temperature reduction effect on response of ileum to (gunea pig), 137, 398

Nicotinic alkaloids, bronchial responses to meetine affected by (guinea pig), 144 198

Nictitating membrane, diphtheria toxin action on (cat), 147, 513

nicotine action on normal and denervated (cat), 148, 339

responses of isolated (cat) 141, 46

superior cervical ganglion partial de nervation and return of responses of (cat), 135, 138 Nitrate, observations on sea water containing high (T), 135, 39 P

potassium contracture of single muscle fibres affected by (frog), 153, 407

skeletal muscle membrane resistance affected by (frog), 146, 120

Nitric oxide, haemoglobin combination with (sheep), 136, 507

Nitrogen balance, studies of (cat) (T), 139 20P

Nitrogen elimination, fat muscle ratio affecting (man), 152, 167

Nitrogen exchange, fasting and refeeding effect on (rat), 154, 229

Nociceptive receptors, nerve fibre dia meter and characteristics of skin (cat), 153, 107

Nodal membrane, potassium effect on properties of (toad), 148, 317

Node of Ranvier, calcium effect on mem brane action potentials at (frog), 137, 248

myelm ultrastructure near (frog), 135, 56P

potassium effect on membrane at (toad), 148, 317

ultrastructure of (frog), 137, 8P

voltage clamp technique in investigation of sodium currents in (*Xenopus laevis*), 148, 188

Non-corrodable valve, automatic control of flow of physiological fluids by (T), 154, 56 P

Non-myelinated afferent fibres, 5 HT and phenyl diguanide action on activity of (rabbit) 138, 31

frequency of firing of (cat), 139, 400

touch and drugs effect on discharges in (cat), 139, 9P

Non-myelinated nerve fibres, acetyl choline action on cutaneous (cat), 150, 501

ACh and eserine action on conduction in (rabbit), 152, 141

after potentials following a single impulse in (rabbit), 140, 19P

after potentials in (rabbit), 144, 442

choline esters and other parasympatho mimetic drugs action on (rabbit), 154, 35 P

functional activity measurement in whole nerve of specific groups of (rabbit), 138, 25

glucose deprivation effect on post-tetanic hyperpolarization of (rabbit), 138, 32 P

metabolic inhibitors effect on post tetanic hyperpolarization in (rabbit), 135, 6P

Non-myelinated nerve fibres, phenol blocking of myelinated and (cat), 150, 568

phosphate changes with stimulation of (rabbit), 148, 353

phosphorylated intermediary metabolites affected by electrical stimulation of (rabbit), 140, 18P

post tetanic hyperpolarization in (rabbit), 136, 80

temperature signalled by (cat) 150, 266, 152, 19P 153, 113

touch signalled by (cat), 139, 385, 140, 2P

Non-myelinated thermoreceptors, quan titative study of (cat), 153, 113

Noradrenaline, adrenal glands (left and right) containing (cat), 136, 297 adrenal medulla homogenates distribution

of (bovine) 141, 184

adrenal medulla output of (calf), 152, 14 amine oxidase inhibition effect on (cat), 135, 343

arterial strip resting length effect on action of (sheep), 154, 20

atrial fibrillation affected by (dog), 137, 141

blood flow and pressure after infusion of (man), 146, 43P

calorigenic action in new born and hy poxia inhibition of (cat), 152, 52P

capacity blood vessels affected by (man) 140 115

carbon dioxide effect on respiratory re sponse to (man), 137, 365

chromaffin granules containing (chick), 137, 318

dopamine and L DOPA effect after re serpine on tissue content of (cat), 154, 281

ethyleneiminium ions antagonism to pressor effect of (rat, dog), 135, 62P fluorimetric analysis in plasma of (ox,

man), 135, 44P heat production regulation in new born by (cat), 150, 13P

isolated nictitating membrane response to (cat) 141, 50

pepsin secretion of stomach affected by (dog), 142, 28 P

pulmonary blood flow affected by (dog), 145, 108

release from sympathetic nerves to in testine of (cat), 143, 42

reserpine action on sympathetic ganglia (mammal), 141, 134

reserpine action on tail skin (cat) 148,

\oradrenaline, reserpme effect on actions of (mammal), 144, 316

sheletal muscle contractions affected by (cat) 144, 92

splem output of (cat), 137, 25P

ĺ

supersensitivity of smooth muscle after suppathetic degeneration to (cat), 147, 135

s-mpathetic denervation effect on sensitivity of submaxillary gland to (cat), 153 9

rmpathetic stimulation affected by (dog), 150, 295

rmpathetic stimulation frequency effect on output from spleen of (cat), 138, 84 thyroid affected by (man, dog), 151, 261 tuborurarine action in aqueduct affected br (cat), 149, 68

responstruction caused by sympathetic simulation affected by (T), 147, 57P

Aucleoprotein, electron microscope study of structure of (calf), 152, 10P

\ucleosides, ervthrocyte active potassium transport affected by (man), 154 607

butter gracilis, Factor I and / ammobutter and effect on post-synaptic spike potential in (cat), 150, 311

functional organization in (cat) 153 331 physiological organization of (cat) 148 34P

engle neurones response to lemniscal and cerebellar stimulation in (ca\*) 152 63P

Autritional Letosis, environmental and other factors affecting (man) 143 16P Avitagmoid responses, rotational stimuli about vertical and rolling axes produing (man) 154, 32P

Vistagmus, vestibular and optokunetic interaction (man) (T), 148, 46P

Oak gall, antihistamme activity of extracts of (gumea-pig) 154, 469

provision against histamine by alcoholic extrarts of (guinea-pig), 148 78 P

Occipital potentials, latered and form after bright flashes of (man), 152 108

Octviamine mas cells and hazamine content of sensitival tiscues affected by (comes-piz) 147 425

Odour threshold concentration, posture reposes percentage effor on (man) 139 10

Oedema, 5-HT in produment of (rat), 139,

mhibution of production of (\*2 ) 135 24P long compliance affected by primariae (rabbit) 142, 366 Oedema, perfusion pressure in lung affecting (rabbit), 142, 295

substances producing (rat), 135, 10P

Oesophagus, afferent nerve fibre activity from cervical (rat), 135, 54P

forestomach contractions and parotid secretion affected by stimulation of (sheep), 149, 46

origin and course of motor nerve fibres to (rabbit), 151, 40P

methylene blue study of nerve fibres within (T), 135, 37P

motor fibre conduction velocity to striated muscle of (rabbit) (T), 135, 57P

reticulum contractions affected by stimu lation of (ruminant), 141, 8

salivary glands responses to distension of (sheep, calf) 148, 506

tubocurarine and ACh action on ciliary activity in (frog), 139, 157

Oestradiol, uterme collagen content and physical properties affected by (rat), 152, 423

Oestrogen excretion, endocrme ablation effect on (man), 137, 39 P

Oestrogens, adrenocortical function af fected by (rat), 138, 45P

corticosterone secretion rate affected by (rat), 139, 308

mating behaviour in spayed female affected by (cat), 138, 46P

method for determining in living animal relative amounts of progesterone and (rabbit) 135 26 P

variation during pregnancy of (rabbit), 138 3

Oestrone, uterme collagen affected by (rat) 135 274

Oestrous cycle, uterme collagen content affected by (rat) 135, 270

Oestrus, hypothalamic lesions effect on (ferret) 147, 95

'Off effect', furmotor activity and (cat), 150 194

'Off' response, graded potential in retina with (bream), 152 485

Olfactory bulb, post-retaine potentiation of hippocampal response to stimulation of (T), 147 10P

Olfactory organ, electrical oscillations recorded from (rabbi\*), 136, 29P

Omasum, reticulum contractions affected by stimulation of (rumment), 141-8

Open-circuit breathing capacity, factors affering determination of maximum (man) 135 98

Operating table, fabricated light-allo-(T) 149 66P Ophthalmoscope, flying spot (T), 145, 4P Optic lobe, impulse transmission timing through (locust), 146, 500

optic nerve section and regeneration effect on response to light on eye of (frog), 148, 45P

retinal representation on (frog) (T), 139, 18P

single unit discharges in (locust), 154, 478 single visual receptor units responses in (locust), 148, 58 P

Optic nerve, regeneration of (Xenopus laevis), 146, 40P

Optic nerve fibres, receptive fields of (spider monkey), 154, 571

Optic nerve stimulation, geniculate syn apses recovery of responsiveness fol lowing (cat), 150, 221

Optic radiation, after potentials recorded in (cat), 154, 519

Optic tectum, representation of visual field on (frog), 154, 31 P

Optic tract, single unit activity in conscious animal of (cat), 150, 99

Orbital cortex, medullary potentials fol lowing stimulation of (cat), 140, 43P, (T), 142, 41P

Organophosphate poisoning, histological changes due to (chicken), 148, 66P

Osazones, microchemical identification of 135, 28P

Oscillograph camera motor, automatic single frame attachment for use with, 142, 14P

Osmotic pressure, water transport in small intestine affected by (rat), 136, 637 Osmotic stimulus, hypothalamic single

neurones response to (rabbit), 148, 557 Osteoclast, electron microscope studies of (T), 154, 57P

pinocytosis in vitro of (F), 154, 57P

Ouabain, ATP in erythrocytes affected by (man), 140, 490

non medullated fibre post-tetanic hyper polarization affected by (rabbit), 136, 84

phosphate compounds in giant axon affected by (squid), 152, 557

sodium efflux from giant axon affected by (squid) 148, 8P

sodium ion secretion by skeletal muscle affected by (frog), 148, 63

uterine segments active ion transport affected by (rabbit, cat), 154, 452

Ovarian function, hypothalamic lesions effect on (rat), 147, 83

Ovariectomy, vasopressin action on blood pressure affected by (rat) 148, 625

Ovary, hormonal control of pregnancy by placenta and (rabbit), 151, 578

partial hypophysectomy effect on (rab bit), 149, 402

pituitary stalk section effect on (rabbit) 136, 355

Ovum, fertilization and early development of (cat) (T), 135, 37P

Oxygen, air and CO<sub>2</sub> O<sub>2</sub> mixture in resuscitation from CO poisoning comparison with (dog), 147, 279

alveolar CO<sub>2</sub> tension at high altitude affected by (man), 135, 602

carbon monoxide action on visual thres holds affected by (man), 146, 585

cardiac and respiratory function affected by high pressure of (cat), 152, 506

water transport in small intestine affected by (rat), 136, 635

Oxygen-15, uptake rate of oxygen 16 m lung comparison with (man), 152 325

Oxygen consumption, altitude effect on exercise maximum (man), 141, 242

anoxia in new born effect on (sheep), 146, 323

automatic meter for measurement of, 146, 20 P

birth effect on foetal (sheep), 146, 295 blood flow and A V oxygen difference relationship with muscle (man), 142, 314

body size, temperature and age effect in young on (pig), 154, 408

body weight relation to (rat), 150, 695 cyanide action on sodium loaded muscles' sodium flux and (frog), 148, 366

cytochrome C action after CO poisoning on tissue (rat), 152, 482 foetal and new born (sheep), 135 623

hypoxia effect in new born on (cat), 149, 500

measurement in small animals of (main mal), 135, 29 P

metamorphosis effect on (amphibia), 145, 355

method for continuous measurement of 24 hr CO<sub>2</sub> production and (man), 149, 63 P

milk secretion by isolated perfused mam mary gland and (goat), 154, 563

papillary muscle contraction relation to (cat), 151, 186

temperature and other factors effect on hypoxia action on (cat, guinea pig), 149, 352

temperature effect in new born on (pig), 147, 335, (monkey), 152, 277

- Oxygen debt, salivary gland and (cat), 145 556
- Oxygen high pressure, circulatory and respiratory changes induced by (rat), 143, 149
- Oxygen lack, presynaptic neuromuscular block affected by (rat), 149, 13
- Oxygen poisoning, adrenalectomy effect on (rat), 140, 23
- Oxygen pressure, recording of heart and respiration rates and blood pH during exposure to high (T), 139, 4P
  - vitamin E-deficient and treated rats affected by (T), 139, 16P
- Oxygen tension, covered platinum electrode in measurement of, 145, 20 P
- polarographic measurement of (T), 145, 3P
- Oxyhaemoglobin dissociation curve, carboxyhaemoglobin dissociation curve comparison with (man), 142, 71
- Oxytocinase, enzyme inhibitors action on (man), 148, 284
- Oxytocin, age effect on content in neuro hypophysis of (rat), 147, 304
  - aldosterone action on isolated kidney affected by (cat), 152, 213
  - blood pressure during pregnancy affected by (rat) 149, 586
- cardiovascular system affected by (cat), 136, 26P
- direct test on 'superfused' uterus of blood
- containing (rat) 149 12P disappearance from circulation of (rat), 143, 13P
- distribution in placenta of enzyme de stroying (man), 146, 539
- electrolyte excretion and R.P.E affected by (dog) 142, 471
- foetal brady cardia induced by (guineapig) 152, 6
- mactivation by plasma of pregnant women of, 146, 33 P
- milk ejection response to (dog) 152, 519 parturation in rabbit induced by (T), 138, 3P
- rate of disappearance from blood of injected (rabbit), 138 50 P
- reproductive cycle effect on blood pressure response to (rat) 148 621
- response to (rat) 148 624 exparate release of ADH and (man), 141,
- 30 P 149 443 Survival time in blood of (rabbit), 152,
- urinary excretion of water and electrolytes affected by (man), 153 553
- unne flow relation to osmolar clearance affected by (rat) 139, 110

- Oxytocin, uterine and renal activity affected by (dog), 144, 80
  - vasopressin secretion independent of (man), 147, 25 P
  - water and electrolyte excretion affected by (man), 150, 284
- Pace-maker, acetylcholme action on (rab bit), 147, 330
  - right atrial pressure in isolated heart effect on (vertebrate) 149, 197
- Pacinian corpuscie, ultra structure of (cat), 137, 2P
  - mechanical behaviour of, 137, 40 P
  - rapid mechanical events in (cat), 141, 198 receptor potential depression in (cat),
  - 141, 117 sodium concentration and receptor po
  - tentials in, 138 31 P sodium ions and potentials in (cat), 142,
  - structural displacements during rapid compression of (T), 137, 11 P
  - temperature effect on responses of, 145, 51 P
- Pad receptor units, mechanical stimula tion patterns and excitability changes in (cat) (T) 152, 10 P
- Pain, adaptation to localized cooling causing (man), 136, 106
  - bradykinin stimulation of (man), 153, 477 non myelinated fibres not necessary for signalling of (cat), 150 276
- Pain-producing substance, inflammatory exudates and plasma containing (man), 135, 350
  - plasma Linin and (man), 144, 1
- Pain receptors, skeletal muscle containing (cat), 152, 260
- Palatine glands, secretion of (sheep), 150 522
- Pallial nerves, large fibre conduction in (Archachatina), 151, 15P
- Palmitate <sup>14</sup>C labelled, radioactive CO<sub>2</sub> movements in body during oxidation of (dog), 147 494
- Pancreas changes in blood content during activity of (cat), 150, 479
  - gastric distension and external secretion of (dog), 149 76P
  - mechanism of external secretion of (T), 153 73P
- Pancreatic blood flow, secretion effect on (cat), 151, 49 P
- Pancreatic juice, collection from conscious animal of (sheep) 139, 26 P
  - plasma kinin forming enzymes in (cat), 147, 463

Pancreatic Pacinian corpuscles, (cat), 148. 3P

Pancreatic secretion, factors affecting in conscious animal (sheep), 143, 81P

vago vagal reflex involving (cat), 148, 420 Pancreozymin, pancreas blood content affected by (cat), 150, 484

Panting, receptors concerned in the thermal stimulus to (sheep), 146, 142

Paper chromatograms, radioactive scan ner for (T), 146, 30 P

Papillary muscle, oxygen consumption relation to contraction of (cat), 151,

Para aminohippurate, removal rate from anterior chamber of eye of (cat, rabbit), 151, 205

Para-aminohippurate clearance, preg nancy effect on (rat), 151, 385

Parabiosis, hypothalamic lesions in (rat), 138, 15P, 145, 336

pulmonary oedema induced by vagotomy affected by (guinea pig), 145, 380

Paracentesis, aqueous humour formation affected by (rabbit), 146, 252

Paradox state, doubly innervated muscles showing (crustacea), 143, 448

Paraplegia, vasomotor responses in foot to raised body temperature affected by (man), 136, 547

Parasympathetic denervation, salvary gland respiratory enzymes affected by (cat rabbit), 152, 100

Parathormone, bone calcium and sodium affected by (rat), 142, 447

Parathyroid, seasonal changes in activity of (man), 149, 28

Parathyroid hormone, avian bone in tissue culture affected by (T), 154, 57 P

Paraventricular nucleus, single neurone activity in response to osmotic stimulus in (rabbit), 148 557

Parotid gland, continuous and reflex secretion by (ruminants), 144, 463

forestomach stimulation effect on (sheep), 139, 23 P

iodide concentration by (mammal), 145, 600

nonic balances during maximal stimula tion of (sheep) 144 108

'paroxysmal' secretion of saliva after parasympathetic denervation of (cat), 143, 506

salivary flow and composition relation ship in (sheep), 135, 611

sympathetic nerve stimulation and ad renaline action on (sheep) 144 476

Parotid gland, transient periodic secretion after postganglionic parasympathetic denervation of (cat), 140, 21 P

Parotid saliva, blood supply variations effect in Na depletion on secretion rate and composition of (sheep), 135, 227

secretion rate and composition of (sheep), 150, 520

Parotid secretion, development in young of (goat), 143, 63 P, 150, 538

forestomach stimulation effect on (sheep), 149, 43

rumen and oesophagus distension effect on (sheep, calf), 148, 507

NaCl infusion effect in Na depletion on Na K ratio of (sheep), 138, 44

water depletion during Na depletion effect on Na K ratio in (sheep), 140, 131

'Paroxysmal' salivary secretion, perotid gland parasympathetic denervation causing (cat), 143, 506

Passive sensitization, mechanism of (guinea-pig), 150, 546

Pavlov pouch, vagotomy effect on secretory responses to mecholyl and histamine of (dog), 149, 70 P

Pendulum auxotonic lever, 137, 35P Penguin, temperature control in chicks of

(T), 151, 43P
Pentobarbitone, brain electrical activity

under chloralose and (cat), 138, 179 uterine segments active ion transport affected by (rabbit, cat), 154, 448

Peptic ulceration, algal polyanion pro tection from (guinea pig) 147, 52 P

Peptidase, small intestine cells containing (rat) 152 374

Peptides, intestinal absorption of (rat, dog), 145, 48

Perfused cat, corebrospinal fluid pressure and cardiac output in, 138, 202

Perfused heart, apparatus for weighing, 136, 1*P* 

extravascular fluid losses in (rabbit), 148, 393

Perfused hind-limb preparation (rat), 141 2P

Perfused lung, hypoxia effect on (cat), 153, 413

Perfusion apparatus, Perspex (cat), 138,

Perfusion blood, vaso active substances production in (cat) 138, 215

Pericardial organs, neurohormones of (crustaceans), 149, 215

Peripheral nerves, electron microscope studies of development of (T), 148, 46 P

- Phenylalanyli-oxytorin, water and electrolyte excretion affected by (man) 150, 284
- Phenvibutazone, gastric secretion affected by (guinea pig) 137, 61 P
  - gastric ulceration and secretion affected by (guinea pig), 142, 34 P
- Phenyldiguanidine, intestinal peristalsis affected by (guinea pig), 140-400
  - non meduliated afferent fibre activity affected by (rabbit), 138, 35
- Phenylethanolamines, reservine effect on actions of (maintal), 144 321
- Phlorrhizin, exerction of (dog), 146 563 mtestinal transfer of glucose and water in ture affected by (rat), 144, 337
  - hver excretion of (dog), 137, 18P
    site of action in inhibition of intestinal
  - absorption of glucose by (rat), 148, 83 site of glucose absorption inhibition in intestine by, 139, 21 P
  - specific colorimetric method for estimation of, 137-72P
- Phioxin, gastric acid secretion inhibition in rat by (T) 148, 82P
- <sup>22</sup>P, lymphocyte recirculation studied by infusion of lymphocytes labelled with (rat) 146 60
- Phosphate, giveerol-extracted muscle fibres affected by concentration of (rabbit) 135, 33
- milk casem from soluted perfused mamman gland affected by (goat) 154, 561 peround gland secretion of (sheep),144,115
- Prosplicte esters, employer tes ormaining (man) 14: 4:1
- Prospincifie, dament and 137, 159 proven server in allowing glander into and prosplate tomores in (rabbit, an expan 125 la
- Partow 1 2277 150r. 153 475
- Thornic Company or high intensity adaptation of ratios and (frog.) 149-294
- Photopic exert execut substitution in
- Pintrotenative pigments, retina con tamus (desposes fiel), 140, 220
- Physical period number of fibres in (rat)
- Phrenic nerie diaphragm preparation, not or serve simulation and acetyl aboline release in perfused (rat) 136
- Physic nerve section, rumination afferred by (goat) 142 505

Physical fitness, physical training effect on female students of, 150, 19P

pulmonary diffusing capacity at rest and (man), 142, 54 P

Physical work, adaptation to exhausting (man), 141, 35 P

Physostigmine, intrafusal potentials af fected by (cat), 150, 181

Picrotoxin, glutamic acid and GABA action on muscle contraction affected by (crayfish), 148, 40

peripheral inhibition affected by (cray fish), 143, 541

Pig, metabolism of young, 139, 15P

Pigmentation, melanophore expanding substance in blood of subject with (man), 152, 461

Pilocarpine, superior cervical ganglion transmission affected by (cat), 135, 66

Pilo-erection, chromaffin tissue and nico tine stimulation of (cat), 145, 10 P

Pitressin, coronary flow and weight change in perfused heart affected by (rabbit), 148 404

high water intake effect on urine concentration induced by (man), 139, 45

Pituitary gland, arginine distribution in (rat), 149 519

blood supply of (sheep), 135, 37P

stalk section effect on volume of (rabbit) 135, 47 P, 136 333

stress effect on release of corticotrophin from (rat) 146, 105

thyroid activity affected by stimulation of (rabbit), 143 250

Pituitary gonadotrophin assays, clinical application of (mouse, rat), 148, 40 P

Pituitary stalk section, adrenocortical response to stress affected by (rabbit), 136, 344

changes in hypothalamus and proximal pituitary stalk after (mammal), 146, 22P

lactation affected by (rabbit), 137, 414 median eminence and pituitary gland volumes affected by (rabbit), 136, 333

regeneration of anterior pituitary after (sheep), 143, 25 P

thyroid function affected by (rabbit), 136, 364

Placenta, distribution of enzymes de stroying oxytocin and vasopressin in (man), 146 539

fructose production by (man), 146 98 glycogen determination in (rabbit sheep), 146, 52 P

hormonal control of pregnancy by ovary and (rabbit), 151 578

Placenta, progesterone influence on development of (rat) (T), 150, 14 P

serum proteins transmission through (monkey), 153, 269

thyroxine barrier in (rabbit), 142, 335
Placental enzymes, inhibitors action on

(man), 148 283
Plain muscle, acetylcholme action on

Plain muscle, acetylcholme action on electrical properties of (guinea pig), 143, 165

acetylcholine receptors in intestinal (gumea pig) 153, 26 P

action potentials and contractile mechanism dissociated (guinea-pig), 152 16P

adrenaline action on phosphorylase activity and membrane potential of (guinea pig), 148, 62 P

bradykinin action on (mammal), 153, 475 contraction in (molluses), 141, 385

darmstoff action on (rabbit), 137, 154 double array of myofilaments in (squid, snail), 137, 42 P

drugs action on depolarized (various), 143, 474

electrophysiological basis of ACh and adrenaline action on (guinea pig), 143, 19 P

envenomed egg yolk causing slow con traction of (guinea-pig), 136 134

excitation and conduction in (guines pig), 140, 52P, 142, 420

Factor I and ammobutyric acid effects on (various), 145, 66

heat effect on anaphylactic reaction of (guinea pig), 135, 325

helical configuration of myofibrils in (invertebrate), 140, 8P

innervation and activity of (Mytilus edulis), 147, 41 P, 152, 220

nonic environment changes effect on activity of (guinea pig), 141, 464

nonic movements in intestinal (guinea pig) 153 29 P

nons and drugs action on resting and action potentials of (vertebrate), 140, 156

measurement of rate of uptake of stimu lant by, 145, 39 P

mechanical properties of (Helix, Mytilus),
141 398

metabolic inhibitors effect on electrical activity and tension of intestinal (guinea pig), 135, 15P, 136, 310

pharmacological analysis of contractile mechanism of (Mytilus), 148, 450

phasic and tonic responses in (Mytilus), 149, 154

- Flun muscle, removal of glucose affecting exertal exertablish of (gumea-pig), 123 SP
  - resur leigh and tenson development in (griegopie) 146, 375

Renal clearances, oxytocin effect on (man), 153, 557

Renal circulation, bladder distension effect after buffer nerves section on (cat), 138, 316

bladder distension in spinal animal effect on (cat), 138, 304

Renal cortex, choline and sulphate penetra tion of (rat), 143, 277

mercaptomerin effect on water and cation content of slices of (rat), 143, 284

Renal excretion, theory of solute transfer applied to, 145, 16

Renal function, foetal age effect on (sheep), 140, 14

Renal pelvis and ureter, dynamics of (Film), 135, 38P

Renal plasma flow, oxytocm action on (dog), 142, 477

Renal tubules, protein reabsorption from (rat), 148, 1

Renin, location in kidney of (rabbit), 135, 46P, 149, 526, 152, 27P

Renshaw cells, acetylcholine and micotine action on (cat), 136, 425

acidic amino acids activation of (cat), 150, 667

diffusional barriers around (cat), 141, 446

electrophoretically applied stimulation of (cat), 141, 435

 $\gamma$  aminobutyric acid and  $\beta$  alanine de pression of (cat), 146, 197

procame and atropine action on (cat), 153, 18

recurrent inhibition and (cat), 146, 382 tetanus toxin action on (cat), 135, 664

Repetitive discharge, mechanism in interneurones of (cat), 147, 358

Repetitive stimulation, spinal interneurones response to (cat), 147, 379

Repolarization, diameter of muscle fibre correlation with time constant of (frog), 153, 376

potassium concentration effect on intra cellular recording of atrial (rabbit), 146,

Reproductive cycle, vascular system re sponses in different phases of (rat), 141, 37P

vasopressin and oxytocin action on blood pressure affected by (rat), 148 623

Reproductive organs, disease and mal nutrition effect on maturation of (cat) (T), 139 21 P

Reserpine, adrenal gland adrenaline and noradrenaline following depletion by (rat), 142, 61 P

Reserpine, catechol ammes in heart deple tion by (dog), 139, 18P

catechol amines in sympathetic system affected by, 138, 14P

DMPP and nicotine action on blood vessels affected by (dog), 147, 7

growth and testicular development in hibition by (chicken), 152, 15P

leum and colon response to nerve stimu lation affected by (rabbit), 147, 31 P inhibition of catecholamines uptake in

brain tissues by (cat), 154, 37P mast cells, histamine and 5 HT of tissues

affected by (rat), 137, 186 metabolic rate affected by (rat), 150, 698

nicotine action on colon affected by (rabbit), 152, 195

nictitating membrane response to nicotine and ACh affected by (cat), 148, 346

noradrenaline content of tissues after dopamine and L DOPA affected by (cat), 154, 281

peripheral sympathetic system affected by (mammal), 141, 132

peristalsis and 5 HTP action on intestine affected by (guinea pig), 146, 40

pilomotor response to nicotine and ACh affected by (cat), 148, 335

preganglionic sympathetic activity af fected by (cat), 147, 14P, 150, 114

supersensitivity of smooth muscle to nor adrenaline after (cat), 147, 137

sympathetic ganglia affected by (rabbit), 136, 7P

sympathomimetic amines actions affected by (mammal), 144 314

vagus excitatory action on atria affected by (rabbit), 142, 178

Residual saliva, source of (sheep) 150, 521 Respiration, adrenaline action on (mam mal), 137, 374

air flow, resistive pressure and chest volume relationship in (man), 145, 462 bladder distension effect on (cat), 146, 451

carbon dioxide effect on noradrenaline action on (man), 137, 365

cerebral ventricular injection of histamine and ACh effect on (cat dog), 140 171 5 HT stimulation of (man), 151, 342

γ aminobutyric acid effects on (mammal), 146, 70

high oxygen pressure effect on (rat), 143, 154

intercostal muscles' activity in (man), 151, 390

teopropylnoradrenaline effect on (man)
151, 542

Respiration, medulla local heating effect on (cz.) 152, 94

retruns during experimental modifications of (man) 141, 43 P

refier effects in new born on (rabbit), 145,

right and left atrial pressures affected by (dog), 145, 482

sendirity to added external elastic im pedance to (man), 150, 9P

the mal environment of young effect on (rabbit), 149, 144

themal stress effect on (calf), 136, 300 tracheal and humeral airways in (chicken), 138, 287

tuborurarme in fourth ventricle effect on (cat) 149,66

Respiration counter, simple electric, 144,

Respiration rate, maximum breathing capacity affected by (man), 135, 102

Respirator, sensitive self-contained patient-cycled 144, 7P

Respirator, air flow, intercostal muscle activity and (man), 149, 471

Respiratory analyser, 151, 4P

Respiratory discharge, patterns of (cat rat), 138, 33P

Respiratory enzymes, denervation effect on salwary gland (cat, rabbit), 152, 99 Respiratory gases, errors in analysis by

mfra-red absorption of, 136, 11P Respiratory manœuvres, heart rate af

fected by (man) 144, 541
Respiratory metabolism, apparatus for graphic determination of (man), 143,

Respiratory obstruction, positive pressure ventilation and (cat) 138 112

Respiratory passages, distensibility of upper (man) 137, 78 P

Respiratory quotient, foetal (fowl), 150, 246

Respiratory reflexes, new born showing (monkey), 152, 282

Resting potential, intrafusal muscle fibres showing (frog) 137, 196

hthum replacement of sodium effect on muscle (frog) 147 635

Potarrium concentration effect on intra cellular recording of atrial (rabbit) 146 411

Potasnum and TEA effect on nodal mem brane (toad) 148 322

Resting tension, papillars muscle oxygen consumption affected by (cat), 151, 189

Restraint, simple devices for small mam mals (T) 135 39 P

Resuscitator, multiple for ice cold mice 146, 9P

Reticulo-ruminal activity, central regulation of (goat), 147, 11 P

Reticulo-ruminal fold, reflex contractions from stretching of (sheep goat), 151 141

Reticulo-rumen, nervous structures in epithelium of (lamb), 143 30 P

Reticulo-rumen contractions, acids in forestomach effect on (sheep) 147 58

Reticulo-rumen epithelium, nervous structures in (goat), 139 4P

Reticulo-rumen sac, active transport through epithelium of (sheep), 146–235 chloride absorption from (sheep) 140, 94

Reticulum, activity in conscious animal of partially exteriorized rumen and (sheep), 149, 14P

forestomach stimulation effect on (sheep), 139 23P 149, 43

partial exteriorization of (sheep), 143, 35P

pressure changes during rumination in rumen and in (goat), 142 507

reflex stimulation and inhibition of con tractions of (ruminant) 141 I

reflex contractions in decerebrate pre paration of (sheep goat), 151, 139

Retina, coloured adapting field effect on spectral sensitivity of (frog) 149, 318

excitation pools in (frog) 149, 327

graded potentials of (bream), 152 487 light substitution stimulation of (man frog) 149 288

micropipette recording from (fish) (T), 148 4P

modulation thresholds for sinusoidal light distributions on (man) 152 67

monochromatic light colour when passed from behind into (man) 147 204

narrow band' pigment in (frog), 145 630

photosensitive pigments in (deep sea fish) 140, 220

receptive field areas of ganglion cells and position in (spider monkey), 154, 573

receptive fields of ganglion cells in (cat),

receptive fields for striate cortex single neurones in (cat) 148 572

recording with micropipette electrodes in mtact (cat) 149, 537

rod-cone interaction in (frog), 149 303 sources of slow electrical activity in (frog), 140 247

Retinal acuity, direction effect on 144, 25 P Retinal ganglion cell, dark adaptation, absolute threshold and Purkinje shift in (cat), 137, 327

light substitution effect on (frog), 149, 292 Retinal illumination, after-effects of white

light (man), 150, 70

Retinal image, vision with controlled movements of (man), 145, 98

Retinal noise, increment thresholds and (man), 136, 475

Retinal quantum-events, neural 'dark noise' and, 142, 49P

Retinal photopigments (albino rat), 136, 615

Rheumatoid arthritis, pain producing substance in joint fluid in (man), 135, 353

Rhinoceros, temperature regulation in white, 143, 51 P

Rhodopsin, regeneration of (albino rat), 136, 624, 137, 15 P

Rhythmic exercise, temperature effect on hyperaemia induced by (man), 145, 451

Ribonucleic acid, ACTH effect on distribution in adrenal cortex of (guinea pig), 146, 465

adrenal cortex enucleation and regeneration of (rat), 135 541

Rice diet, bone sodium content affected by (rat), 139, 480

Ricinoleic acid, 1rm like activity of, 143, 65P

miotic effect of (rabbit) 146, 284

Ricin, tissue changes in alimentary canal induced by (mouse), 135 30P

Right atrial depressor reflex (dog), 148, 52 P

Right atrial pressure, circulatory reflex responses to changes in (cat), 143, 6

Right heart, streaming of blood through (cat), 148, 76P

R membrane, Bruch's membrane in retina and (cat), 149, 555

mammalian retinae containing (rat, rab bit) 140, 248

Rod, cone excitation effect on response of (cat), 137, 338

quantum efficiency and refractory compartments of, 148 36P

Roller pump, continuous superfusion by, 153, 6P

Rubefacient substances, forearm blood flow after inunction of (man) 145, 47 P

Rubidium, potassium replacement in skeletal muscle by (frog) 138 140 spermatozoa motility affected by (dog), 142, 500 Rumen, large diameter cannula for sheep, 139, 6P

reflex contractions of reticulum and of (T), 137, 75 P

reflex contractions of reticulum and of (sheep, goat), 139, 24P

reflex contractions in decerebrate preparation of (sheep, goat), 151, 139

reflex stimulation of parotid gland score tion from (ruminants), 144, 468

reticulo rumen contractions affected by acids in (sheep), 147, 61

salivary glands responses to distension of (sheep, calf), 148, 506

Ruminant salivary secretions (calf, sheep), 150, 515

Ruminants, intrathoracic pressure and regurgitation in (T), 135, 57P spermine oxidase in plasma of, 145,

Rumination, central regulation of (goat), 147, 11 P

electroencephalogram association with (goat), 143, 46P

electroencephalogram variations associated with (T), 135, 36P

forestomach stimulation effect on (sheep), 149, 43

mechanism of regurgitation during (goat), 142, 503

methods of recording gastric contraction and other events associated with (T), 135, 36 P

Salicylate, respiratory and vascular responses to CO<sub>2</sub> inhalation affected by (man), 145, 38 P

Saline, renal response to ingestion of (dog), 141, 6P

Saliva, blood clotting factors in (man), 136, 324

blood supply variations effect in Na depletion on secretion rate and com position of (sheep), 135, 227

composition relation to rate of secretion of (sheep), 135, 613

continuous and reflex secretion by parotid gland of (ruminants) 144, 463

infant age effect on leucocytes in (man), 149, 52P

plasma kinin forming enzymes in (mam mal), 147, 461

Salivary glands, amine oxidase content of (man), 147, 039

denervation effect on respiratory enzymes in (cat rabbit), 152 99

distribution and weight of (calf, sheep), 150, 517

Salivary glands, iodide concentration by (mammel), 145, 595

protein secretion and phosphate turnover in phospholipids in vitro of (rabbit, gumea pig), 135, 18

rumen and oesophagus distension effect on (sheep, calf), 139, 7P, 148, 506

Salivary secretion, high water intake effect on (man), 138, 35P, 139, 53 ionic balances of parotid gland during

maximal (sheep), 144, 108

oxygen uptake of submaxillary gland during (cat), 145, 553

specific sympathetic fibres for (cat), 153, 1 vasodilatation relation to (cat), 142, 226

Salt, new born response to mtake of (dog), 141, 81

Salt intake, high water intake effect on (man), 138, 35P, 139, 53

Salts, gastric emptying affected by various (man), 154, 256

Salt taste preference threshold, DOCA effect on (rat), 151, 253

Saphenous nerve, non medullated fibres agnalling touch in (cat), 139, 385

Sarcomere, A band length in relation to length of (frog), 144, 413

<sup>14</sup>C-adenine nucleotide location in (frog), 150, 356

preferred sites of adenine nucleotide in (frog), 153, 433

Sarcosomes, ADP effect on heart (toad), 147, 25

Sarin, atropine and P<sub>2</sub>S effect on poisoning by intrathecal (dog), 149, 49 P

pulmonary circulation affected by (dog), 139 250

pulmonary vascular resistance affected by (dog) 139 277

Sartorius, radioactivity uptake from <sup>14</sup>Cadenine by (frog), 145, 137

Sartorius motoneurones, monosynaptic activation from other muscle afferents of (cat), 144, 272

Sartorius muscle fibres, calcium ions and resting potential of (frog), 153, 25P Schwann coll.

Schwann cell, degenerated end plate and (frog) 150, 161

nerve fibre development and (mouse), 153, 40 P

neuromuscular junction fine structure and (frog), 150 136

recenerating neuromuscular synapse and action of (frog) 154, 201

Schwann cell membranes, hypertonic solutions and growth effect on contact relationships between axon and (mouse), 142, 9 P

Scillaren A, potassium movement in erythrocytes affected by (man), 136, 157

Scotopic sensitivity, light substitution measurement of (man), 149, 292

Scotopic visual acuity, absolute light threshold and (man), 149, 61 P

Scratching movements, drugs applied to upper cervical cord eliciting (cat), 151, 502

Scratch reflex, tubocurarine on cervical cord effect on (cat), 153, 39

SD spike potential, threshold polarization for initiation of (cat), 139, 242

Sea anemones, distribution of 5 HT, tetra methyl ammonium and homarine in, 151, 296

Seasonal variation, plasma antidiuretic activity induced by heat affected by (man, sheep), 135, 1

serum P and Ca showing (man), 149, 23

Secretin, pancreas blood content affected by (cat), 150, 482

pancreatic blood flow affected by (cat), 151, 49 P

Seizure-like activity, cerebellum showing (frog), 144, 29

Semicarbazide, retardation of rapid growth in yellow peas by, 154, 2P

Semimembranosus motoneurones, mo nosynaptic activation from other muscle afferents of (cat), 144, 278

Seminal vesicle, potassium transport in mucosa of (guinea pig), 144, 20P

testis tubular degeneration effect on (mouse) 137, 16P

Seminal vesicle mucosa, ion movements in (guinea pig), 135, 213

Semistarvation, small intestine absorption capacity affected by (rat), 152 182

Sensitization, active and passive (guinea pig), 150, 559

electrolyte content of tissues affected by (gumea pig), 147, 109

Sensory discharge facilitation, frequency of fusimotor stimulation affecting (cat) 150, 189

Sensory impulses, intramuscular propa gation of (cat), 148, 240

Sensory nerve, acetylcholine effect on normal and regenerating (rabbit) 145, 613

ATP liberation on antidromic stimulation of (rabbit) 141, 13P, 145, 494

excitability in spinal cord of terminations of (cat), 142 1

substance P and ATP contents on de generation of (rabbit), 143, 45P

Sensory nerve cell, site of impulse initiation instretch receptor (lobster), 143, 138

Sensory nerve stimulation, spinal reflex activity affected by (cat), 151, 112 Sensory nerve terminal, model to illus

trate effects of noise at, 147, 62P, Sensory pathways, convergence within

Sensory pathways, convergence within (cat), 144, 257

Serial counts, economical method for automatic recording of, 146, 25P

Series elastic component, muscle length and time after twitch effects on (frog), 143, 529

Serotonin, amine oxidase inhibition effect on (cat), 135, 344

Serum, skeletal muscle sodium affected by factors in (rat), 143, 22P

thyroxine concentration relation to electrophoretic distribution in, 152, 604

Serum albumin, renal tubular reabsorp tion of (rat), 148, 1

Serum globulin, renal tubular reabsorp tion of (rat), 148, 1 Serum kallikrein, capillary permeability

affected by (gumea pig), 152, 77

Serum phosphate, seasonal variation in (man), 149, 23

Serum proteins, foetal and maternal pat tern of (rabbit), 146, 344

normal pattern of (kitten), 136, 37P thyroxine binding by (rat) 135, 434, (man), 148 64P, (various) 153, 179

transmission to foetus and to amniotic fluid of maternal (monkey), 153, 265

Sex, adrenal gland sympathomimetic amine content affected by (cat), 136 296

energy expenditure in walking affected by (man), 138, 165

oxygen poisoning variation with (rat), 140, 30

Sexual maturation, hypothalamic lesions effect on (rat), 147 78

Sham feeding, abomasal secretion affected by (sheep), 154, 119

portal venous ligation effect on gastric and pouch secretory responses to (dog), 144, 128

pylonic antrum release of gastrin effected by (dog), 148, 291

Sheep, cardiac output and oxygen con sumption in, 146 321

carotid sinus reflex in, 135, 230

erythrocyte potassium concentration in different breeds of, 136, 41

Shivering, frequency spectrum of muscular activity in (cat), 140, 49P

voluntary contraction comparison with (man, cat), 146, 1

Silent substitution, excitation pools in retina and (frog), 149, 332

Sino-aortic nerves, pulmonary arteral pressure affected by stimulation of (cat), 137, 450

Sinus arrhythmia, factors affecting (man), 144, 541

Sinusoidal fringes, modulation thresholds for retinal (man), 152, 67

Sinusoidal stretching, stretch receptor activity and reflex responses of skeletal muscle affected by (cat), 144, 373

Sinus venosus, membrane resistance breakdown by acetylcholine in (T), 135, 10P

Siphon, innervation of (Mya), 143, 555 Skeletal muscle, acetylcholine action on partially denervated (frog), 147, 45P ACh supersensitivity of denervated (cat),

147, 178
acute sympathectomy and vascular re

sponses to ischaemia in (T), 137, 82P adaptation to intermittent fasting in normal and denervated (rat), 140, 50P adenine nucleotide location in (frog), 145, 132, 150, 347, 153, 433

adrenalme action on (cat), 137, 381

alternating relaxation heat in twitches of (frog), 139, 466

analysis of mechanical components in (frog), 143, 515

amons effect on Na and K exchange in (frog), 135, 560

anions influence on membrane resistance of (frog), 137, 26P, 146, 117

anion interaction in (frog), 141, 351

anoxia effect on resting potentials of (rat), 137, 49 P

 $\beta$  efferent fibres in nerves to (cat), 149,28 P bladder distension effect on tone and reflex activity of (cat), 146, 443

blood flow and AV oxygen difference relationship with oxygen consumption of (man), 142, 314

botulinum toxin effect on (cat), 151, 598 calcium effect on potassium induced con tracture of (frog), 151, 518

calcium and magnesium effect on con traction of (rat), 151, 506

chemical modification of intracellularly recorded after potentials in (frog), 142,

78 chloride conductance of (frog), 151, 89 cocaine action on (frog), 148, 61 P

competitive adsorption as a factor in diffusion of ions into, 146, 56P

contralateral motoneurones' excitability affected by stretch of (cat), 145, 193

- Skeletal muscle, controlled differentiation of (cat), 148, 78 P
- controlled differentiation during growth of (cat), 143, 23 P
- cortisol effect on phosphate uptake by (man), 148, 227
- cyanide action on sodium flux in sodium loaded (frog), 148, 362
- differentiation of fast and slow (cat), 150, 399
- double array of filaments in (rabbit), 136, 16P
- dual circulation in (cat), 149, 18P

Skeletal muscle contraction, artery dilator response to (cat), 149, 95

chloride output affected by (frog), 141, 359

early spindle discharge in (cat), 147, 408 internal current flow in initiation of (frog), 151, 363

synchronous and asynchronous motor volleys effect on (cat), 148, 27 P

Skeletal muscle elastic components, anatomical sites of (frog), 143 535

Skeletal muscle fibre, acetylcholine sensi tivity after complete or partial de nervation of (frog), 151, 1

hypertonic solutions effect on twitch and action potential of (frog), 136, 17P

junctional and extra junctional ACh receptors in (rat), 151, 24

local activation of (frog, crab) 144, 426

Skeletal muscle fibre, membrane potential and potassium concentration effects on potassium permeability of, 143, 59 P

miniature end plate potential amplitude affected by size of (frog), 137, 271

polyneuronal innervation of (cat), 151 436

spontaneous activity in (chick), 150, 707 striations measurement by interference microscope in (frog), 144, 403

Skeletal muscle nerve, procame effect on fibres in (cat), 135, 263

Skeletal muscle speed, motoneurone effect on (cat), 150, 417

Skeletal muscle stretch, spindle motor fibre activity affected by (rabbit), 149, 128

Skeletal muscle temperature, neuro muscular blocking drugs' action affected by (man), 149, 112

Skeletal muscle twitch, back response of motor nerve fibres effect on (cat), 150 332

Skeletal muscle vasodilatation, 'Flight and Fight' relation to (cat), 140, 16P hypothalamic and mid brain stimulation causing (cat), 154, 492

Skin, adaptation to local warming and cooling of (man), 140, 42P

antigen antibody reactions in (rat), 150, 489

bradykının formation, sweat gland activity and vasodilatation in (man), 137, 43 P, 142, 219

CO, effect on blood vessels of (man),140, 42 P

cells containing chromaffin granules in (man) (T), 137, 61 P

cholesterol synthesis by (rabbit, guinea pig) 144, 367

cold injury to (man), 139, 14P

continuous recording of short circuit cur rent through (frog), 146 24P

equilibration between water vapour and (man), 152, 58 P

5 HT effect on cations and water passage through (frog), 135, 59 P

5 HT effect on Na and K movement through (frog. toad), 138, 496

through (frog, toad), 138, 496 heat exchanges of wet (man), 141, 156

heat transfer measurement in living (man), 140, 359

histamine and 5 HT distribution in (rat), 140, 106

mast cells, 5 HT and histamine in (mam mal), 137, 170

micro-electrode stimulation of (frog), 136

- Skin, neurohypophysial extract stimulation of active sodium transport across (frog), 152, 28 P
  - plasma kinin forming enzymes in (rat, cat), 147, 460
  - radio iodide concentration in (rat), 148, 681, 62P
  - radio iodide distribution in (rat), 152, 467 radiosodium disappearance from sensitized (guinea pig), 145, 11 P
  - receptive fields of C mechano receptors in (cat) 152, 343
  - regional variation in resistance to stretch ing of human (T), 139, 4P
  - response to local mechanical stimulation of (frog), 137, 81P
  - vapour pressure effect on passage of water across (man) 137, 44P
  - vasomotor fibres to (man), 153, 232
  - weal and flare produced by histamine and other substances in (man), 145, 34P
- Skin blood flow, insulin hypoglycaemia effect on (man), 143, 332
  - strain gauge plethysmograph measure ment of muscle and (man), 140, 318
- Skin blood vessels, infra red radiation effect on (man), 149, 424
  - local response to direct heating of (man), 149, 64 P
  - vasomotor control of forearm (man) 139 455
- Skin capillary permeability, histamine liberators effect on (rat), 139 1
- Skin collagen, loss on protein free diet of (mouse) 144, 310
- Skin cooling, non myelmated fibres in signalling of (cat) 150 266
- Skin histamine, adrenalectomy effect on (rat) 147 52
- β irradiation effect on (rat) 136 122
- Skin mechanoreceptors, post-excitatory recovers in (frog) 152 22 P
- some properties of (frog) 141 305
- Skin sensory nerve, excitability changes of terminals in spinal cord of (cat), 142 7
- Skin stimulation, ATP release with (rabbit) 145 499
  - somatosensors cortical potentials from widely separated (cat), 144 258
  - \*pinal interneurone activity affected by (cat) 147 367
- Skin temperature apparatus for measure ment of (man) 140 360
  - C fibre receptors response to changes in (cat) 153 113
  - humidity at different temperatures effect on (man) 144 299

- Skin temperature, knitted wire fabric for measuring (man), 142, 1P
  - panting response to environmental heat and (sheep), 146, 145
  - subjective sensations in Antarctica relation to (man), 145, 26P
  - sweating and shivering onset relation to (man), 137, 6
  - touch receptors discharge affected by changes in (cat), 153, 91
- Skin vasodilatation, constructor and dilator nerves contribution during body heating to (man), 136, 489
- Sledge dogs, work output of, 137, 210
- Sleep, cholmesterase inhibitors action in arousal from (cat), 136, 31
  - single unit activity in lateral geniculate during (cat), 150, 96
  - single unit activity in striate cortex during (cat) 147 231
- Slow geniculate rhythms, factors af feeting (cat), 154, 530
- Slow muscles, differentiation after birth of (cat), 150, 399
  - innervation from fast muscle nerve effect on speed of (cat), 150, 418
- Slow-muscle fibres, motor nerve section and selective activation of (frog), 147, 10 P
- spontaneous potentials in (frog), 135, 511 Slow post-synaptic potentials, giant
- motor fibre giving (crayfish), 145 326 Slow-reacting substance, lung produc tion in anaphylactic shock of (mam mal) 151 416
- Small intestine, dipeptides absorption from (rat), 152, 367
  - 5 HT and pressure effects on peristalsis of (guinea pig rabbit), 140, 381
  - iodide transport against a concentration gradient in vitro by (rat), 147, 260
  - mucosal mechanoreceptors in (cat), 139, 353
  - phlorrhizm action on glucose and water transfer in vitro by (rat), 144, 387
  - pyridoxal effect on amino acid transport by (golden hamster), 136 203
  - nem action on (mouse) 135, 30P
  - semistarvation effect on absorption in (rat) 152, 182
  - short-chain fatty acids transfer by (rat), 152 48
  - sucrose maltose and higher oligosac charides absorption from (rat), 154, 39 transamination during glutamic acid ab sorption from (mammal), 140, 148
  - transamination in vivo in (mammal) 138,

Small intestine, transammation of glutamic and aspartic acids during absorption by (dog), 135, 442

water and salts transport in in vitro pre paration of (rat), 136, 632

Small mammals, apparatus for recording spontaneous activity patterns of (T), 151, 20 P

Smooth muscle, see Plain muscle Sodium, active transport by intestine in intro of, 139, 27 P

adrenalectomy effect on release from bone of (rat), 142, 438

anions effect on exchange in muscle of (frog), 135, 560

ascites tumour cell transfer rate of (mouse), 140, 54

bone Na and K affected by changes in plasma (rat), 147, 115

cardiac glycosides action on movement in erythrocytes of (man), 136, 148

cardiac muscle contraction affected by calcium and (frog), 143, 488

choricallantoic membrane transport of (pig), 151, 462

crustacean muscle fibre membrane pro perties affected by (crayfish), 142, 521 cyanide effect in sodium loaded muscle on flux of (frog), 148, 365

DOCA effect on transfer in colon of (dog), 151, 352

electroplate membrane potentials affected by (ray), 142, 263

end plate current equilibrium potential affected by (frog), 154, 56

erythrocyte cation content and movement of (sheep), 142, 455

erythrocytes exchange of (man), 145, 643 erythrocyte variation in content of (ox, goat), 139, 87

factors influencing movement in muscle of (frog), 135, 567

5 HT effect on movement through skin of (frog, toad), 138, 496

gastric emptying affected by salts of (man), 154, 256

high water intake effect on distribution of (man), 139, 46

hydrazme effect on cell membrane ex citability in absence of (frog), 150,

hydrazinium restoration of neuromuscular transmission in solution free of (frog), 147, 231

kidney slice uptake of water in anoxia affected by (rat), 136, 587

hthrum effect on rate constants of efflux from muscle of (frog), 147, 597

Sodium, membrane current at node of Ranvier affected by (Xenopus lacus) 148, 194

movements in single muscle fibres of (frog), 145, 405

nerve degeneration affecting content of (cat), 135, 282

neuromuscular transmission affected by (stick insect), 138, 123

non meduliated fibre post-tetanic hyper polarization affected by (rabbit), 136, 89

parotid gland secretion of (sheep), 144, 112

parotid secretion Na K ratio affected by rapid change in balance of (sheep), 138, 44

permeability of toad and squid nerve to, 152, 159

plain muscle activity affected by reduction of (guinea pig), 141, 479

plain muscle potentials in absence of (vertebrate), 140, 161

quantitative description of currents in myelinated nerve fibre of (Xenopus lucres), 151, 491

receptor potentials affected by (cat), 142, 382

receptor potentials in Pacinian corpuscle affected by, 138, 31 P

recovery of uterine segments exposed to cold dependence on (rabbit, cat), 154, 432

relation of metabolism of uterine segments to excretion of (rabbit, cat), 154, 445

removal rate from anterior chamber of eye of (cat, rabbit), 151, 205

renal cortex slices from new born content of (mammal), 153, 358

rest and activity effect on fluxes of (Chura globularis), 144 514

reticulo rumen sac epithelium active transport of (sheep), 146, 239

salivary flow effect on concentration in saliva of (sheep), 135, 613

selective appetite for (sheep), 154, 51 P seminal vesicle mucosa incubation effect on concentration of (guinea pig), 135,

215 skeletal and cardiac muscle Na and K

contents affected by concentration in plasma of (rat), 140, 190 skoletal muscle secretion of (frog), 148, 51

skeletal muscle secretion of (170g), 140, 52 sugar transport by intestine affected by (toad), 151, 62

taenia coli spike frequency and tension affected by concentration of (guinea pig), 136, 569

- Sodium, temperature effect on renal tubular transport of (dog), 142, 208
  - uterine segments reversible uptake in cold of (rabbit, cat), 154, 426
  - ventricle action potential affected by concentration of (frog), 154, 392
  - ventricular fibrillation affected by calcium and (rabbit), 141, 369
  - vitreous and aqueous humour exchange of (rabbit), 137, 110
- Sodium chloride, mucosal mechano receptors in small intestine stimulation by (cat), 139, 361
- Sodium conductance, calcium effect on relation between membrane potential and axon (squid), 137, 222
- Sodium depletion, bone sodium exchange affected by (rat), 137, 55 P, 139, 479
  - corticosteroid secretion by autotrans planted adrenal gland affected by (sheep), 147, 37
  - parotid saliva secretion rate and com position affected by blood supply variations in (sheep), 135, 227
  - parotid secretion affected by other extra cellular electrolyte changes during (sheep), 140, 129
  - parotid secretion Na K ratio affected by rapid increase in blood Na during (sheep), 138, 44
  - saliva composition affected by (sheep), 150, 529
- Sodium efflux, 'energy rich' phosphate compounds effect on giant axon (squid), 152, 561
  - summation of Na-dependent and K dependent components of muscle (frog), 147, 603
- Sodium excretion, hydrocortisone, DOCG and aldosterone action on (man), 151, 312
  - posture change effect on diurnal rhythm of (man) 148, 490
- stilboestrol effect on (dog), 145, 229
- Sodium flux, calcium action on erythrocyte (man) 149, 570
  - stimulation effect on single muscle fibre (frog), 145, 410
- Sodium influx, sodium concentration effect on muscle (frog) 147, 613
- Sodium lack, barum effect on B and C nerve fibres subjected to (rabbit), 145, 562
- Sodium permeability, steady state in activation in medulated noise of (\cnopus) 148 669
- Soft palate, iodide concentration by glands of (mammal) 145, 600

- Soleus motoneurones, stretch reflex affected by excitation and inhibition of (cat), 147, 556
- Soleus muscle, adrenaline action on contractions of (cat), 144, 100
  - neuromuscular interaction in isometric contraction of (cat), 143, 387
  - tension dependence on extension in stretch reflex of (cat), 147, 521
- Solute transfer, moving fluid in biological tubes and theory of, 145, 14
- Soma-dendritic membrane, chromato lysis of motoneurones effect on (cat), 143, 27
- Somatic reflexes, visceral afferent nerve fibres stimulation effect on (rat), 140, 201 Sorbital, foetal fructors formetion from
- Sorbitol, foetal fructose formation from (sheep), 146, 41 P
  - fructose formation by perfused isolated foetal and neonatal liver from (sheep), 153, 201
  - thiamine sparing activity of other polyhydric alcohols and (rat), 150, 17P
- Sound, corticotrophin release from pituitary by loud (rat), 146 107
- Space constant, potassium action on medullated nerve (Xenopus), 148, 676
- Spatial summation, background intensity effect on visual (man), 141, 337
- Spatial temperature gradient, thermo receptor stimulation and (cat), 148, 180
- Species difference, thyroid gland response to bacterial stress showing (mammal), 144 229
- Specific dynamic action, pure protem, fat, carbohydrate and mixed diet effect on (man), 149, 82P
- Spectral sensitivity, coloured adapting field in determination of ganglion cell (frog), 149, 318
  - excitation pools in retina and (frog), 149,
- 'eye spots' showing (flatworm), 143, 373 Speech, expiratory muscles involved in (man), 138, 17P
- Spermatozoa, factors affecting motility of (toad), 135, 49 P
  - immobilization by auto antibodies of (T), 147 10 P
  - passive transfer of autosensitization by (guinea pig), 147, 30 P
  - pH, tonicity and electrolyte concentration effect on motility of (dog), 141, 273
  - potassium magnesium and calcium effect on motility of (dog) 142, 494
- Spermine oxidase, species difference in content in plasma of (mammal), 145, 124

Spike potential, interpretation of moto neurone (cat), 139, 198

Spinal afferent synapses, investigation of (cat), 153, 306

Spinal cord, acetylcholine action on activity of (cat), 141, 169

afferent fibre potentials in, 146, 31 P afferent fibre terminations excitability in (cat), 142, 1

cutaneous nerve stimulation effect on activity in dorsal horn of (cat), 137, 126 excitability and conductivity variations in long fibres in (frog) (T), 143, 35 P

intracellular recording from primary af ferent fibres in (cat), 149 250

measurement of extracellular currents and potentials in (frog) (T), 148, 4P

motoneurone spike potentials in (cat), 139, 198

presynaptic changes and post tetanic potentiation in (cat), 149, 274

presynaptic inhibition in, 154, 28P

procaine site of action on isolated (frog), 140, 213

properties of neurones in dorsal horn of (cat), 145, 49P

recurrent inhibition in (cat), 146–380 reflex activity in small motor fibres from lumbar (rat), 148, 28 P

response patterns in dorsolateral tract of cat's (T), 148, 82P

rigidity following anoxia of (dog) 146, 594 scratching movements elicited by topical application of drugs to upper cervical (cat), 149, 65 P, 151, 502

splanchnic afferents pathway in (cat), 137, 66

tendon organ afferents synaptic actions on motoneurones in (cat), 138 227

Spinal cord potentials, strychnine action on (cat), 145, 179

Spinal cord transection, differentiation of fast and slow muscles affected by (cat), 150 406

plasma catechol amines affected by (man), 141, 4P 154, 246

pulmonary oedema dependence on level of (guinea pig) 145, 377

visceromotor reflexes affected by (cat) 141, 490

Spinal interneurones, background dis charge and evoked responses of (cat), 147, 364

properties of (cat) 147, 346

supraspinal control of (cat), 147, 565

Spinal lesions, cortical response to cu tancous nerve stimulation affected by (cat), 142, 551 Spinal man, thermoregulation in, 142, 406 Spinal motoneurones, axon collateral in hibition of different types of (cat), 149, 376

cerebellar anterior lobe stimulation effect on excitability of (cat), 148, 26P

electrical constants of membrane of (cat) 145, 505

potential fields initiated during mono synaptic activation of (frog) 150, 633 strychnine and other drugs action on inhibition of (cat), 145, 175

Spinal neurones, chemical excitation by acidic amino acids of (cat), 150, 656

 $\gamma$  amino n butyric acid and  $\beta$  alanine de pression of (cat), 146, 185

procesine and atropine action on (cat), 153, 17

synaptic action during and after repetitive stimulation of (cat), 150, 374

types of (cat), 154, 89

Spinal preparation, fusimotor neurone discharges in (cat), 143, 195

spinal reflex activity in decerebrate and in (cat) 151, 107

Spinal reflex, differential supraspinal control of (cat), 148, 70P

pharmacological studies on (cat), 136, 420

recurrent inhibition of (cat), 146, 384 suprasegmental and dorsal root activity interaction with (cat), 151, 103

visceral afferent nerve stimulation effect on (cat), 150, 105, (rabbit) 150, 466

Spinal rigidity, interneurones and (dog), 146 596

Spinal roots, selective block by phenol of small fibres in (cat), 146, 6P

Spinal subarachnoid space, dye move ment in (eat), 153, 59 P

Spinal ventral roots, discharge on direct current stimulation of (frog) (T), 137, 75 P

Spindle control, soleus isometric con traction and (cat), 143, 395

Spindle motor fibres, ether action on discharges of (T), 152, 3P types of (rabbit), 149, 120

Spirometer, 'balanced closed circuit' low resistance 147, 7P

electrical recording of volume changes in 153, 7P

Spirometry, portable apparatus for (man), 142, 17 P

Splanchnic afferents, spinal pathway of (cat), 137, 66

Splanchnic afferent pathways, thalamic representation of (cat), 140, 462

- Splanchnic nerve, compound action potential of (cat), 140, 465
  - reflex activation of intercostal nerves by non myelinated fibres in (rabbit), 150, 463
  - size distribution of invelinated fibres in (cat) 140, 467
- Splanchnic nerve stimulation, reticulum and rumen contractions affected by (sheep goat), 151, 148
- Splanchnicotomy, bladder distension reflexes affected by (cat), 138, 313
- flexes affected by (cat), 138, 313 Spleen, anticholmesterases action on (dog) 139, 489
  - fleas effect on size of (vole), 151, 27P liver blood flow influenced by (rat) 136,69 neuronal rest effect on output of sym pathetic transmitter from (cat), 147,
  - supersensitivity to noradrenaline of de nervated (cat), 147, 138
  - sympathetic transmitter output from (cat) 137 25 P, 138, 81
- Splenectomy, anaphylactic shock and (guinea pig), 142, 5P
- ervthrocyte life span affected by (rat), 146 222
- liver blood flow following hepatic artery ligation affected by (rat), 139 169
- Splenic nerve, reserpine action on catechol amines in (mammal), 141–138
- Spontaneous activity, recording by photo electric method of (monkey), 138, 3P SRS, nature and actions of, 136 134
- Starch gastric emptying affected by (man),
- 154 271 Starch hydrolysate, small intestine ab sorption of (rat) 154 41
- Starvation, fertility affected by (mouse) 147 221
- ketonaemia and metabolism in (rat) 151, 51P
- Stearate monomolecular films, sta bilizer and labilizer effects with 148 57 P
- Stellate ganglion, afferent fibres passing through (eat), 138, 30 P
  - connexions of mantle receptor units in (octopus) 153 576
  - pulmonary vasoconstructor fibres in (cat) 145-16 P
- Stereotaxic instrument, alignment of long needle electrodes check by 151
- Sterno-costal muscle, activity in respiration of (man) 151 394
- Stick insect ions effect on neuromuscular transmission in 138 119

- Stilboestrol, renal activity affected by (dog), 145, 225
- Stiles-Crawford effect, rod-cone inter action in retina analysed by (frog), 149, 303
- Stimulation frequency, oxygen consump tion and contractile tension of papillary muscle affected by (cat), 151, 191
  - presynaptic neuromuscular block dependent on (rat), 149, 3
- Stimulator control, excitation of nerve and muscle alternately provided by, 137, 1P
- Stimuli, interference between responses to two nearly simultaneous (man), 140, 29 P
- Stimulus coupler, low-capacitance, low output impedance, 152, 1 P
- Stomach, cineradiography and direct in spection of ruminant (T), 139, 8P
  - cortical responses to hyperacidity and distension of (cat), 143 56P
  - emptying of various solutions instilled into (man) 154, 254
  - 5 HT liberator in (dog), 138 489
  - histamine and other substances action of isolated strips of (sheep), 143, 82 P
  - noradrenaline action on pepsin secretion by (dog), 142 28 P
- Stomach distension, portal venous ligation effect on gastric pouch response to (dog), 144 130
- Stomach movements, simultaneous recording of flow of digests through duodenum and (rummants), 154, 55 P
- Stop-flow technique, urme concentration pattern by (dog) 144, 19 P
- Strain gauge plethysmograph, skin and muscle blood flow measurements by (man) 140 318
- Strength-duration curve, skin mechano receptor (frog) 141 314
- Stress, adrenal ascorbic acid and lipid in wild rate affected by acute (rat) 135 390
  - blood corticotrophic activity after ad renalectomy affected by (rat) 150 688
  - pituitary stalk section effect on thyroid gland response to (rabbit), 136-370
  - thyroid gland response to (guinea pig)
    151 40
- Stress relaxation, lung volume effect on (rabbit), 146 88
- Stretch receptors, antidromic stimulation effect on (cat), 148 252
  - intramuscular propagation of sensory im pulses from (cat), 145, 7P

- Stretch receptors, quantitative histological investigation in limb muscles of (cat), 149, 7P
  - sinusoidal stretching effect on activity of (cat), 144, 373
  - sate of impulse initiation in nerve cell of (lobster), 143, 138
  - stretch effect on tension and rate of dis charge of (crayfish), 154, 27 P
- Stretch reflex, apparatus for studying by slow stretches (T), 138, 3P assessment of changes in sensitivity of
  - (man), 144, 2P brain inhibitory factor effect on (cat), 139,
  - contralateral muscle tension effect on (cat), 145, 193
  - electrical and mechanical rhythmicity in voluntary muscle relation to (man), 138, 14P
  - γ efferent paralysis effect on (cat), 147, 548
  - $\gamma$  motoneurone activity effect on relation between tension and extension in (cat), 140, 54 P
  - recurrent inhibition action in (cat), 154,
  - procaine effect after decerebration by anaemia on (cat), 138, 28P 140, 408
  - procame on nerve affecting (cat), 135, 245
  - Renshaw circuit and  $\gamma$  system in (cat), 138. 394
  - tension dependence on extension of soleus muscle in (cat), 147, 521
- Striate cortex, receptive fields of single neurones in (cat), 148, 572
  - single unit activity in unrestrained animal of (cat), 147, 226
- Striated muscle, extracellular space within fibres of (Carcinus maenus) (T), 149, 82 P
  - local activation of (frog, crab), 135, 17P
- Stria terminalis, affective reactions on stimulation of (cat), 145, 253
  - defence reactions from amygdala and (cat), 153, 27P
- Strontium, crustacean muscle fibre mem brane properties affected by (crayfish), 142, 525
  - heart muscle penetration by (frog) 138, 510
- Strophanthin, ascites tumour cell sodium transfer affected by (mouse) 140 70 sodium movement in muscle affected by (frog), 135, 572

- Strychnine, γ ammobutyric acid anta gonism to (mouse), 146, 79
  - spinal motoneurones inhibition affected by (cat), 145, 176
  - summary of action of, 145, 44P
- Strychnine convulsions, brain inhibitory factor effect on (mouse), 139, 84
- Subarachnoid space, histamine recovery after cerebral ventricular mjection from (cat, dog), 140, 176
  - passage of circulating adrenaline into (cat), 150, 34
- Subatmospheric pressure, toe heat elimination affected by exposure of foot to (man), 135, 171
- Subclavian body, chemoreceptor impulse activity from (cat), 143, 55 P
- Subcutaneous air bubbles, clinical application of CO<sub>2</sub> estimation in (man), 146, 7P
- Subcutaneous fat, response to immersion in cold water affected by (man), 153,
- Subcutaneous gas equilibration, tech nique of (man), 146, 1P
- Subcutaneous tissue thickness, selection of representative sites for measuring (man) (T), 135, 19P
- Sublingual gland, include concentration by (mammal), 145, 600
- Submandibular gland, iodide concentration by (mammal), 145, 600
- Submarine escape training, physio logical problems in (man), 151, 1P
- Submaxillary gland, gaseous metabolism of normal and denervated (cat), 145, 551
  - secretion after partial postganglionic de nervation of (cat), 154, 1P
  - specific secretory sympathetic fibres to (cat), 153, 1
  - sympathetic denervation effect on sensitivity to noradrenaline of (cat), 153,
  - sympathetic secretory fibres for (cat), 149, 67P
- Submaxillary saliva, secretion rate and composition of (calf, sheep), 150, 520
- Substance P, enzymic removal of AMP from extracts of (mouse), 153, 69 P
  - irin differentiation from (rabbit), 135,
  - temperature reduction effect on response of ileum to (guinea pig), 137, 400
- Succinic dehydrogenase, 5 HT storage granules and (dog), 145, 475
- Succinylcholine, motor end plate 'do sensitization' by (frog), 138, 71

Suckling, neurohypophysial hormones liberated by (dog) (T), 143, 68 P oxytocin and ADH release by (man), 149,

oxytocin and vasopressin release caused

by (dog), 152 516 Sucrose, removal rate from anterior cham

ber of eye of (cat), 151, 205
small intestine absorption of (rat), 154,

taema coli affected by replacement of sodium with (guinea pig), 136, 575

Sucrose-gap apparatus, non medullated nerve action potentials studied by, 135, 2P

Sucrose taste preference threshold, DOCA effect on (rat), 151, 253

Sugars, microchemical identification of osazones of, 135, 28 P

Sulphate, plain muscle activity affected by replacement of Cl by (guinea-pig), 141, 476

renal cortex penetration by (rat), 143, 278

Sulphobromophthalein, adsorption on alumna chromatographical columns of, 146, 26 P

estimation in turbid and haemolysed plasma and in liver of 153, 11 P release by perfused liver of stored (rat),

148, 15 P Superfused rat uterus, blood oxytocic

activity directly determined on (rab bit), 152 381

Super-fecundity, experimental (mouse)
(T) 135, 57 P

Superior cervical ganglion, ACh role in virus infected (rat) 139 145

banum effect on ACh release from (cat), 154 39 P

electron micrographs of synaptic areas in (rabbit), 137, 38 P

histamine pilocarpine and 5 HT effect on transmission in (cat), 135 66

number size function and origin of pre ganglionic fibres to (cat), 135 136

partial denervation and return of responses in (cat) 135 137

preganglionic denervation and axotomy effects on cholinesterase in (rat) 142,

sprouting after partial deneration in (cat) 135 153

surgical approach to (sheep), 135-52
Superior colliculus, optic tract fibres
termination in (monkey) 149-5P
Superior years carry street

Superior vena cava, atnal receptors in (dog) 136 187

Superior vena cava, atrial receptor dis charge affected by occlusion of (dog), 136, 180

total venous return and proportion from (dog), 142, 370

Supplemented inhibition, crustacean muscle showing, 143, 433

Supranodose vagotomy, vagus nerve stimulation effects affected by (cat), 135, 186

Supra-optic nucleus, single neurone activity in response to osmotic stimulus in (rabbit), 148, 557

Supra-opticohypophysial tract, thyroid activity affected by stimulation of (rabbit), 143, 254, 152, 537

Supraspinal centres, visceromotor re flexes influenced by (cat), 141, 493

Supraspinal control, recurrent inhibition of extensor motoneurones affected by (cat), 154, 317

Supraspinal stimulation, muscle spindles affected by (cat), 147, 388

Surgical implants, stress and fatigue corrosion in (T), 136, 6P

Surplus excitation, recurrent inhibition in reflex action of motoneurones measure ment of (cat), 154, 288

Survival at sea, channel swimmers 1955 (Film), 135, 5P

Suxamethonium, temperature effect on blocking action of (cat), 141 426 Sweat, bradykinin in (man), 142, 222

emergence in central foot-pad of (cat), 138 26 P

mucoprotein in (horse) 147 74

urea concentration in (man), 137, 261 wind speed effect on evaporation of

(man), 147 253

Sweat glands, adrenaline, ACh and other agents action on (man), 148 590

arterial occlusion effect on responses of (man), 148, 613

impedance change in relation to duct filling and emptying in (cat) 143 48P

is chaemia effect on response to acetyl  $\beta$  methylcholine and ACh of (man), 142, 32P

temperature and action in foot pad of deneriated (cat) 153 45P

Sweat gland failure, body surface and forearm enclosed in bag comparison of (man) 154, 62 P

Sweating, leg cooling effect on forearm rate of (man), 152 65 P

pituitrin action on (man) 154, 44P posture effect on (man) 135 63P pressure effect on (man) 151 591 Sweat rate, humidity at different tem peratures effect on (man), 144, 299

Sweet-pea poisoning, bone and skin strength affected by (rat), 139, 17P

Sympathectomy, emotional stress effect on forearm blood flow affected by (man), 148, 634

limb blood flow response to hypogly caemia affected by (man), 139, 97

Sympathetic afferent nerve fibres, mono synaptic and polysynaptic reflex re sponses affected by stimulation of (cat), 150, 105

Sympathetic cardioacceleration, central nervous control of (cat), 151, 225

Sympathetic C fibres, after potentials in (rabbit), 144, 444

Sympathetic chain, mono and poly synaptic reflexes affected by stimula tion of (cat), 140, 202

Sympathetic denervation, salvary gland respiratory enzymes affected by (cat, rabbit), 152, 103

submaxillary gland sensitivity to nor adrenaline affected by (cat), 153, 9

Sympathetic ganglion, ACh role in virus infected (rat), 139, 145

cholmesterase in decentralized and axo tomized (rat), 144, 27 P

Factor I and  $\gamma$  aminobutyric acid effect on response to stimulation of (rabbit), 150, 314

inhibitory system in virus infected (rat), 146, 428

presynaptic slow potentials in virus infected (rat), 151, 217

reserpine effect on catechol amines in (mammal), 141, 134

Sympathetic ganglion cells, infant and young (man), 148, 44P

Sympathetic secretory fibres, submaxil lary gland receiving (cat), 153, 1

Sympathetic stimulation, muscle spindles affected by (cat), 151, 332

noradrenalme action on (dog), 150, 295

Sympathetic nerve stimulation, parotid gland secretion affected by (sheep), 144, 476

Sympathetic nervous system, collateral sprouting in (cat), 135, 133

reserpine effect on peripheral (mammal), 141, 132

Sympathetic transmitter, neuronal rest effect on output from spleen of (cat), 147, 13P

time course of release in intestine of (cat), 143, 45 Sympathin, stimulation frequency effect on output from spleen of (cat), 138 84

Sympatholytic drugs, bronchodilator action of nicotine affected by (guinea pig), 144, 198

Sympathomimetic amines, depolarizing and blocking action on superior cervical ganglion of (cat), 151, 3*P* 

iris and blood vessels affected by (cat), 153, 64P

reserpine effect on actions of (mammal) 144, 314

Sympathomimetic drugs, microchemical tests for identification of, 135, 35P

Sympathomimetic optical isomers, differences in inhibition of small intestine produced by (guinea pig), 136, 18P

Synapse, afferent nerve section effect on central (cat), 145, 204

current voltage relationship in giant motor (crayfish), 145, 308

impulse transmission across giant (squid), 143, 114

Synaptic activation, repetitive, 149, 43P Synaptic end-feet, distribution in central nervous system of (cat), 147, 55P

Synaptic potentials, interneurones showing (cat), 147, 352

lateral geniculate body showing (cat), 154, 523

properties at giant synapse of (squid), 143 118

Synaptic potentiation, conditioning to tanus to spinal neurones inducing (cat) 150, 383

Synaptic-rectifier hypothesis, giant motor synapses and (crayfish), 145, 306 Synaptic stimulation, effect of repetitive

(cat), 150, 378

Tachistoscope, visual perception in homo nymous half fields studied by (man), 140, 30 P

Tadpole, oxygen consumption during metamorphosis of (amphibia), 145, 353

Taenia coli, acetylcholine action on electrical properties of (guinea pig), 143,

adrenaline and DNP actions on electrical properties of (guinea pig), 143, 183

excitation and conduction in (guinea pig), 142, 420

nonic environment changes effect on activity of (guinea pig), 141 464

metabolic inhibitors effect on electrical and mechanical activity of (guinea pig), 136, 310 Taenia coli, potassium chloride effect on membrane potential, electrical activity and tension of (guines pig), 137, 77 P

sodium concentration effect on electrical and mechanical behaviour of (gumea pig), 136, 569

Tap receptors, interesseous region con tammg (cat), 153, 80

Taste, stimulation and ablation in thalamus of pathway of (goat), 137, 22P

thalamic relay for (goat), 139, 191

Taste preference thresholds, DOCA effect on salt and sucrose (rat), 149,

Taste threshold, high water intake effect on (man), 138, 35P, 139, 53

sodium depletion effect on (calf), 151, 42P

Tectospinal tract, axo dendritic synapses of (chicken) (T), 153, 42P

Teeth, mitoses in pulp and periodontal connective tissues of continuously erupting (rabbit), 143, 77P

Temperature, ampullae of Lorenzini af fected by direct current stimulation and by change in (Raja clavata), 145,

anaphy lactic reaction affected by (gumea pig), 135, 320

anoxia effect on new born influenced by (sheep), 146, 333

artery responses to constructor drugs affected by (bullock), 142, 395

atrial arrhythmia affected by (rabbit), 137, 86

blood vasoconstrictor substances affected by (rabbit), 138, 405

breathing in young affected by reduction of (rabbit), 149 149

calcium effect on erythrocyte perme ability affected by (man) 149, 573

"Ca entry into giant axon during stimu lation affected by (squid), 138, 265

calf blood vessels distensibility affected by (man) 140 124

conduction velocity and intracellular action potential of atria affected by (rabbit) 140 338

exercise hyperaemia affected by (man), 145, 447

5 HT content of tissues affected by changes in (rat) 151, 410

foetal loss and resorption due to high environmental (rat) 135 451

foctal oxygen consumption affected by (sheep) 135 630

forcarm muscles sustained contraction duration affected by (man), 143 454

Temperature, haemoglobin combination with nitric oxide affected by (sheep), 136, 518

hypoxia action on oxygen consumption of new born and adult affected by (guinea-pig, cat), 149, 346

ileum responses affected by reduction of (guinea pig), 137, 396

lung pressure volume relationship after death affected by (rabbit), 149, 185

metabolic rate in young affected by (pig), 154, 408

metabolism of new born affected by re duction of (pig), 147, 124

muscle spindle discharge affected by (cat), 153, 218

negative after potential of sympathetic C fibres affected by (rabbit), 144, 448

neuromuscular blocking agents' action affected by (mammal), 141, 425

non medullated fibre post-tetanic hyper polarization affected by (rabbit), 136,

oxygen consumption during metamorphosis affected by (amphibia), 145,

oxygen consumption of new born affected by (pig), 142, 37 P, 147, 335, (rat) 154, 154

passive sensitization affected by (guinea pig), 150, 548

peripheral metabolism of 121I thyroxine affected by variation in (sheep), 135, 288

peristaltic reflex in ileum affected by (guinea pig), 136 256

plain muscle relaxation affected by (Helix), 141, 404

presynaptic neuromuscular block affected by (rat), 149, 11

rearing at two different temperatures effect on tolerance to high (mouse), 138, 54 P

recovery from muscular fatigue affected by (man) 147 163

respiration in new born affected by (rabbit) 148, 11P

rhodopsin regeneration affected by (albino rat), 136 628

rhythmical activity of groups of motor units affected by reduced (man), 137,

series elastic component in muscle af feeted by (frog) 143 533

skeletal muscle fibre action and after potentials affected by (frog), 142, 97 skeletal muscle membrane constants af

fected by (cat) 147, 453

Temperature, sodium efflux from musclein Na and K free media affected by (frog), 147, 609

sodium ion secretion by skeletal muscle affected by (frog), 148, 67

sodium movement in muscle affected by (frog), 135, 570

touch receptor discharge affected by changes in (cat), 153, 91

uterine cervix extensibility affected by (rat), 148, 540

vagus facilitation affected by (rat), 146, 205

water transport in small intestine affected by (rat), 136, 635

Temperature-controlled watch, acclimatization studies in the field use of, 147, 34P

Temperature receptors, part played in raising metabolic rate of fat and thin men exposed to cold by superficial and deep (man), 153, 46P

Temperature regulation (white rhino ceros), 143, 51 P

hexamethonium action on (man), 141, 281 Temporal lobe, acoustic discrimination and projections from (cat), 147, 17P

Temporal summation, background in tensity effect on visual (man), 141, 337

Tendon jerk, antidromic inhibitory effect on (cat), 138, 396

procame on nerve affecting (cat), 135, 245 Tendon organ afferents, synaptic actions on motoneurones caused by impulses in (cat) 138, 227

Tenotomy, motor reflexes changed by (rabbit), 152 23 P

Tension-extension relation, γ efferents paralysis effect on (cat), 147, 548

stretch reflex of soleus and (cat), 147, 521
Tension-length relationship, plam
muscle tonic response affecting (My
tilus), 149, 165

Tension receptors, interesseous region containing (cat), 153, 82

TEPP, pulmonary circulation affected by (dog), 139, 250

pulmonary vascular resistance affected by (dog), 139, 277

spleen affected by (dog), 139, 489

Testicular descent, cremaster muscle and (rat), 151, 41 P

Testis, post natal development of (cat), 136, 40 P

Tetanic contraction, pressure receptors affected by (cat), 152, 258

Tetanus, A band length affected by (frog), 144, 416

Tetanus, muscle length effect on frequency of stimulation necessary for (cat), 147, 539

Tetanus toxin, motoneurone inhibition affected by (cat), 135, 655, 145, 184

Tetramethylammonium, crustacean muscle fibre membrane properties af fected by (crayfish), 142, 522

distribution in tissues of (sea anemone), 151, 302

nerve membrane in high potassium con centration affected by (squid), 148, 311

voltage current relations in nerve cell affected by (mollusc), 148, 170

Thalamus, insulin and glucose effects on heat production and blood flow in (monkey), 154, 31

nucleus gracilis connexions with (cat), 153, 343

splanchnic afferent pathways represented in (cat), 140, 462

taste pathway stimulation and ablation in (goat), 137, 22P

taste relay in (goat), 139, 191

tubocurarine effect under pentobarbitone and chloralose on (cat), 138, 186

Thermal balance, body temperature control in (man), 137, 1

Thermal injury, histamine role in vascular permeability changes in mild (guinea pig, rat), 148, 9 P

Thermal polypnoea, initiation of (calf), 136, 413

Thermal stress, respiratory activity af feeted by (calf), 136, 300

Thermistor thermometer, dual range for field or laboratory work of, 151, 11 P

Thermo-electric 'cold' stimulator, 153,

Thigh muscles, double spike response of group I afferent volleys from (cat), 136, 529

integrative pattern of Ia synaptic actions on motoneurones of (cat), 144, 271

Thiocyanate, mammary gland iodide con centrating power affected by (mam mal), 135, 647

potassium contracture of single muscle fibres affected by (frog), 153, 407

skin radio iodide content affected by (rat), 148, 685

Thiosemicarbazide, virus infected sympathetic ganglia affected by (rat), 146, 433

Thiouracil, hair uptake of radio iodide affected by (rat), 152, 476

Thioureas, renal clearance of (dog, man), 145 22

- Thoracic compliance, expiratory resistance and (man), 136, 563
  - factors affecting (man), 136, 1
- Thoracic duct, lymph flow and lymphocyte output in (gumea pig), 136, 227
  - pressure waves in (man) (T), 145, 3P
- Thoracic duct lymphocytes, intravenous mfusion of lymphocytes effect on (rat), 146, 57
- Thoracic sympathetic chains, cardioaccelerator fibres course m (sheep), 139, 424
- Thoracic vagus nerve, size frequency distribution of invelinated fibres in (cat), 135–195
- Thorax, elastic properties in anaesthefized paralysed subjects of (man), 136, 1
  - elastic pressure volume curves of living (rabbit), 138, 474
- Threshold, retmal ganglion cell recording of absolute (cat), 137, 327
- Thrombin, formation time of (man, horse), 142 199
- Thunberg's micro-respirometer and barospirator, 154, 2P
- Thymidine, lymphocyte formation after infusion of lymphocytes and tritium labelled (rat) 146, 60
- Thyrocervical artery, brain supplied by (cat) 148, 101
- Thyroid activity, acute effects of thyrotrophic hormone or of hypothalamic s'imulation on (rabbit), 148 5P
- hypothalamic stimulation affecting (rabbit) 143 246 152 527
- Thyroid function, hypothalamic lesions effect on (ferret) 147–98
- Thyroid gland, adrenalme and nor adrenalme effects on (man, dog) 143, 12P
  - adrenaline and noradrenaline effects on (man dog) 151 261
  - continued toxic stress effect on activity of (rat guinea pig) 144 243
  - partial hypophysectomy effect on (rab bit) 149 396
  - pituitary stalk section effect on activity of (rabbit) 136-364
  - species difference in response to bacterial stress of (mammal) 144 229
  - stress effect on activity of (guinea pig), 151 40
  - temperature variation and <sup>111</sup> thyroxine effect on size and histology of (sheep) 135 293
  - Thyroid hormone, biliary clearance of (rat) 135 430

- Thyroid hormone, cold resistance and oxygen consumption after adrenalectomy and thyroidectomy affected by (mouse), 138, 44P
  - faecal clearance rate of endogenous (rat), 136 198
  - placental transfer of (rabbit) 142, 333
- Thyroid vessels, anatomy of and blood flow through (rabbit), 152, 530
- Thyrotrophic hormone, heart work and size control by (rat), 150, 254
  - pituitary stalk section effect on thyroid gland response to injected (rabbit), 136, 368
  - sensitive in vitro technique for assay of (guinea-pig) 140 36P
  - thyroid activity affected by mjection of (rabbit), 152 532
- Thyroxine, barbiturate effect on serum protein binding of (man, duck), 154, 66P
  - biliary clearance relation to serum protein binding of (rat), 135 426
  - bone calcrum and sodium affected by (rat), 142, 447
  - cholesterol and fatty acid synthesis by cell free fractions of liver affected by (rat), 154, 145
  - diaphragm binding of (rat), 149, 410 environmental temperature effect on peripheral metabolism of (sheep), 135,
  - filter paper electrophoresis in barbiturate buffer of, 152 391
  - histamine release and (rat) 138, 51 P limb-bone rudiments in ritro metabolism of (chick) 144 254
  - mammary glands reaction to ovarian steroids after hypophysectomy and (rat) 148, 10P
  - oxygen consumption during metamorphosis induced by (amphibia) 145–358
  - paper electrophoresis in tris maleate buffer of 152 601
  - pituitary stalk section effect on thyroid gland response to injected (rabbit), 136, 367
  - placental transfer of (rabbit) 142 331
  - serum protein binding of (man) 148, 64P (various) 153 179
  - Thyrocine-binding proteins, foetal and maternal (rabbit) 146 347
    - passage between mother and foetus of (rabbit) 151 66
  - Tidal air volume, anticholinesterase action on (dog) 139 276
  - Timed airway resistance (man), 145,

- Time, thyroid gland activity response to continued toxic stress variation with (rat), 144, 244
- Time coding, simple method for use with continuous film records of, 141, 25 P
- Time-scale generator, digital delay and, 142, 3P
- Tissue electrolytes, sensitization effect on (guinea pig), 147, 109
- Tissue fluids, low barometric pressures and boiling of (man), 142, 50 P
- Tissue-section artifacts, incomplete removal of embedding media and (T), 154, 57P
- Tissues, turnover of exogenous histamine in (rat), 147, 445
- Toad, blood pressure and pressure pulses in arterial arches of, 137, 12
- Tocopherols, oxygen poisoning affected by (rat), 140, 37
- Toe, subatmospheric pressure on foot effect on heat elimination from (man), 135, 171
- Tongue, cold receptors stimulation in (cat), 148, 180
- thalamic units responding to cooling of (cat), 147, 12P
- Tongue vasodilatation, plasma kinin formation relation to (cat), 144, 532
- Tonic response, tension redevelopment after release in plain muscle (Mytilus), 149, 163
- Touch, frequency of firing in medullated and non-medullated fibres signalling (cat), 139, 405
  - hypothalamic single neurones response to (rabbit), 148, 560
  - non medullated fibres signalling (cat), 139, 385, 140, 2P
  - non myelinated fibres signalling cold and (cat), 150, 277
- Touch receptors, nerve fibre diameter and characteristics of (cat), 153, 105
- properties of cutaneous (cat), 153, 88 Trachea, nicotine action on (guinea pig), 144, 195
  - stress relaxation and hysteresis shown by (rabbit), 146, 91
  - tubocurarine action on ciliary activity in (rabbit), 139, 157
- Tracheal breathing, humeral breathing comparison with (chicken), 138, 287
- Tracheal pressure, vascular bed of iso lated perfused lungs affected by (cat), 144, 24 P
- Tracheal resistance, respiratory effort immediately affected by altered (cat, rabbit), 139, 16P

- Transaminase activity, perfused heart showing (rat), 150, 621
- Transamination, glutamic and aspartic acids absorption by small intestine showing (dog), 135, 442
  - small intestine in vivo (mammal), 138, 41 P
- Trans-Antarctic Expedition, physic logical equipment for (T), 135, 6P
- Transducer system, new versatile, 149, 2P
- Transistor stimulator, constant-voltage general purpose, 147, 6P
  - for class work, 153, 1P
- Transmitter substance, spontaneous re lease in multiquantal units of (rat), 136, 595
- Transmural pressure, digital resistance vessels affected by reduced (man), 136, 498
- Transmural pressure increase, forearm resistance vessels' tone affected by (man), 149, 614
- Transplanted gastric pouch, secretion by (dog), 148, 295
- Traube waves, preganglionic sympathetic activity during (cat), 150, 120
- Treadmill walking, energy requirement in relation to sex and athletic training of (man), 153, 60 P
- Tremor, rhythmical activity of groups of motor units in (man), 137, 477
- Triads, local activation of muscle fibre and (frog, crab), 144, 438
- Trichinella spiralis, electron microscope studies in mouse striated muscle of (T) 154 57 P
- Trichlorethylene, pulmonary stretch receptors affected by germitrine and by (cat), 135, 503
- Triethyltin sulphate, intestinal transport and metabolism affected by (rat), 148,
- Trigeminal nucleus, single cell responses in caudal part of spinal (cat), 153, 12P
- Trigeminal sensory nucleus, graded af ferent stimulation effect on neurone activity in (cat), 153, 52
- Triiodothyronine, biliary clearance of (rat), 135, 430
  - limb bone rudiments in vitro metabolism of (chick), 144, 254
- placental transfer of (rabbit), 142, 333
  Trimethylthiourea, urme flow relation to
- clearance of (dog man), 145, 26
  Tri-ortho-cresyl phosphate, effects of skin absorption of (hen), 153, 20 P

Tritium, skeletal muscle labelling with adenine containing (frog), 145, 144

total body water measurement by (mam mal), 154, 169

Tropical anhidrosis, physiological ex planation of (horse), 135, 41P

Trotting, work output relation to load during (sledge dog), 137, 214

Trumpet playing, circulatory effects of (T), 145 3P

Trypsin, cervix extensibility affected by, 148 48P

Tryptophan, histamine stimulated gas tric secretion affected by (dog), 146,

Tubocurarine, carbachol and ACh quan titative antagonism at motor end plate to (frog), 152, 309

ciliary activity affected by (frog, rabbit), 139, 157

ciliary movement affected by (frog), 141

electrical activity of brain under chlora lose affected by (cat), 138, 178

electroplate membrane potentials affected by (ray) 142, 268

muscle temperature effect on action of (man), 149 116

Renshaw cell response to electrophoreti cally applied (cat) 141, 449

scratching movements elicited by applica tion to upper cervical cord of (cat), 151 509

scratch reflex affected by application to cervical cord of (eat) 153, 39

ate of action in enhancing evoked cortical potentials of (cat) 154, 38P

site of action on injection into cerebral lateral ventricle of (cat) 145 23P, 149

spinal motoneurones inhibition affected by (cat) 145 186

temperature effect on blocking action of (cat, dog) 141, 420

Twitch desynchronization, back response and (cat) 150 332

Tyramine, amine oxidase inhibition effect on (cat) 135 343

isolated heart affected by (guinea pig) 152 71 P

recerpine and noradrenaline effect on nctions of (mammal) 144 316

Udder blood flow and milk vield on per fusion with artificial media of (goat) 143 74 P

improved apparatus for perfusing (cow) 135 50P

Udder, valvular incompetence in venous dramage of (mammal), 153, 481

Udder blood flow, measurement in con scious animal of (goat), 137, 75P

Ultramicrotome, construction of, 137, 73 P

Ultra-thin sectioning, skeletal muscle examination in electron microscope using (T), 137, 11P

Ultra-violet absorption spectrum, skele tal muscle showing (frog), 148 383

Umbilical blood flow, gestation age effect on (sheep), 135, 631

velodyne flowmeter and venous occlusion plethysmograph measurements (sheep), 146, 297

Underwater animal sounds, analyser for (T), 143, 36P

Unmyelinated see Non-myelinated

Unsaturated fatty acid, cobra venom action on lecithin producing pharmaco logically active, 136, 141

Unsaturated hydroxy-fatty acid, mn identified as, 146, 269

Urea, kidney slice oxygen consumption and water content affected by (rat), 137, 21P

sweat rate and concentration of (man), 137. 261

Urecholin, inhibition by antral acidifica tion of acid response to (dog), 153, 70P

Ureter, electrical activity measurement in isolated perfused 135, 32P

Urethane, inhibition of hexose transfer in erythrocytes by (man) 141, 225

voltage current relations in nerve cell affected by (mollusc) 148 169

Urethra, external urethral sphincter re flexes from (cat) 149, 656

ganglia afferent nerve endings and mus culature of (cat) 139, 1P

Urine, composition in foetus of (rabbit, pig) 151 480

foetal age effect on composition of (sheep), 140, 1

kallıkrein excretion in (man) 148, 277 plasma kının forming enzymes in (man), 147 464 149, 477

posture effect on electrolyte excretion in (man) 139 337

routine analysis by class and 'field' methods of small quantities of (T), 135

utenne distension effect on volume and composition of (dog) 141 529 Urine collection, technique for (hen) (T),

154 55P

Urine creatinine, concentration in foetus of (guinea pig), 141, 326

Urine electrolytes, oxytocin effect on (man), 153, 553

Urine 5-HIAA, gastro enterectomy effect on (rat), 153, 239

Urine flow, dehydration effect on osmotic clearance relation to (rat), 139, 111 foetal age effect on (sheep), 140, 15

thioureas clearance relation to (dog, man), 145, 25

Urine secretion, water deprivation effect on (rat), 136, 238

Urocanylcholine, hypobranchial gland containing (invertebrates), 139, 442

Urokinase, kallikrein comparison with (man), 149, 477

Uterine cervix, hormones action on physical properties and collagen content of (rat), 152, 419

oestradiol, progesterone and relaxin effect on physical properties of (rat), 140, 46 P parturation effect on distensibility of (rat), 141, 34 P

pregnancy effect on physical properties of (rat), 148, 522

Uterine distension, urine composition affected by (dog), 141, 527

Uterine muscle, transmural stimulation and drug effects on circular and longitudinal components of (guinea pig), 136, 5 P

Uterine sensory nerves, action potentials from (rabbit), 148, 2P

Uterus, adrenalme action on (cat), 152, 243

adrenaline receptor lability in (cat), 149, 4P

diphtheria toxin action on (rabbit), 147, 516

distension stimulation on collagen forma tion in (rat), 148, 6P

histamine content of (man), 154, 417

hormone actions on endometrium of (dog), 148, 464

metabolism relation to active ion transport in (rabbit, cat), 154, 445

oestrus cycle and hormones effect on collagen of (rat), 135, 270

oxytocin and ADH action in labour on (man), 149, 447

pain producing substance action on (rat), 135, 352

post-pituitary hormones action on activity of kidney and (dog) 144, 80

sodium secretion and potassium uptake by isolated segments of (rabbit, cat), 154, 421 Vagal afferent fibres, conduction velocity in (cat), 138, 21 P

electrophysiological identification of single (cat), 142, 110

Vagal C fibres, ACh action on (rabbit), 152, 144

Vagal stimulation, acid inhibition of reticulo rumen contractions affected by (sheep), 147, 63

abomasal secretion affected by (sheep), 154, 122

adrenaline and atrial response to (cat, rabbit), 142, 174

gastric contractions altered after period of fast repetitive (cat), 138, 47P

gastrın release from pylone antrum by (dog), 148, 291

heart A-H interval affected by (cat, dog), 142, 134

inhibition and excitation of atria by (rabbit), 138, 172

isolated perfused heart affected by (rat), 145, 266

mechanical events of heart affected by (dog), 152, 72P

post activation potentiation of gastrio and intestinal contractions produced by (cat), 148, 437

reticulum contractions affected by af ferent (ruminant), 141, 5

temperature effect on gut response to (trout), 141, 41

Vaginal cycle, uterine distension effect on (guinea pig), 154, 50 P

Vagotomy, adrenaline hyperphoea affected by (mammal), 137, 380

gastric secretion and motility affected by (cat), 148, 426

gastric secretion response to histamine and 5 HT affected by (dog), 141, 32

high pressure oxygen effect on cardiac and respiratory function affected by (cat), 152, 511

pulmonary oedema induced by (guinea pig), 145, 374

rumen salivary secretion reflex affected by (sheep, calf), 148, 513

Vago-vagal reflexes, gastric and pan creatic secretion and gastro intestinal motility involved in (cat), 148, 417

Vagus facilitation, temperature effect on (rat), 146 205

Vagus nerve, cardio inhibitor fibres course in (sheep), 139 419

fibre composition in (cat), 135, 182

Vascular resistance, cholmesterases action on (dog), 139, 262

- Vascular smooth muscle, measurement of tension m (rabbit) 153 290
- Vasoconstructor drugs, temperature effect on artenal muscle response to (rabbit), 146, 54 P
  - temperature effect on artery response to (bullock), 142, 395
- Vasoconstrictor stimulation, noradrenalme effect on threshold of (dog), 150, 297
- Vasoconstrictor substances plasma con taming (man, rabbit) 138, 406
  - progen release of (rabbit), 138, 418
- Vasoconstrictor tone, mtrathoracic venous pressure effect on skeletal muscle (man), 139, 369
- Vasodilatation, post-hypercapnic (man), 145, 37 P
- Vasodilator fibres, forearm skin vessels receiving (man) 139, 457
- Vasomotor activity, central stimulation of perpheral (sheep) 149, 44P
- Vasomotor fibres, limb skin receiving (msn) 153 232
- Vasomotor reversal, reserpine and (gumea pig), 143, 73 P
- Vasomotor tone, measurement of (rabbit), 153 290
- lasopressin, adrenalectomy effect on renal response to (dog) 148, 55P
  - age effect on content in neurohypophysis of (mammal), 147, 301
  - affected by (cat) 152, 214
  - b'ood pressure during pregnancy affected by (rat) 149 556
  - deribution in placenta of enzyme de groving (man) 146 539
  - electrolyte excretion affected by (dog) 142 470
  - excretion and fate of pressor fraction of imjected (rat) 136 10P
  - fale and exere ion of pressor activity of (rat) 13S 11
  - hvaluromidase and antidiuretic ac trutt in urine following (man) 154 381
  - response to (rat) 148 623
  - -SH ac is compounds destroying antidiuretic activity of (pig) 141 107
  - urine concentration effect on antidiuretic action of (rat) 139 112
  - wa er and electrolyte excre ion affected by (man) 150 284
  - Vasopressinase enzyme inhibitor action on (man) 148 284

- 'Vasosensory controlled perfused living animal', carotid body chemoreceptor stimulation effect on pulmonary vas cular bed in (dog) 148, 201
- Velodyne flowmeter (T), 137, 69P
- Venepuncture, blood clotting time affected by senal (man), 135, 375
- Venous blood, haemostatic capacity of (dog) 142 242
- Venous blood CO<sub>2</sub>, radioactive bicar bona'e mjection effect on specific activity of (dog), 147, 473
- Venous blood perfusion, cutaneous has mostasis in limb following (dog), 153 73P
- Venous congestion, digital blood flow affected by (man), 136 501
- Venous occlusion plethysmograph, water height effect on blood flow measurement by (man), 143 350
- Venous oxygen saturation, increased transmural pressure on forearm affecting (man), 149, 617
- Venous return, partition of (dog) 142, 366
  - positive pressure ventilation effect on (cat) 138, 111
- Venous temperature, muscle blood flow mdex by (cat), 145, 20P
- Ventilation, pulmonary arterial pressureflow relationship affected by (cat) 136, 114
- Ventilation rate, altitude effect on (man), 135, 594
- Ventilation volume, conscious appreciation in paralysed patients of changes in (man) 149, 494
  - oxygen consumption relation to (man) (T) 143 86P
- Ventral root response, lateral column and dorsal root stimulation effect on (frog), 150 634
- Ventricle, calcium exchange in isolated (tur'le), 152 34P
  - diastolic length tension relationship in strips of (rat, frog), 154, 15P
  - filling pressure effect on beat of (frog), 149 201
  - oxygenation decrease effect on isolated (rat) 145 42 P
  - oxygen consumption and simultaneous contractions measurement of (rat) 136, 3P
  - po entiation after rest in isolated (rat), 136 14P
  - sodium po assium hypothesis as basis of electrical activity in (frog), 154, 385

Ventricle strip, conditions favouring spon taneous activity in isolated (rat), 136, 15P

thyroid state effect on contractility of isolated (rat), 141, 29 P

Ventricular fibrillation, ions affecting electrically induced (rabbit), 141, 366 oxygen lack and glucose lack affecting (rabbit), 137, 20 P

Veratrine, after potentials of skeletal muscle fibre affected by (frog), 142, 88 Veratrum alkaloids, pulmonary and

gastric stretch receptors and atrial receptors affected by (cat), 135, 486

Vermis, spinal α motoneurones affected by (cat), 149, 640

Vertebral artery, brain regions supplied by (cat), 140, 236

effects of occlusion of carotid and (sheep, gost), 138, 20 P

respiration affected by adrenaline in jection in (cat, rabbit), 137, 378

Vertical shaking, machine for tubes (T), 154, 56P

Vibration receptors, interesseous region containing (cat), 153, 79

Virus-infected sympathetic ganglia, presynaptic slow potentials in (rat), 151, 217

Visceral afferent nerve fibres, mono synaptic and polysynaptic reflex re sponses affected by stimulation of (cat), 150, 105

Visceral distension, mono and polysynap tic reflexes affected by (cat) 140 206

Visceromotor reflexes, spinal paths in fluencing (cat), 136, 34 P

spinal tracts and supraspinal centres influencing (cat), 141, 489

Vision, accommodation and convergence relationship in (man), 137, 488

accommodation fluctuations under steady viewing conditions in (man) 145, 579 after images discrimination in (man), 147,

194
apparatus for study of size and shap

apparatus for study of size and shape constancy in (man), 140 30P

background intensity effect on temporal and spatial summation in (man) 141, 337

controlled movements of stabilized retinal image effect on (man) 145, 98

merement thresholds and visual noise in (man), 136, 469

minimum flux of energy detectable in (man), 145, 369

receptive fields of single neurones for (cat), 148, 572

Visual acuity, eye movements and head eye movement integration in (man), 145, 50P

'off' mechanisms and (man), 137, 48P threshold flux and eye movements and (man), 152, 24P

Visual cells, initiation of impulses in (Limulus), 148, 14

Visual discrimination, unilateral successive temporal lobe excisions affecting (monkey), 140, 38 P

Visual field, optic lobe single units re sponse area of (locust), 154, 482

Visual pigments, change during life of (fresh water eel), 139, 8P

difference spectra by transmitted and by reflected light of (albino rat), 136, 620

kinetics in cones of (man), 142, 30P 'narrow band' (frog), 145, 630

Visual responses, transmission in nervous system of (locust), 146, 492

Visual stimulus, hypothalamic single neurones response to (rabbit), 148, 562

Visual stimuli, single unit activity in stricte cortex response to (cat), 147, 231

Visual thresholds, carbon monoxide effect on (man), 146, 583

lateral geniculate body recording of (cat), 146, 179

Vitamin B<sub>12</sub>, small intestine site of ab sorption in vitro of (rat), 148, 67P

Vitamin E-deficiency, oxygen poisoning affected by (rat), 140, 37

Vitamin E, erythrocyte response to high oxygen pressures affected by (rat), 135, 60 P

Vitreous humour, chemistry and rate of turnover of (bush baby), 145, 433

sodium exchange between blood, aqueous humour and (rabbit), 137, 110

Volatile fatty acids, abomasal secretion affected by (sheep), 154, 124

Voltage clamp, membrane currents in nerve fibre under (frog), 143, 76

Voluntary contraction, rhythmical activity of groups of motor units in (man), 137, 473

Voluntary hyperventilation, humoral vasodulatation in forearm during (man), 137, 80

Vomiting, intraventricular drugs causing (cat), 147, 172

Walking, calf blood flow after (man), 149, 17P

energy expenditure by men and women in 138 165 141 28 P

Walking, individual variations in energy expenditure of (man), 143, 575

work output relation to load during (eledre dog), 137, 214

Watch, temperature-controlled, 147, 34P Water, new born response to intake of

(dog), 141 81 phlo-thum action on intestinal transfer

in citro of (ra\*), 144, 397

Water balance, fasting and refeeding effect on (ra\*) 154, 232

Water depletion, parolid secretion response to Na depletion affected by (sheep) 140, 131

Water deprivation, antiduretic hormone role in (rat) 136, 235

Water diuresis, electroly excretion during (dog) 141 177

osmotic duresis during (man) 141 11P oxytocin vasopressin and phenylalanyPoxytocin, effect on (man) 150 287

sulbossurol effect on (dog) 145 227 sucking effect on (man), 149 450

vasopresim effect on electrolyte excretion during (dog) 142 470

Water intake, kidney's concentrating ability affected by high (man) 139, 42 salt consumption, taste threshold and salivary secretion affected by high (man) 139, 53

Water metabolism, factors affecting (lizard) 145-37

methylpentynol action on (rat) 144, 138 Water transport, factors affecting small

m es me (ra\*) 136 634

Wave generator, hydraulic press 142 44P Weber-Fechner law, visual noise and (man) 136 474

Weber fraction, after mage discrimina tion and (man), 147, 196

West Africans, heart rates of indigenous. 135, 52P

Whale thymus gland, nerve muscle pre paration affected by extracts of foetal (ca<sup>4</sup>), 144, 24*P* 

White blood cells, his amme sensitivity of gumea-pig s fleum reduction by extract of (T) 145, 23P

White light, after-effects of stimulation by (man), 150 67

Wild animals, metabolism of small (T), 151, 20P

device to facilitate metabolic studies m small restless, 151, SP

Wild rats, behaviour changes following rhinencephalic damage in (Film) 135, 39 P

death from shock due to fighting among, 135, 65P

experiments on social behaviour of (F) 135 35P

Wind speed, maximum evaporative capatity affected by (man) 147-253 Wireless telestimulator constant simuli

to corex by (cat) 150 1P Work output, gast and load effect on

(sledge dog) 137 214
Wound contraction, granulation tissue

recorption and (rabbit) 152 7P Wound healing, irradiation effect on (rabbit) 137 36P

Z line, adenme nucleo'ide concentration in (frog) 153 439

local activation of (frog) 144, 431
